

Battlestar „Pallas”

A cooperative X-Wing Campaign for 1-4 players

By Stefan Sasse

With artwork by David Julien

Based on Josh Derksen's "Heroes of the Aturi Cluster”

Version 0.9.8

This campaign is a supplement to the popular "Heroes of the Aturi Cluster"-coop campaign. If not stated otherwise, its rules apply. This campaign cannot be played without the HotAC material and rules. The Gozanti Assault Carrier expansion is needed or needs to be proxied. The gist of this campaign is that it outfits the players with a mothership, a captured Gozanti carrier, that they can outfit and strengthen over the course of the missions and take into battle on several occasions. The campaign can be played with a maximum of four players.

Player ships

- **Starting Ships:**

Every Ship starts with PS2.

Ship	Start XP
X-Wing	5XP
HWK290	10XP
Attack Shuttle	8XP
Scurrgh H-6	1XP

Ship	Start XP
Y-Wing	8XP
B-Wing	4XP
ARC-170	4XP
Auzituck	1XP

Ship	Start XP
A-Wing	10XP
YT-1300	-2XP
U-Wing	3XP
B/SF-17	-1XP

- **Losing and switching ships**: Whenever you get shot down, you need to get a new ship. New ships cost 5XP. You can buy them in advance and put them in the Hangar. If you have ships in the Hangar, player may switch between missions (e.g. *two players bought two X-Wings and one Y-Wing. They can decide to fly either two X-Wings or one X-Wing and one Y-Wing into the mission. If in the latter case the X-Wing gets show down, the players may either use the one left or purchase another eligible ship for 5XP*). If players get shot down in a mission with the „Pallas", they can purchase a new ship or use one already purchased until they run out of XP. If they have fewer than 5XP and get shot down, they may rejoin the mission in a Z95 Headhunter without any upgrades. Every Z95 that's shot down costs 1XP; negative XP can be accrued this way.
- **Changed ship upgrades**: All ships gain two System or Tech slots at pilot level 6, to accommodate the rising difficulty in encountering more non-standard TIE fighters. There are also some new upgrades available.
- **Unlocking ships:** When meet the criteria below, you can unlock new ships. Attempting a special mission happens before starting a new campaign round, which means that "Pallas" and player ships retain their damage, shield, energy and ordnance from the preceding mission. If successful, you unlock the ship. From now on, you can purchase it for 5XP like all the other ships (note: this means that for the unlocking XP, you don't gain a ship to fly!). If you already fly the basic version of the ship (e.g. the YT-1300) and purchase an improved version (e.g. the YT-1300 Combat Refit) you may change the ship for free after the mission if you didn't need to purchase a new one. Each of these new ships has its own unique player card.

Ship	Available	Prerequisite	Unlock
HWK290 Alliance Overhaul	Season 1	-	10XP
A-Wing Mass Production Model	Season 1	-	2XP
A-Wing Mark II	Season 2	-	6XP
A-Wing Mark III	Season 3	-	16XP
T65B X-Wing	Season 1	-	12XP
T65AC4 X-Wing	Season 1	-	2XP
ACT65 X-Wing	Season 1	-	5XP
BTL-S3 Y-Wing	Season 1	-	1XP
YT-1300 Combat Refit	Season 1	Special Mission 5	20XP
B-Wing B6 Prototype	Season 2	-	6XP
T70 X-Wing	Season 2	Special Mission 2	20XP
YT-2400	Season 2	Special Mission 6	10XP
K-Wing	Season 3	Special Mission 3	25XP
E-Wing	Season 3	Special Mission 4	24XP

- **Returning upgrades**: Players can return upgrades they no longer want for their XP price.

Gozanti "Pallas"

- **Pilot Skill:** The „Pallas'" PS always the same as the players' average (round up).
- **Player ships:** The phrase "player ships" always only refers to the ships the players themselves fly and not to the "Pallas".
- **Docked ships:** Players may start a mission including the „Pallas" docked, as per Gozanti rules, if not expressly forbidden by the scenario rules, and may re-dock during each mission (see below). When docked to the „Pallas", the „Pallas" can
    - use the Recover action to also recover the shields of docked fighters (the cost must still be paid)
    - use the Reinforce action to repair up to four hull points of ships docked instead of its usual effect. It needs to spend two of those points to repair a face-up damage card.
    - replenish all docked Rebel ships with their ordnance. This doesn't cost an action and happens automatically.

  When players redock, they lose their next turn as they are repaired, replenish their ordnance, or recover their shields. Only if they do neither of those may they undock (see below) directly in the next turn.

  Docking with the Gozanti: To dock with the Gozanti, a player ship's maneuver tool must overlap the Gozanti. Bumping still costs an action and may lead to damage. Bumping into the Gozanti does not lead to a successful docking attempt.

  Docking the Gozanti with Docks: There is an explanation in the FAQ at the end of the document how the docking maneuver works exactly, including pictures. When the Gozanti is docked with a dock, it gains energy as if it performed a 1-straight maneuver and can perform actions and attacks as usual, if not specified differently in the mission.
- **Undock:** Players undock from the „Pallas" in their own turn. Undocking is not a „Pallas" action.
- **Jumping:** The „Pallas" can jump out of a system (and be removed from the board) as per usual hyperjump rules. However, acquiring a jump-token costs one energy. For the „Pallas", all 1- and 2-maneuvers count as green for this purpose.
- **Replenishing:** Between missions, the „Pallas" replenishes its shields, hull points and energy as well as discarded upgrade cards unless explicitly stated otherwise by the mission.
- **Upgrades:** Upgrades, including Titles, can be purchased for the „Pallas" at the regular prices. The „Pallas" may gain no "Imperial Only" upgrades that are not directly related to the ship itself (*example: it cannot gain Emperor Palpatine, but it can gain the Broadcast Array or a Title*).
    - It also needs to purchase the regular actions it can take (like Reinforce or Jam) for 2XP each.
    - The „Pallas" may also purchase additional energy, hull and shields. The first energy and hull cost 2XP, the first shield 3XP. Every additional point costs one more XP than the last (*example: the second point of shields purchased costs 4XP*). Note these points separately for later reference.
    - Ordnance Tubes are not a modification; instead, they are purchased for their respective torpedo and rocket slots for 5XP. Mark them on your character card in the corresponding box. Firing both Ordnance Tubes in the same round costs two energy that need to be paid in advance. The "Pallas" cannot allocate energy to the Ordnance Tubes.
    - Commander Abel: When the players gain the "Pallas", they also gain the "Commander Abel" crew upgrade card. Equipping it is not mandatory.
    - Rebel Docking Clamps: The "Pallas" comes with the upgrade card "Rebel Docking Clamps", which must be equipped for any Rebel ship to dock with the Gozanti.
    - Slicer Tools: Since the AI doesn't acquire Stress Tokens, the original Slicer Tools are practically worthless. You find a HotAC-compatible version at the end of this document.
    - All Huge Ships upgrades are *Limited*. Exceptions are the Ordnance Tubes.
- **XP**: The „Pallas" scores XP by destroying and damaging ships, just like the players would. Its earned XP go directly into the pool (see below).

Miscellaneous

- **AI:** All AI ships swerve out of the Gozanti's 4-straight flight path (no matter the maneuver actually chosen) as if it would be the board edge to avoid being rammed. AI ships also reduce their speed or swerve like this (in that order) to avoid ramming it.
  TIE Fighters and Interceptors ignore the „Pallas" for their target of maneuver and always target the players' fighters, even if the "Pallas" would be closer. They only shoot on the "Pallas" if no player ship is in range and arc, even if the "Pallas" would be closer.
  Strike AI: Unless otherwise stated, Strike AI targets the „Pallas". If not otherwise specified, such ships additionally carry either Proton Torpedoes or Concussion Missiles, if applicable.
  When the AI is outside of distance 5 to any target, it always chooses the maximum speed of the rolled bearing (e.g. *if a TIE outside Range 5 of its target rolls a straight-4, it goes straight-5 instead*).
- **Critical Hits:** It's recommended to refer to the Critical Hits card at the end of the document for all crits against the AI, since it tends to speed up the game and keeps the table in order.
- **Difficulty:** At the beginning of the campaign, decide whether to play in normal or hardcore mode. In normal mode, the „Pallas" loses its most expensive upgrade when destroyed. In hardcore, the special missions that give access to the T70, K-Wing, E-Wing, YT-2400 and YT-1300 Combat Refit cannot be repeated, upgrades can be returned for only half the XP recouped (round up) and if the „Pallas" is ever destroyed, the players lose the campaign.
- **Hangar:** All upgrades purchased can be put in one pool (Hangar). All upgrades in the Hangar can be used by any player; players need to agree on the distribution. If they can't, the Squad Leader decides. Players can also switch between purchased craft (see below) if they like.
- **Ionizing Huge Ships**: Huge Ships are ionized when they gain one Ion Token. If not otherwise specified by the mission, on their next turn, they choose the 1-straight maneuver. They count as "ionized" for the complete round for mission-goal purposes. Ionizing Huge Ships is only possible when the scenario allows for it.
- **Lone Wolf Elite Pilot Talent**: Huge Ships do not count as "friendly" for the Lone Wolf ability.
- **Number of players**: It is highly recommended not to play the campaign with a single ship. Even though the tables offer this opportunity, the balancing can be off.
- **Predator Elite Pilot Talent**: Predator always only grants one reroll, independent from enemy pilot level. It is not purchased. Instead, keep track of your kills. Once you shot down five enemy ships of one type (TIE Fighter, TIE Interceptor, TIE Bomber, …), you are considered an Ace and gain Predator for this ship type. Mark it in the corresponding box on your character sheet.
- **Protect Action**: The Protect Action (from HotAC) allows you to allocate Evade tokens to other Ships. It's always available as a Standard Action, even to target other player's ships (+Assist XP). The Protect Action is marked with this symbol on the player cards.

- **Recuperate Action**: All ships have access to the Recuperate Action. Some upgrade cards like "Crackshot" that are not ordnance are to be discarded after use. All such cards are not discarded but turned face-down. They can be refreshed by spending a Recuperate Action on them. Only one card can be refreshed per Recuperate Action taken. The Recuperate Action is marked with this symbol on the player cards.

- **Bullseye Firing Arc:** Some upgrade cards may provide you with a Bullseye Firing arc. Measure whether you're able to hit a ship with it with a straight maneuver template in your frontal nubs.
- **Sergeant Kabowski upgrade card**: In some missions, you need to escort a strike team led by Sergeant Kabowski. He's an expert infiltrator, and in those missions only, you gain him as a crew member on his craft. There are two alternative cards for him at the end of the document that only differ only in aesthetics. Huge Ships that have him equipped gain the Evade Action.
- **Squad Leader:** Before every mission, the players need to decide who the Squad Leader is. This player has the initiative when players have the same pilot level and makes decisions if no consensus can be reached. If they cannot agree, decide randomly. The Squad Leader's ability works on ships with equal pilot level as well as lower pilot level.
- **Territory:** When getting shot down in neutral territory, players lose 1XP. If they get shot down in enemy territory, they lose 2XP. This is additional to the cost of purchasing a new ship.
- **Upgrade restrictions:** Some upgrades are restricted to prior purchases or Pilot Level:

    - Astromechs: No R7-type Astromechs in season 1. You need to win three missions with a generic Astromech before being allowed to buy a unique Astromech.
    - Crew: No unique Crew priced 5 or higher in Season 1.
    - Elite Pilot Talents: No upgrades priced 3 or 4 in Season 1.
    - Missiles: No Missiles priced 4 or higher before three missions were won with Missiles costing 3 or lower.
    - Torpedoes: No Torpedoes priced 4 or higher before three missions were won with Torpedoes priced 3 or lower.
    - Turrets: No Twin Laser Turrets before Season 2.
- **XP**: XP are earned by each player separately, and can be spent as each player likes. However, players may donate any number of XP in a common pool, from which other players and, especially, the "Pallas" may draw (Squad Leader decides if no consensus can be reached).
  XP earned by the "Pallas" go into the pool unless otherwise stated. The "Pallas" earns XP the same way as the players.
  Alternatively, players may agree to a shared common pool of XP.

Material required

If you have everything you need to play the "Heroes of the Aturi Cluster" campaign, you're pretty much set. The only things you need to produce more of are one additional Docking Bay, Single Station Module and four additional Turbo Laser Turrets from said expansion if you play with three to four players.

All additional cards etc. can be found at the end of this document.

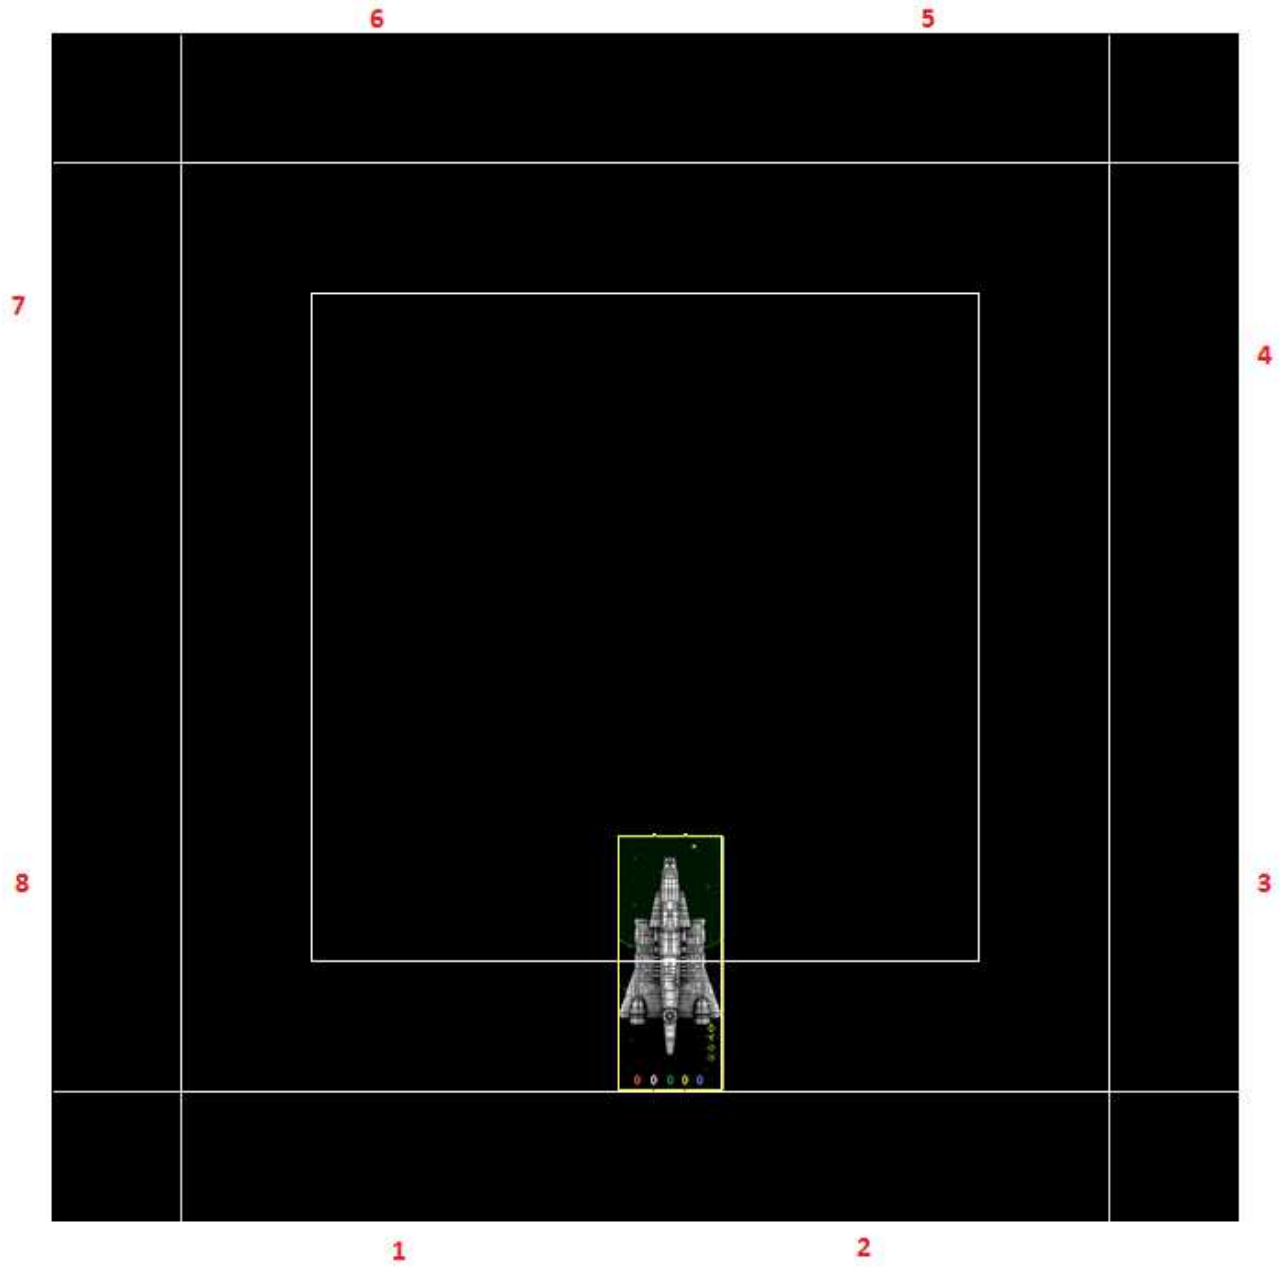

FAQ

At the end of this document, you find an FAQ with additional explanations and special situations that may require clarification.

Special Mission 1: Attack on the “Pallas” (“Pallas”, 3x3)

This mission can happen multiple times over the course of the campaign. The “Pallas” is attacked by an Imperial strike force.

NEUTRAL TERRITORY – 8 TURNS

Mission Objectives:

Primary	Survive the assault.

Rebel Victory: *“That was way too close! We need to be more careful next time!”* **Refer to preceding mission.**	**Imperial Victory:** *“They got us! Noooooooo….!”* **Refer to preceding mission.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha S1	Setup	7	Attack	+TIE	+TIE	+TIE	+TIE
Alpha S2	Setup	7	Attack	+TIE	Upgrade to Advanced	+TIE	Upgrade to Advanced
Alpha S3	Setup	7	Attack	+TI/fo	+TIE/fo	+TIE/fo	+TIE/fo
Beta S1	2	4	Strike	+Bomber		+Bomber	
Beta S2	2	4	Strike	+Punisher		+Punisher	
Beta S3	2	4	Strike	+Punisher	+TIE	+Punisher	+TIE
Gamma S1	4	6	Strike		+Bomber		+Bomber
Gamma S2	4	6	Strike		+Punisher		+Punisher
Gamma S3	4	6	Strike	+TIE	+Punisher	+TIE	+Punisher
Delta S1	4	3 or 8	Attack	+Elite (random)			
Delta S2	4	3 or 8	Attack	+ 2 Elite (random)			
Delta S3	4	3 or 8	Attack	+ 3 Elite (random)			
Epsilon S1	6	1 or 2	Strike		+Bomber		+Bomber
Epsilon S2	6	1 or 2	Strike		+Punisher		+Punisher
Epsilon S3	6	1 or 2	Strike	+TIE	+Punisher	+TIE	+Punisher

The number and category of enemy differs with the season the players are in, so for example, in season 2, Delta Squad consists of 2 random elites, while in season 3, it's three random elites.

Setup

The players start the mission docked to the "Pallas". Refer to mission variations for obstacles. The "Pallas" starts at Range 1 from the board edge between vectors 1 and 2.

Jumping

Players can only jump to hyperspace beginning with round 6.

Mission Variations: Location and obstacles

If not determined otherwise by the preceding mission, roll 1d6 to determine the location of the battle.

1 – Empty Space. No obstacles.
2 – Asteroid Field. Place 3 random asteroids at Range 2 from the "Pallas". Roll a D8 for rough location estimates using the vectors.
3 – Asteroid Cluster. Place 6 asteroids at Range 1 from the „Pallas" and at Range 1 from each other.
4 – Nebula. Place four random ion nebulas. If you draw one with the edge cut off, roll 1d8 to determine its location at the board edge. In all other cases, roll 1d8 and place the nebula at 3 distance from the vector, even if it would then overlap the „Pallas".
5 – Minefield. Place 6 minefields, 2 at Range 1 from the „Pallas", 2 at Range 3 and 2 at Range 5. You can place those anywhere you like; however, Imperial ships will not spawn closer than distance 1 to any minefield. Minefields are hostile to both sides.
6 – Ship graveyard. Place 6 debris tokens. Place 3 random debris tokens at distance 1 form the "Pallas" and each other, and 3 random debris tokens in the at Range 3 from the "Pallas" and each other.

Taking over damage after mission loss

If you are not playing on hardcore difficulty and you lost this mission, start the next mission with full hull, no shields, no energy and you cannot use its most expensive upgrade unless you are instructed to use worse values by the mission setup.

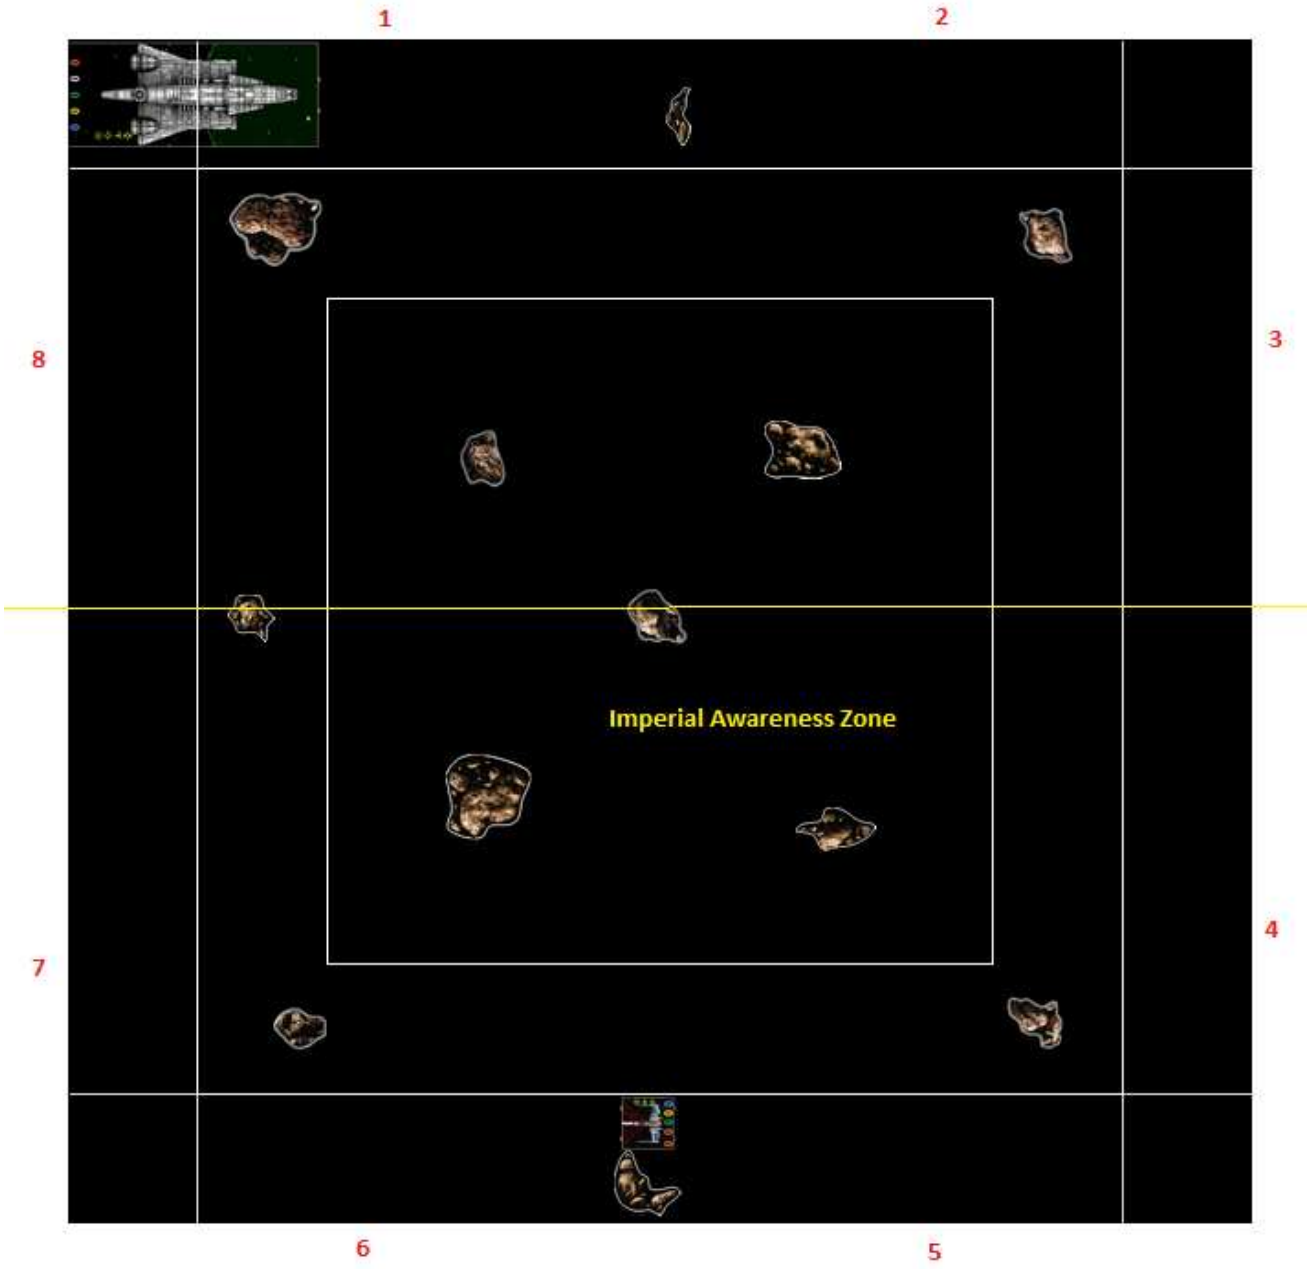

XP

You don't gain any XP in this mission. However, players can still lose XP due to destroyed ships and the effects of Neutral Territory.

Special Mission 2: Retrieve the T70 prototype ("Pallas", 3x3)

Commander Abel is calling you into an emergency briefing. "We just got word from command that a prototype for the next X-Wing generation has been lost on a training mission. If we let the Empire get their hands on it, we've got a serious problem. If it's destroyed, our development is thrown back by months. So we need to haul it in as fast as possible. You need to screen the "Pallas" as we do this."

HOSTILE TERRITORY – NO TURN LIMIT

Mission Objectives:

Primary	Dock with the T70 and escape by jumping out of the mission area.

Rebel Victory: *"We have the prototype, but the pilot didn't make it. Guess one of us has to continue the field-testing."* **Refer to preceding mission.**	**Imperial Victory:** *"Damn! This really went not the way it was supposed to be!"* **Refer to preceding mission.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	D8	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor
Beta	Setup	D8	Strike	+Bomber	+Bomber	+Bomber	+Bomber
Gamma	Setup	D8	Attack	+TIE/v1	+TIE/v1	+TIE/v1	+TIE/v1
Delta	4	D8	Attack	+Random Ace			
Epsilon	6	D8	Attack	+Shuttle	+TIE/sf	+Defender	+TIE/sf

Player setup

The player ships start the mission docked to the “Pallas”.

Asteroids

Asteroids can be shot down. Each asteroid has three hull and one agility.

Imperial awareness zone

In the beginning of each round after the first player ship entering the Imperial Awareness Zone, roll a die for every Imperial ship. On a hit or crit, they revert to Strike AI against the T70.

T70

The T70 is undamaged, but immobile. Since it drifts through space and Imperial soldiers have shown poor marksmanship in the past, it retains its agility against Imperial attacks. If the T70 is ever destroyed, the players lose the mission. The T70 counts as destroyed if it has been retrieved by the “Pallas” and the “Pallas” gets destroyed.

Retrieving the T70

The T70 is retrieved when the Gozanti performs a maneuver that rams it. From that moment on, the T70 cannot be attacked and is removed from the game. All Imperial ships revert to Strike AI against the „Pallas“.

Sergeant Kabowski

The Pallas may equip Sergeant Kabowski for this mission.

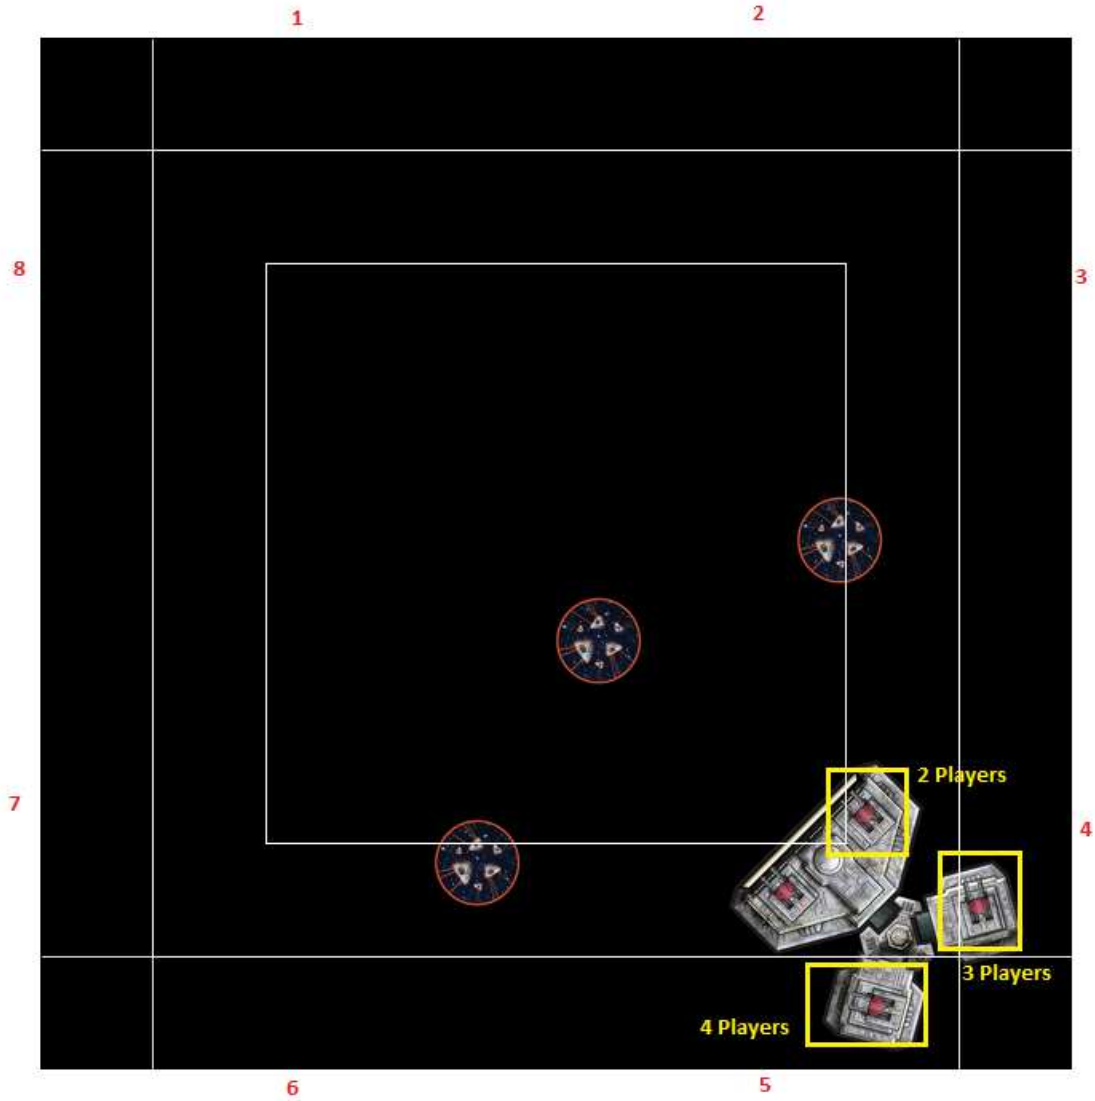

XP

No XP are awarded in this mission. However, players can still lose XP due to destroyed ships and the effects of Hostile Territory.

Special Mission 3: Retrieve the K-Wing prototype (no "Pallas", 3x3)

Commander Abel is talking to a Rebel intelligence officer when you're entering. "Good day", the officer greets you. "I was just telling the commander that we have a unique opportunity to lay our hands on a new prototype, and that the "Pallas" is the closest ship in proximity. Therefore, you get the extraordinary chance to further the cause." You can see on Abel's face just how happy she is with this, which means not at all. "A private corporation developed a new bomber designed for extremely high payloads. The Empire has bargained a high price for it, and we don't think it's wise to let that transaction happen. We need you to get into the fray and retrieve the prototype of this weapon and destroy the station so the Empire cannot get access."

HOSTILE TERRITORY – 20 TURNS

Objectives:

Primary	1) Dock the Blue Squadron Pathfinder with the Docking Bay. 2) Flee with the K-Wing prototype by leaving the game board through vectors 1 or 8.

Rebel Victory: *"We have the prototype! Now we need some brave souls to do some testing with it under battlefield conditions."* **Refer to preceding mission.**	**Imperial Victory:** *"Damn! This really went not the way it was supposed to be!"* **Refer to preceding mission.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	Special	Attack	+Punisher	+Punisher	+Punisher	+Punisher
Beta	Setup	Special	Attack	+Advanced	+Advanced	+Advanced	+Advanced
Gamma	4	3	Attack	+TIE	+TIE	+TIE	+TIE
Delta	8	6	Attack	+Shuttle	Upgrade to Elite	+TIE/sf	Upgrade to Elite
Epsilon	Special	2	Strike	+Interceptor	+Interceptor	+Interceptor	+Interceptor

Player setup

Players and U-Wing may set up between vectors 8 and 1.

K-Wing

The K-Wing has no upgrades and no ordnance, but is otherwise fully operational. If it's ever destroyed, the mission is lost.

U-Wing

The U-Wing is a Blue Squadron Pathfinder. It has Sergeant Kabowski equipped for this mission.

Retrieving the K-Wing

The K-Wing is docked inside the Docking Bay. The U-Wing needs to dock with it by overlapping it with its maneuver tool. Remove it from play. When docked, it releases the commandos in the Docking Bay who then secure the prototype. This takes them three rounds. At the beginning of the fourth round after docking, the U-Wing and the K-Wing are both placed adjacent to the dock and can be used. The K-Wing has a pilot level of 2.

Minefields

The minefields are hostile to the players, but not to the Imperials.

AI

Alpha AI individually reverts to Flee AI when the bombers have unloaded their ordnance. Zeta AI's target is the K-Wing. Epsilon spawns when the K-Wing undocks.

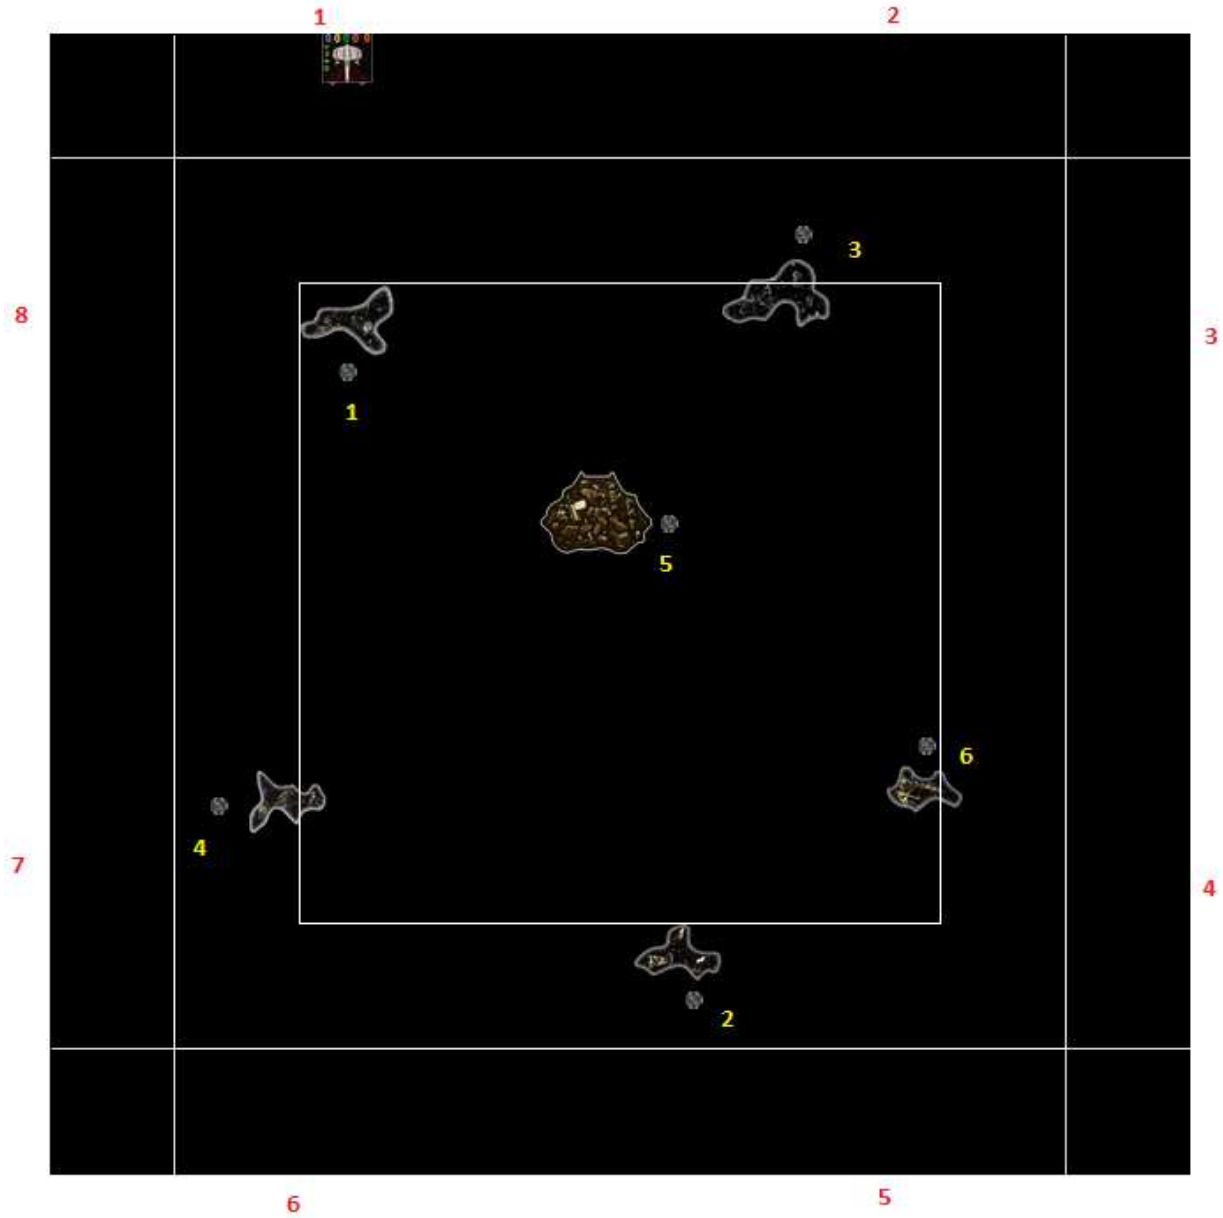

XP

No XP are awarded in this mission. However, players can still lose XP due to destroyed ships and the effects of Hostile Territory. If the U-Wing is shot down, the players lose an additional 7XP.

Special Mission 4: Win the E-Wing prototype (no "Pallas", 3x3)

A new ship docked with the "Pallas". It's a prototype for a new fighter, intended as a replacement of the outdated fighters. It has been damaged quite a bit, and its pilot, a blond, muscular jock named Darren Flash, has broken his leg. "Hey pals", he calls out to you. "Heard you guys are quite the deal. You know what? I can't fly like this, and when my baby has been repaired, someone should fly it. What do you say – you against me in a friendly race in the simulator?"

FRIENDLY TERRITORY – NO TURN LIMIT

Objectives:

Primary	Win the race.

Player Victory:	**Daren Flash Victory:**
"Guys, this was some great flying. Congratulations. You earned this thing." **Refer to preceding mission.**	*"Given the fuzz they made about you I'm kind of disappointed, to be honest. Oh, well, then I'll take it back to base."* **Refer to preceding mission.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	Special	Special	+E-Wing	+2 Shields	+2 Shields	+2 Shields

Winning the race

The race leads through the six waypoints in distance 1 (not range 1!) from the debris cloud (see diagram). These tokens need to be overlapped by either the ship or the maneuver tool to count as checked. Whoever checks the sixth waypoint is immediately removed from the board. To win the mission, all players need to check the sixth waypoint before Daren Flash does. They win by default if Daren Flash is destroyed.

Obstacles

Place the six debris clouds and the six ID tokens on the board like in the diagram. Flying through a debris cloud causes stress and one damage. The obstacles have no effect on Daren Flash.

Initiative

Daren Flash has the same PS as the players. Randomly determine Initiative for the whole mission before the first round.

Bumping

Unlike normally, bumping causes both ships to suffer one damage.

Player ships

Since this is a simulator, players can fly any ship they like with its full hull and shields. They have no upgrades and no weapons. They are not able to attack in any way other than bumping.

AI

Daren Flash ignores obstacles and never swerves. He operates under Flee-AI, with the next number token being his current target.

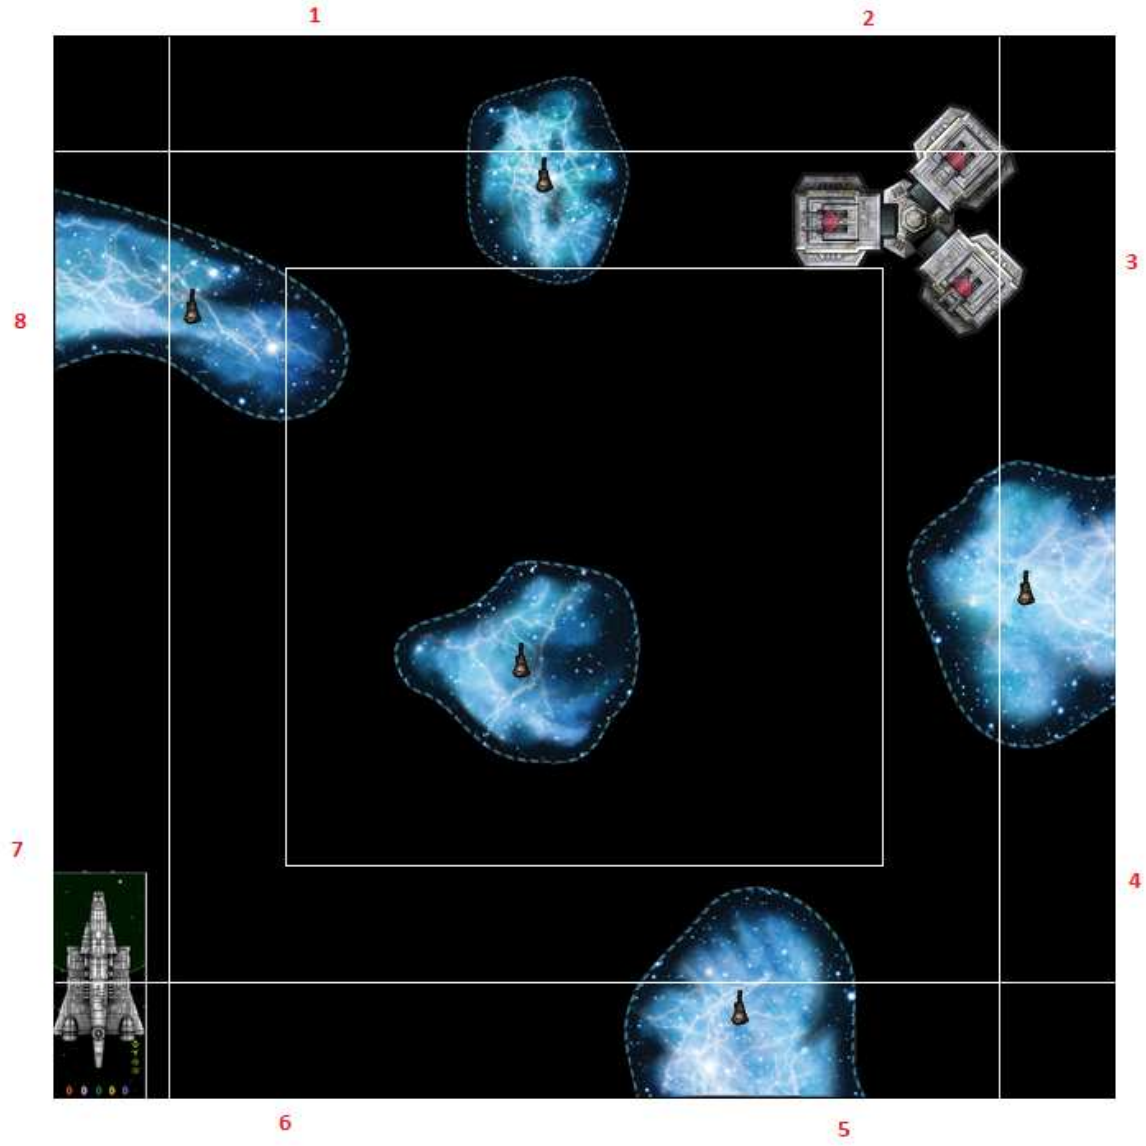

XP

Any player ship destroyed must still be paid in XP. This is a serious loss of face.

Special Mission 5: YT-1300 Combat Refit ("Pallas", 3x3)

Commander Abel calls you into CIC. "Command has had a hard look at our flying roster and has some real problems with the fact that we're using a glorified freighter as a combat craft. Given the great reputation that General Solo enjoys, they decided to copy a page or two from his playbook and give your YT-1300 some nice upgrades. However, it won't be exactly easy to manage this, so we need to be very deliberate. In order to reach the Alliance base, we need to first disable an Imperial listening post."

HOSTILE TERRITORY – NO TURN LIMIT

Objectives:

Primary	1) Destroy all satellites. 2) Destroy the three turrets of the Imperial listening post.

Rebel Victory:	**Imperial Victory:**
"With all those new parts and tweaks you should get a lot more mileage out of that old lady." **Refer to preceding mission.**	*"That went south really fast. That means you'll have to fly the old hump. Sorry guys."* **Refer to preceding mission.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Special	D8	Attack	+TIE	+TIE	+TIE	+TIE
Beta	Special	D8	Strike	+Advanced	Upgrade to Bomber	+Advanced	Upgrade to Bomber
Gamma	Special	D8	Strike	+Bomber	Upgrade to Elite	+Bomber	Upgrade to Elite
Delta	Special	D8	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor
Epsilon	Special	D8	Strike	+Lambda	Upgrade to Elite	+TIE	+TIE

Ion Storms

The Ion Storms block Line of Sight. If a ship template is completely overlapping the ion storm template, it's inside the storm. It has clear LOS inside the storm, but not outside it. If a ship only partially overlaps the template, it cannot see any ship also overlapping the storm. AI doesn't swerve to avoid the storms.

Satellites

To attack the station, the players need to destroy all five satellites. The satellites are hid in the Ion storms, however (place them as central in the storms as you can), and can only be attacked once scanned (except by game effects that don't need declaring a target, like bombs). Satellites can be scanned by performing a scan action in Range 1. Every satellite has two hull and no shields, and rolls one green die. Once scanned, ion storms do not block LOS on the satellites in Range 1.

Enemy spawn

Every time a satellite is destroyed, the next enemy squad is spawned (Alpha after the first satellite's destruction, Beta after the second's, and so on).

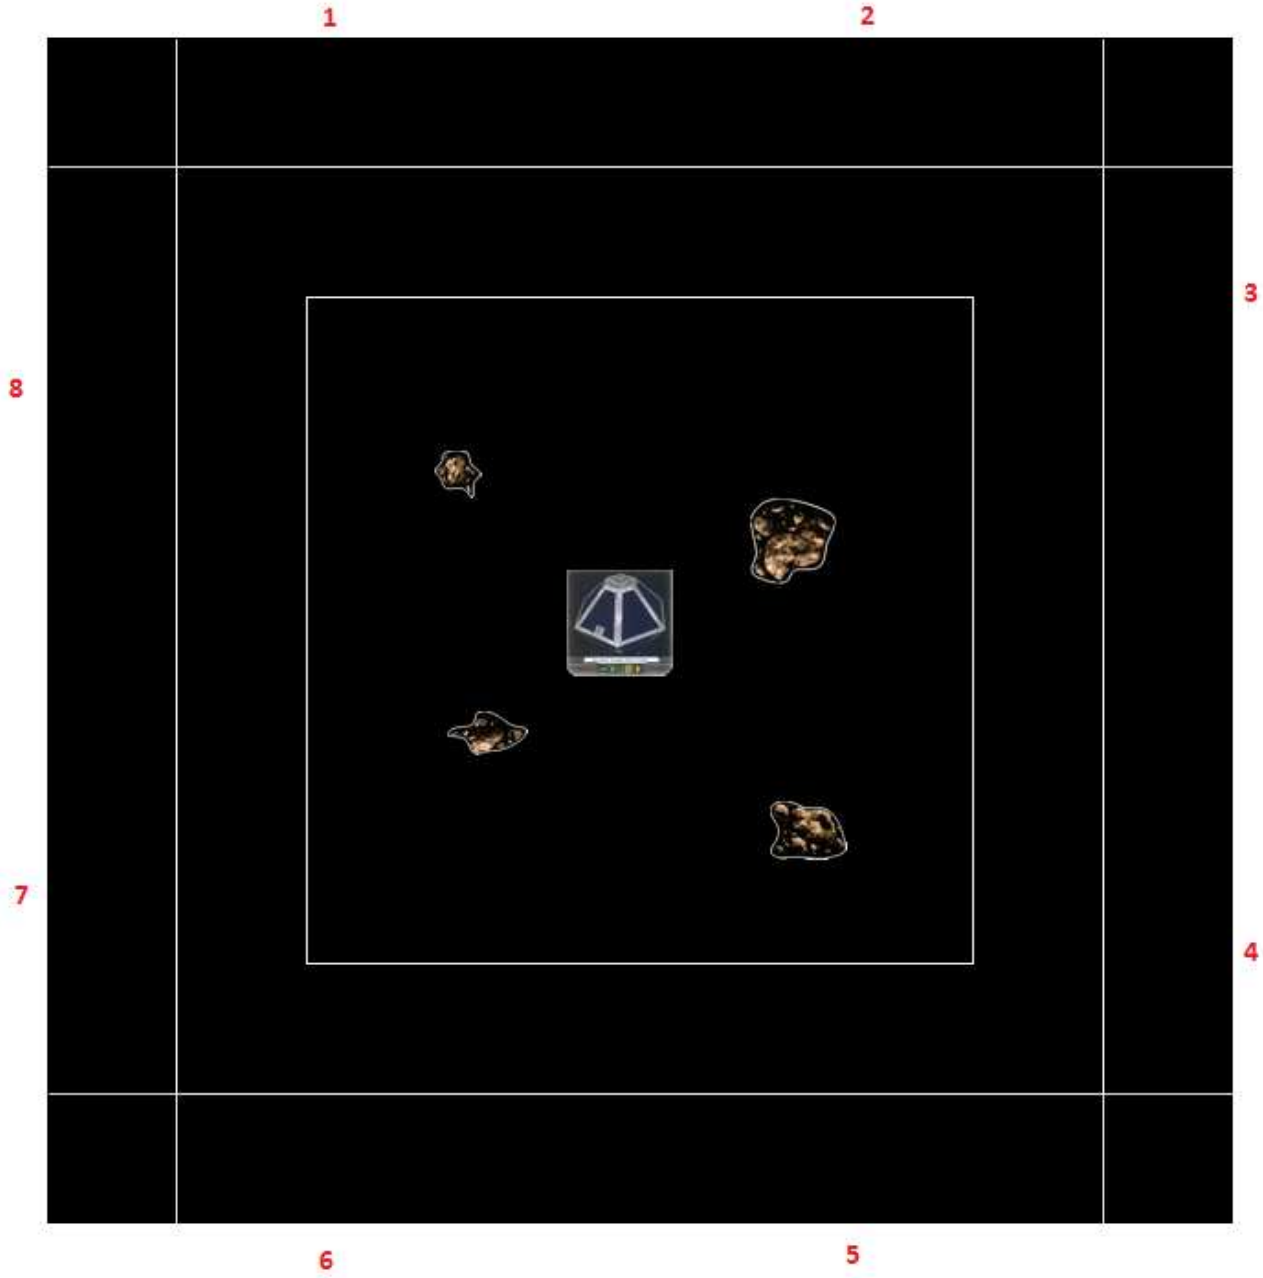

XP

No XP are awarded in this mission. However, players can still lose XP due to destroyed ships and the effects of Hostile Territory.

Special Mission 6: Earn the YT-2400 (no "Pallas", 3x3)

A distress call reaches the "Pallas". "A Rebel transport has been surprised by an Imperial patrol and dropped a vital bit of cargo to protect it. The Imperials are searching for it, but since the crew has not given it any markers, they have a hard time scanning around. We now where it is, but when we go in, the Imperials will learn the location too. So this has to be a quick in and out thing."

HOSTILE TERRITORY – 10 TURNS

Objectives:

Primary	1) Dock with the cargo. 2) Get the cargo out.

Rebel Victory:	**Imperial Victory:**
"You did great out there. The guys waiting for this package are very grateful, and they sent a surprise your way." **Refer to preceding mission.**	*"Damn, it would have been really nice to get this. Now the Imperials gobbles it up."* **Refer to preceding mission.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	1	Attack	+TIE	Upgrade to Advanced	+TIE	Upgrade to Advanced
Beta	Setup	5	Attack	+TIE	Upgrade to Advanced	+TIE	Upgrade to Advanced
Gamma	Special	Special	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor

Player Setup

The player set up their ships in vector 7.

Gamma arrival

Gamma squad spawns in the vector closest to the players once the cargo has been picked up.

Cargo pickup

The cargo is picked up by any player who overlaps it with the base of their ship. In case any Imperial ship accidentally overlaps the cargo before the players do, they pick it up. It will be placed back on the board if that ship is destroyed in the respective ship's location.

Leaving the mission area

The mission area can be left at anytime by flying off the board through any edge.

It is a period of fierce space battles. Many pilots have been shot down. Many more have died.

In the ATURI CLUSTER, a peripheral system without much presence from either side, some pilots have been interred in a secret Imperial prison.

A small group of daring pilots is sent to rescue the prisoners. Just before the mission starts, an Imperial GOZANTI Assault Carrier docks at the prison. The rebels devise a daredevil new plan...

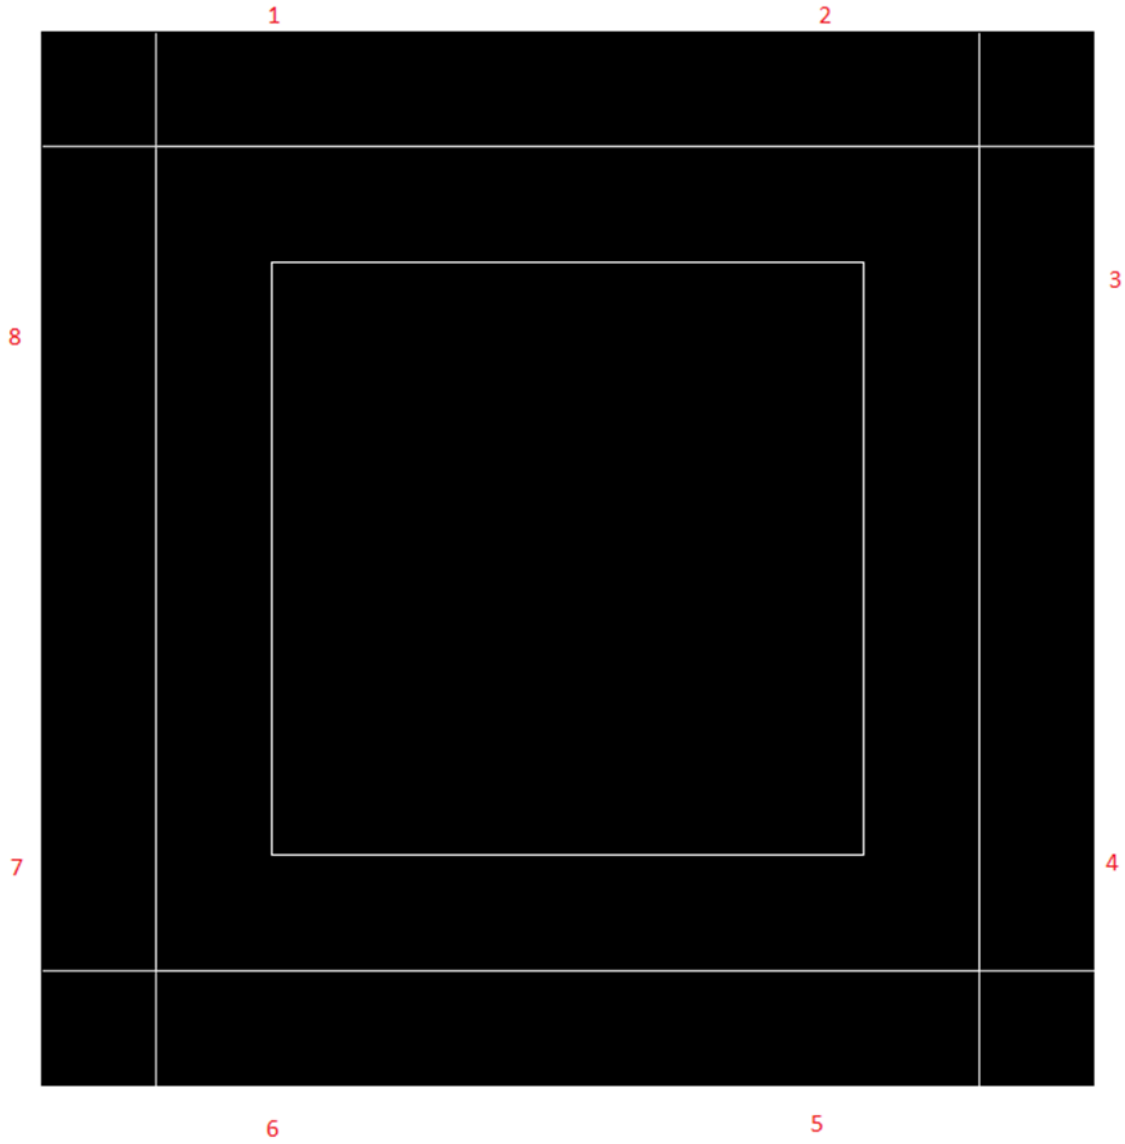

Special rules for Season 1:

Pilot Skill is limited to a maximum of four in Season 1.

Mission 1: Flying School (no „Pallas", 3x3)

While flying a standard training mission, a small patrol of TIE fighters is interrupting your exercise. Instead of following standard protocol to disengage and flee the area, being the hotheaded jocks that you are, you decided to take on the enemy despite not being exactly in the most combat-fitted craft ever devised by the Alliance. You're pretty sure you'll cover yourself in glory with this stunt.

NEUTRAL TERRITORY – NO TURN LIMIT

Mission Objectives:

Primary	Destroy all enemy craft.
Bonus	If no player ship is shot down, gain **2XP**.
Bonus	If no player ship takes hull damage, gain **3XP**.

Rebel Victory: *"You people are absolutely nuts and reckless. This is no way to behave as fighter pilots. Turns out, however, that we have just the job for your…talents."* **Proceed to mission 2.**	**Imperial Victory:** *"Not only did you endanger your lives and that of your comrades, you also lost your ships and let Imperials escape. Turns out, however, that we have just the job for your…talents."* **Lose 1XP. Proceed to mission 2.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	2	Attack	+TIE	+TIE	+TIE	+TIE
Beta	4	4	Attack	+TIE	+TIE	+TIE	+TIE

Rebel Setup:

The Rebel players start in vector 7 in a Z95 Headhunter outfitted with Assault Missiles. They cannot use their starting ships for this mission.

Losing the mission

Rebel players will gain their "real" starting ships for the second mission, so no need to actually by a new Z95. However, in addition to the 1XP mission loss penalty, every player who lost their ship needs to pay 5XP as if they were purchasing a new ship. Remember that you cannot accrue negative XP.

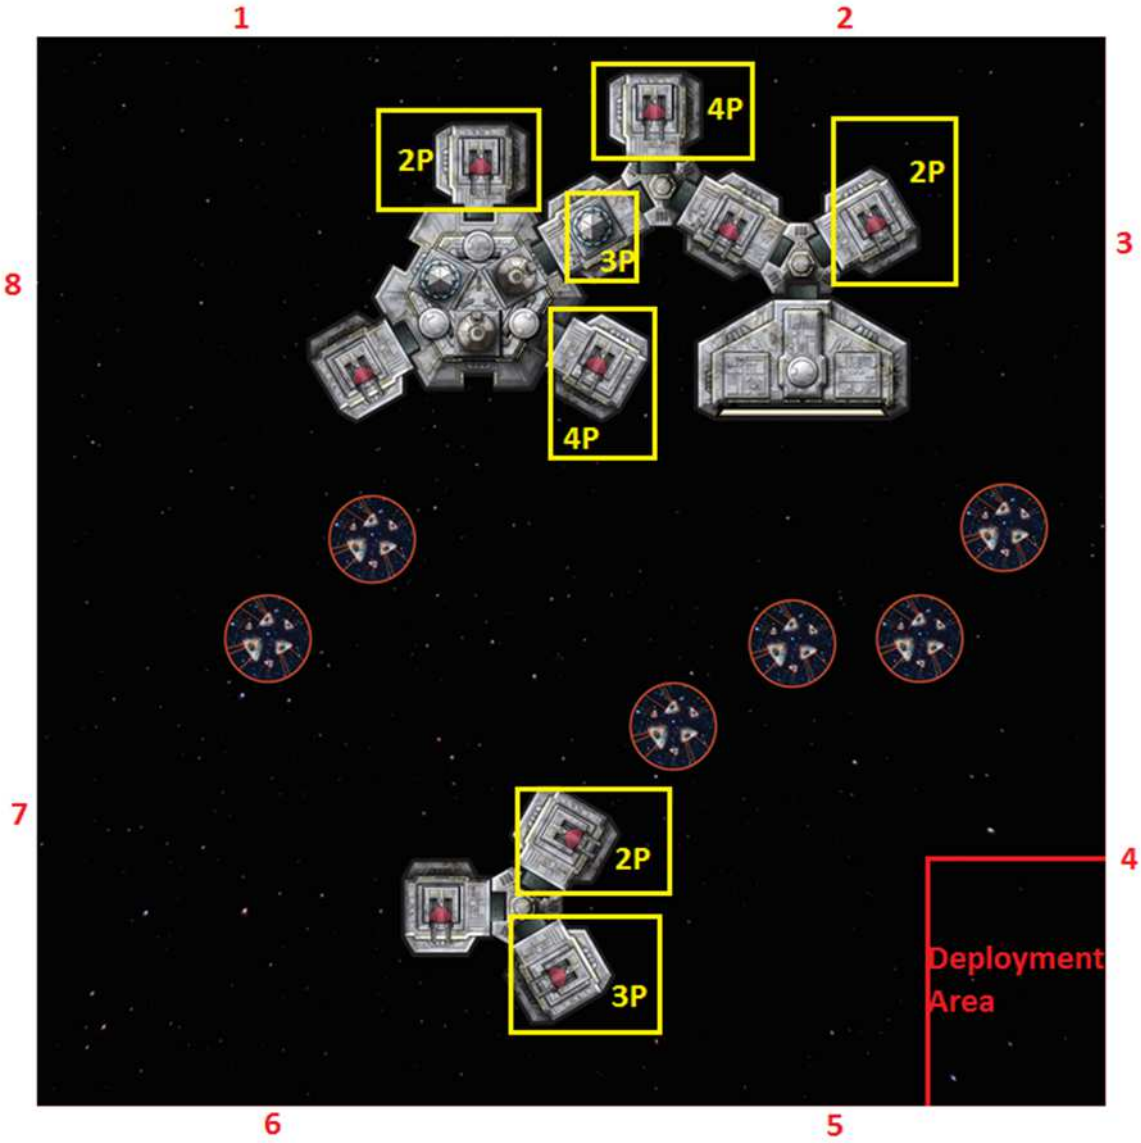

„Pallas" XP

The „Pallas" isn't available yet and doesn't score any points in this mission.

Mission 2: Covert Ops (no „Pallas", 3x3)

An officer calls you in, voice dripping with sarcasm. "Pilots, we are very thankful that you are undertaking this highly dangerous mission." He then gets much soberer. "As you know, we lost some of our pilots recently. Those who survived the loss of their crafts where interred at the Morraj Interment Center. We want you to rescue them. You will have weapons and tools concealed on your bodies, will let yourselves be taken captives and infiltrate the prison from within, freeing the captives. This requires you to get shot down and captured." A smirk shows on his face. "Something you should be good at." Sober again. "We know from intercepts that an Imperial Assault Carrier with some TIE Fighters is on its way to the prison. You will commandeer this craft and rendezvous with a transporter at a remote location seven parsecs away."

NEUTRAL TERRITORY – NO TURN LIMIT

Mission Objectives:

Primary	Get shot down. The players win when all their ships are destroyed. They may voluntarily eject and thus self-destruct as an Action.
Bonus	Every time a turret is destroyed, the active player gains **1XP**.
Bonus	Every time a minefield is destroyed, the active player gains **1XP**.

Rebel Victory: *"The plan worked, and we're in. Now comes the difficult part: getting out again."* **Proceed to mission 3.**	**Imperial Victory:** **(there's no way to lose this mission)**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	Special	Attack	+TIE	+TIE	+TIE	+TIE
Beta	3	Special	Attack	+TIE	+TIE	+TIE	+TIE
Gamma	6	Special	Attack	+Interceptor	+TIE	+Interceptor	+TIE

Rebel Setup:

The Rebels set up their ships in the rectangle created at range 2 or less of the bottom and right edge of the game area. The rebels now use their starting ships, with all upgrades purchased.

Imperial Setup:

The Alpha Squadron is placed **docking** to the Docking Station. Every subsequent squad is also spawned **docking**. (For docking rules, refer to the HotAC-rules.)

Getting shot down

There are no XP penalties for getting shot down in this mission. Save any XP you made this mission and spend them after mission 3. You do not receive any XP penalties for getting shot down, and you do not need to buy new ships.

Obstacles and Emplacements:

There are no special rules for turrets and mines.

Mines

The mines are hostile only to the rebel players.

Mission End:

Do not remove any obstacles, emplacements or other stuff from the board. Only remove ships. The next mission will be played on the same board. The more emplacements and minefields the player destroy, the less they must fear in the next mission.

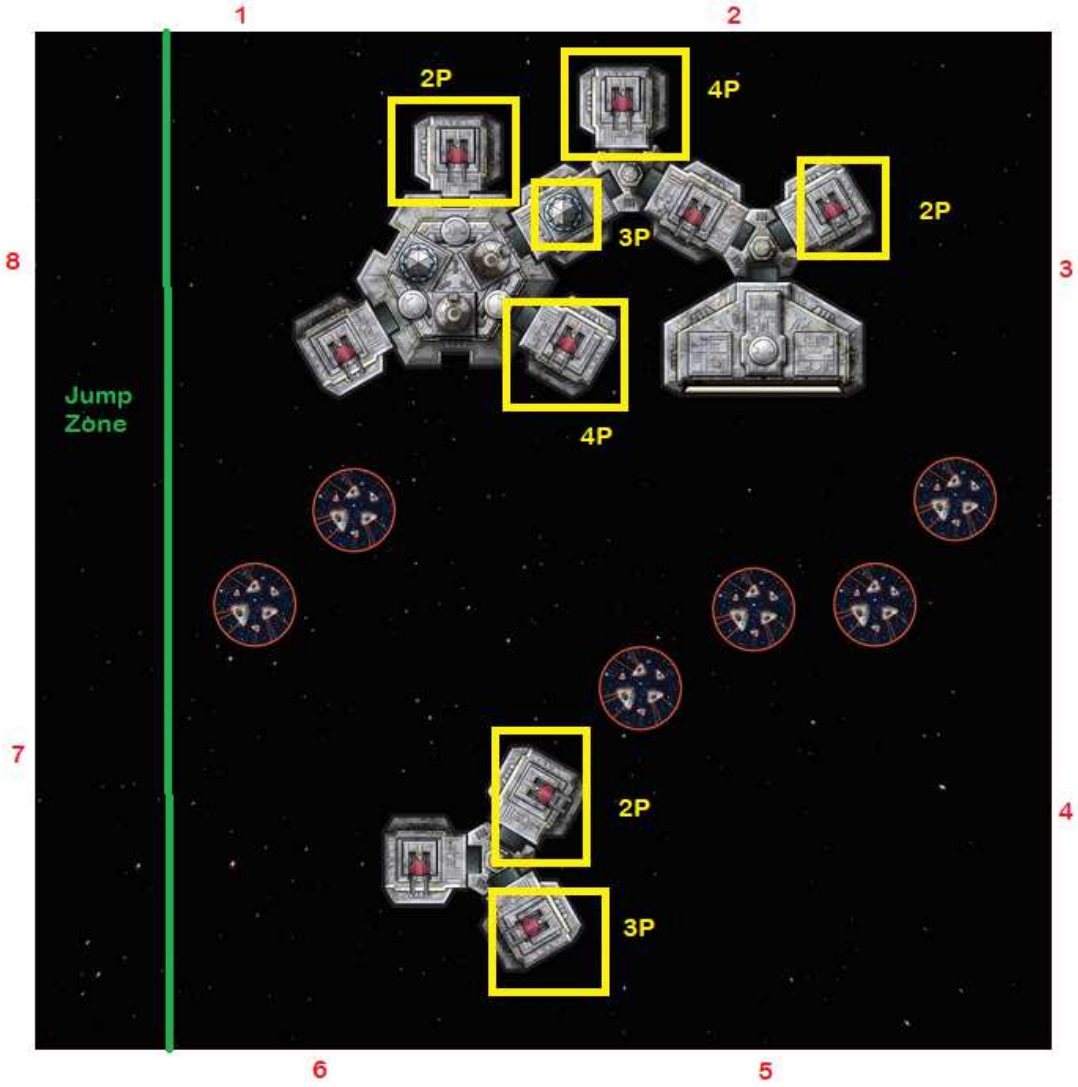

„Pallas" XP

The „Pallas" isn't available yet and doesn't score any points in this mission.

Mission 3: Escape („Pallas", 3x3)

While sirens are blaring, smoke fills the corridors. You and the captives are making their way to the Hangar, where the „Pallas" Carrier is docked. Your hearts sink as you notice the extensive damage due to some fuel explosion nearby. The ship, however, looks like it could still fly. As fast as you can you usher the captives inside the bulky hull, run up the ramp and close the hatch. Now, let's hope that there isn't too much resistance on the way out…

HOSTILE TERRITORY – 10 TURNS

Mission Objectives:

Primary	1) The „Pallas" and all players need to leave the mission area. Jumping is only possible in the green zone. 2) The Pallas must not be destroyed.
Bonus	If Alpha Squad is destroyed, every player gains **1XP**.
Bonus	For every destroyed shuttle, gain **2XP**.

Rebel Victory:	**Imperial Victory:**
"We made it, guys. Now we need to patch up this hump of scrap metal before any more Imperials are showing up." **Proceed to Mission 4.**	*"We made it out, but the damage to the ship is extensive. It will take us quite some time to repair all of that.* **Lose 3XP for every player. Then proceed to Mission 4.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	5	Special	+Advanced	+TIE	+TIE	+TIE
Beta	3	7	Special	+Shuttle			
Delta	4	4-7	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor
Gamma	8	7	Strike	+Advanced	+TIE	+TIE	+TIE

General setup

The board is not set up fresh for this mission. Instead, it is taken over from mission 1. Emplacements and mines destroyed in mission 1 remain destroyed in this mission. Damage for emplacements and minefields is taken over.

The Jump zone

The Jump zone is in range 2 from the left board edge.

„Pallas" setup

The „Pallas" is set up with its aft bordering the dock. If this would make her overlap a minefield, immediately resolve the damage and then remove the minefield. The „Pallas" has only 6 hull and 0 shields, plus 1 additional shield per player above 1 (value, not current points, so she doesn't have damage cards). It has zero energy. It has no upgrades or weapons and cannot perform any actions.

„Pallas" energy

The „Pallas'" engine is damaged. At the end of every round, the „Pallas" loses one energy. If this causes the "Pallas" to drop to zero energy, it takes one damage. If the "Pallas" loses energy but is already on zero, it takes two damage.

Player ships

The players all fly standard TIE fighters with their usual pilot level. They start the game **docked** to the „Pallas". Getting shot down or not making the jump infers no penalty – it is assumed that the players will be able to make their escape and rendezvous with the "Pallas" later.

Mines

The mines are hostile to every ship, including the "Pallas".

Turrets

The turrets can't discern between TIE fighters and will fire at the TIE they're closest to. They ignore the „Pallas", the Shuttle, the TIE Advanced and the TIE Interceptor.

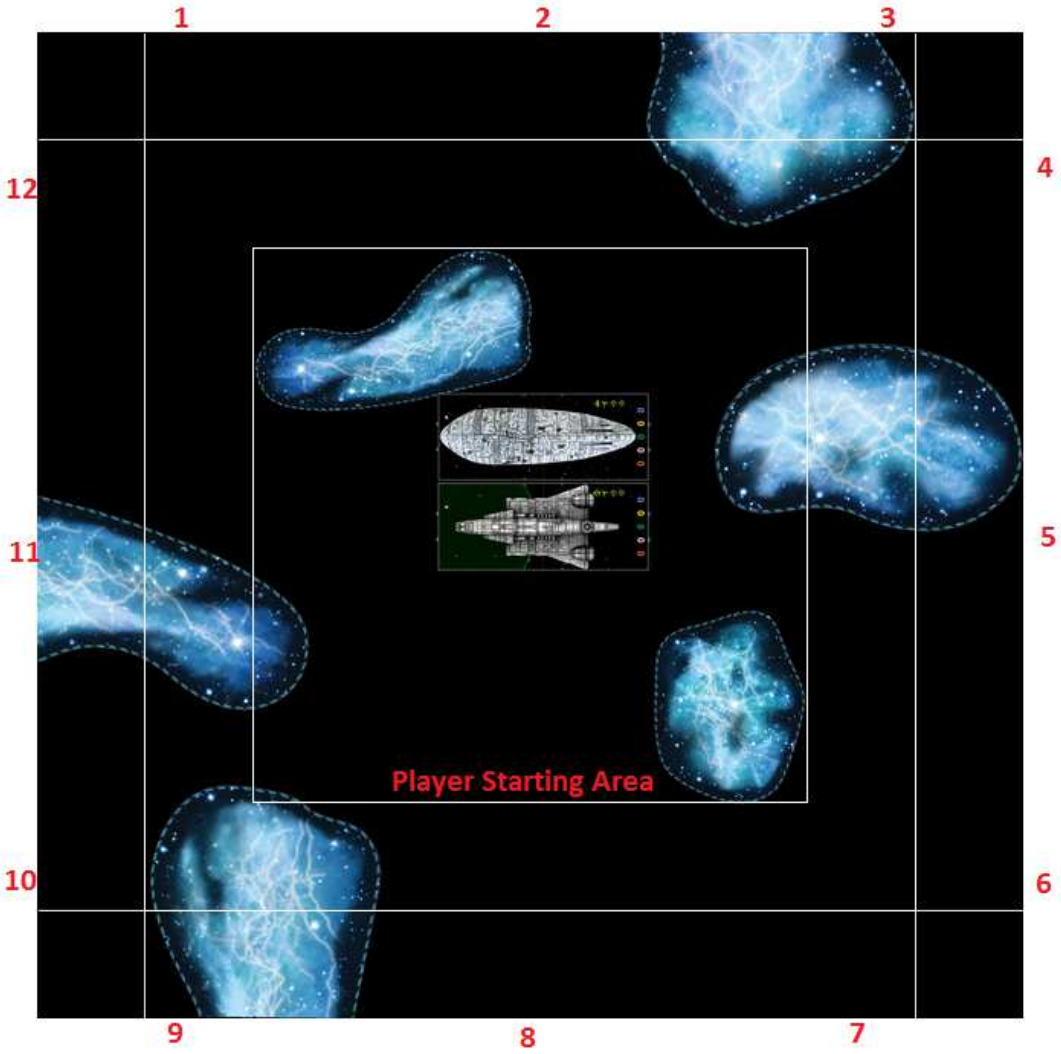

Alpha, Beta and Gamma squadron AI

Alpha and Gamma are tasked with stopping the „Pallas". Alpha's TIE Advanced uses Strike AI, while the TIE use Protect AI for the TIE Advanced. The TIE Advanced has an unlimited supply of Ion Pulse Missiles. If the "Pallas" gets ionized, it only moves one straight this turn. Beta squadron is tasked with retaking the „Pallas" and will only shoot at the player ships, using Strike AI to close to the „Pallas" as fast as possible (always use the highest possible number of the chosen bearing). Once in range 1, the Shuttle will only use the 1-maneuver of every possible bearing. If the Shuttle's ever overlaps the „Pallas", it docks and the „Pallas" is boarded and captured, in which case the players lose the scenario. The Shuttle ignores the mines for maneuver selection. All ships that are not TIE Advanced ignore the "Pallas" for target selection and do not fire, since the Imperials want to reclaim the ship.

Mission 4: Meeting („Pallas", 3x3)

Commander Abel, a lean woman in her late 40s, has taken over command of the „Pallas". She was among the captives you rescued. "This ship isn't much more than a heap of scrap metal. Lucky for us, the distress call went through, and we're about to rendezvous with a transporter. It will take the injured captives and bring some new ships for you pilots. For now, though, we need to keep this heap afloat without weapons or repair tools, unfortunately, so let's gear up."

NEUTRAL TERRITORY – 10 TURNS

Mission Objectives:

Primary	1) After seven turns, the transfer of goods is completed. At the beginning of turn eight, the Carrier jumps away. 2) The Carrier must not be destroyed.
Bonus	If the Carrier lost no hull, gain **3XP**.
Bonus	If the „Pallas" and all players jump away before the end of turn 8 and after the Carrier's jump, gain **2XP**.

Rebel Victory: *"It was a close call, but we made it. We have ammo, we have food, and we have our ships. Now it's time that we repaired the damn carrier."* **Proceed to Mission 5.**	**Imperial Victory:** *"The Imperials destroyed our supplies! We need to arrange another meeting asap!"* **Lose 3XP per player. Repeat the mission.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	D12	Attack	+TIE	Upgrade to Interceptor	+TIE	Upgrade to Interceptor
Beta	Setup	D12	Attack	+TIE	Upgrade to Interceptor	+TIE	Upgrade to Interceptor
Gamma	2	D12	Strike	+Bomber		+Bomber	
Delta	4	D12	Attack	+TIE	Upgrade to Elite	+TIE	Upgrade to Elite
Epsilon	6	D12	Strike	+Bomber		+Bomber	

Carrier/"Pallas"

Both ships are immobile in this scenario. The Carrier is not under the control of the players and cannot perform any actions. The „Pallas" has only 6 hull and 0 shields, plus 1 additional shield per player above 1 (value, not current points, so she doesn't have damage cards). It has zero energy and no weapons. The „Pallas" can perform actions and gains two energy per round, of which it loses one at the end of each round (because the reactor is still damaged). Remember that the ship needs energy to jump. The Carrier has its generic values and gains +1 shield per player.

Strike AI

The AI is ignoring the „Pallas". The Imperials are still hoping to recapture it; instead, Strike AI focuses on the Carrier. If the Carrier is destroyed, Strike AI reverts to Flee AI.

AI swerving

It is easy for the AI to get "hung up" on the two Huge Ships because the chosen template doesn't lead out of their bases. Since they would accumulate damage in that way, keep choosing templates with the intended bearing until you find one that leads them out, first by going up in numbers (*e.g. 2-bank to 3-bank*), then by changing the bearing (*e.g. from 3-bank to 3-turn*). If no possible bearing avoids a collision, the AI ship suffers the collision.

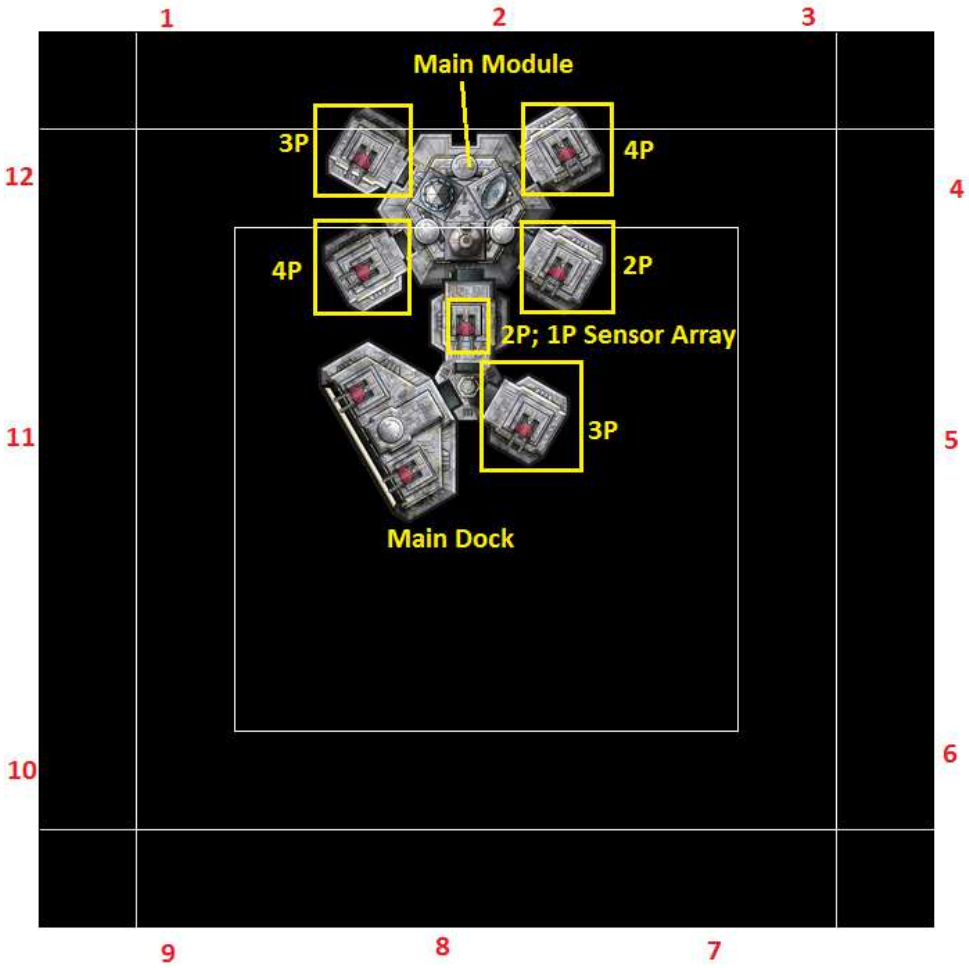

Player setup

The players may setup their ships anywhere in the square Player Starting Area. The players set up their ships after the Imperials. The players regain any rebel ships they owned in mission 2, which they had a chance to upgrade after mission 3.

Mission 5: Arms race (no „Pallas", 3x3)

Commander Abel is showing you intel of a small station. "Listen up. Command has sent us intel about a small imperial station in the area that we might take over and scuttle for armaments. Unfortunately, those armaments are pretty hot, and we need to disable the damn station first. Sergeant Kabowski will fly a U-Wing in this mission, trying to ram into the main dock and drop a squad of commandos on their unsuspecting asses. It is important that you screen their advance and keep any…surprises…off their backs. The seargeant also asked me to warn you that if he misses the initial approach, the tight time limit and limited maneuverability of the U-Wing will make another approach a difficult proposition, so you guys need to aim tight."

HOSTILE TERRITORY – 15 TURNS

Mission Objectives:

Primary	1) The Blue Squadron Pathfinder needs to dock with the station at the Main Dock. Remove the ship from play. 2) After that, the commandos will proceed to the Main Module and disable it. 3) When the Main Module is disabled, the Turbolasers revert to friendly. The territory reverts to neutral territory. 4) All players and the U-Wing need to jump away to end the mission.
Bonus	For every emplacement that gets destroyed, lose **1XP**.
Bonus	For every emplacement that is not destroyed at the end of the game, gain **1XP**.

Rebel Victory: *"There are some really strong turbolasers here that we can install on the „Pallas". Very well done."* **Proceed to Mission 6.**	**Imperial Victory:** *"We failed, and now they're on our scent!"* **Lose 3XP per player. Proceed to Special Mission 1: "„Pallas" Attack" with the current values. Then repeat this mission.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	1	Attack	+TIE	+TIE	+TIE	+TIE
Beta	Setup	3	Attack	+TIE	+TIE	+TIE	+TIE
Gamma	6	1	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor
Delta	8	D12	Attack	+TIE	Upgrade to Advanced	+TIE	Upgrade to Advanced

Player Setup

The players set up their ships in range 2 of vector 7.

Blue Squadron Pathfinder

Players gain XP from ships damaged or destroyed by the Blue Squadron Pathfinder. They control his ship until it docks with the Main Dock, at which point it is removed from play, and when it takes off again (see below). All damage suffered is kept. The U-Wing gains the Sergeant Kabowski upgrade card for this mission.

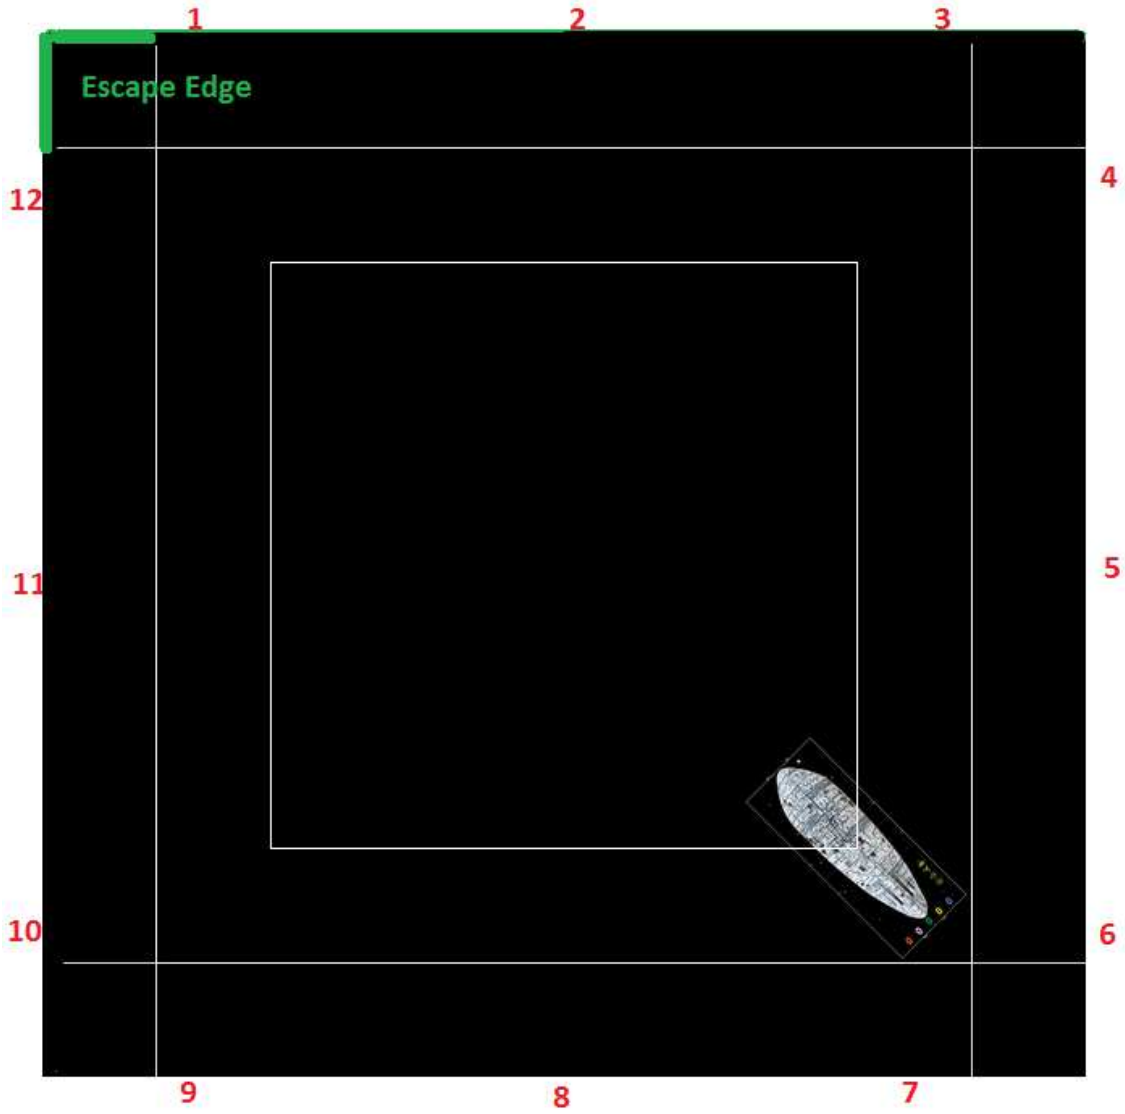

Moving the Commandos and disabling the Main Module.

At the beginning of each turn, roll three dice. If the total number of hits is equal or higher than the number of emplacements on that station tile, move forward one station tile (skip the triangular one). Otherwise, they destroy one emplacement. When the Commandos succeed their movement roll in the Main Module, they disable it. At the beginning of the following turn, they're back in the Main Dock and can take off with the U-Wing.

Mission 6: Resources („Pallas", 3x3)

When you enter the CIC, Commander Abel greets you with the smile of a raptor. "Hunting time. Command has sent us intel about an Imperial transporter en route *delivering spare parts and tools for the repair of Morraj. We're going to kill two TIE with one blast and intercept the stuff for our own ends while depriving the prison of its goods. You will need some Ion armaments for this mission, so plan accordingly."*

NEUTRAL TERRITORY – 10 TURNS

Mission Objectives:

Primary	1) Ionize the transporter and dock the „Pallas" to capture it. 2) The transporter must not be destroyed or leave the mission area.
Bonus	If the transporter did not lose any hull during the boarding, gain **2XP**.
Bonus	If the Shuttle is ionized and captured as well, gain one free Crew upgrade for the „Pallas". You may gain the "Captured Rebel Officer". This upgrade can only be equipped by the "Pallas".

Rebel Victory: *"Now we have everything we need to repair and outfit the ship. Good work, people!"* **Proceed to Mission 7.**	**Imperial Victory:** *"We failed, and now they're on our scent!"* **See "Mission Fail" on the next page. Proceed to Mission 7.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	Special	Special	+Interceptor	+Interceptor	+Interceptor	+Interceptor
Beta	2	2	Escort	+TIE	Upgrade to Advanced	+TIE	Upgrade to Advanced
Gamma	2	2	Attack	+Shuttle	+2 Shield	+2 Shield	+2 Shield
Delta	6	Special	Strike	+Random		+Random	

Player setup

Set the „Pallas" up in any vector of 9, 10 or 11. The players may start the game docked. The „Pallas" has full hull and shields. It has zero energy. The „Pallas" can perform actions and gains energy per its maneuvers each round, of which it loses one at the end of each round (because the reactor is still damaged). If there is no energy left to lose, the "Pallas" instead suffers two damage.

Transporter AI

The transporter is flying with a straight bearing at its top possible speed. If it is ionized (treat as a Small Ship for this purpose), it will bank one randomly to the left or right and adjust its bearing with its next action if necessary to be able to fly straight to the escape edge. Whenever any part of the transporter's base overlaps the edge, it jumped away to safety.

Mission Fail

If the players fail this mission, they need to repair the „Pallas" manually. For this, they need to collectively pay 1XP for every hull, shield and energy of the „Pallas" as it is at the end of the mission to gain the "„Pallas" Repair" effect below. This expenditure of XP is mandatory. If needed, the players accrue negative XP for this.

„Pallas" repair

After this mission, and for every following mission unless otherwise stated, the „Pallas" recovers all hull, shields and energy between missions.

Alpha AI and setup

Alpha Squad is set up in distance 1 in front and to left and right to transporter. It tries to protect the transporter and will swerve to stay within three range of it if necessary. This swerving allows even for K-Turns or 90° turns. Remember that the Interceptors can boost to stay out of the transporter's flight path.

Boarding

When the transporter or Shuttle are ionized, the „Pallas" may dock with it to board it. To dock, any part of the chosen speed of the maneuver tool needs to overlap the target ship. The „Pallas" is then immediately put adjacent and parallel along the width of the base to the target ship (in the same manner as docking with a dock; see the FAQ at the end of this document for reference). Both ships are immobilized for the remainder of the round and cannot take any actions. At the beginning of each subsequent round, the commandos are trying to taking over the target ship. Roll 3 dice against 3 evade. If the commandos role more hits than are cancelled by enemy evades, they take over the ship, which is reverting to player control immediately. If they do not, the target ship loses one hull. Repeat in every subsequent round until you succeed.

Ion Armaments

For this mission only, every player may equip an Ion weapon compatible with their chosen ship for free.

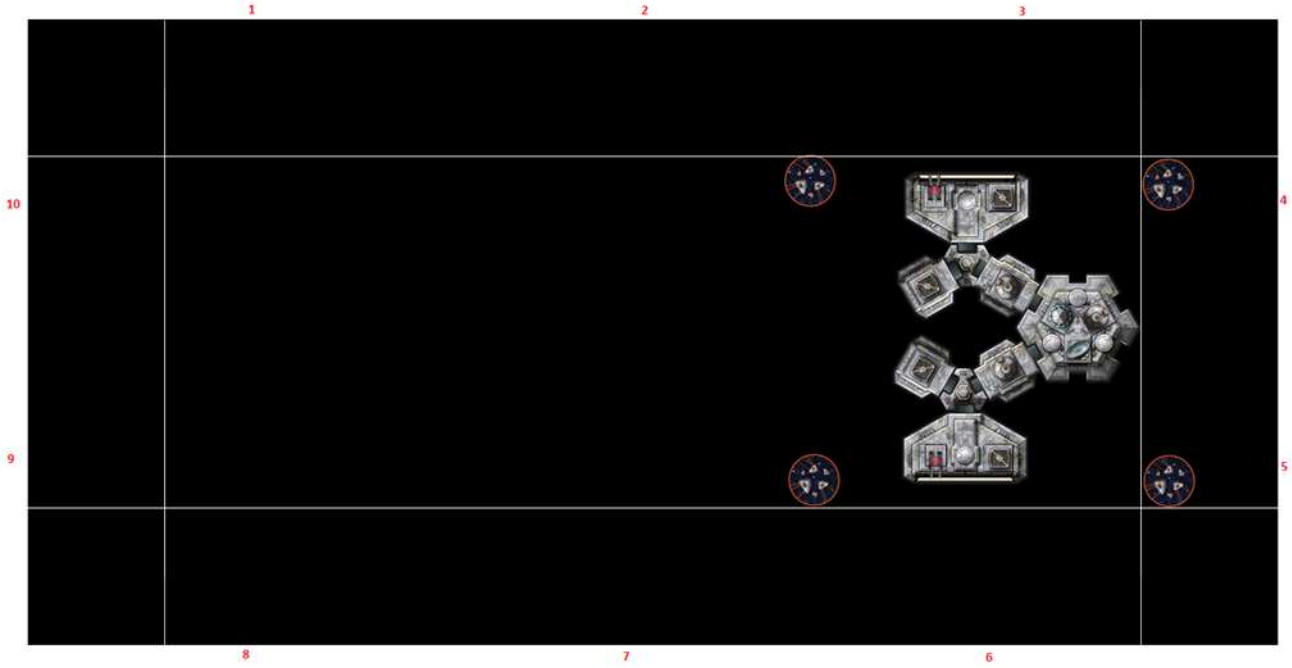

Mission win

To win the mission, all ships need to jump away from the mission area.

Mission 7: Babysitters („Pallas", 6x3)

You have never seen Abel that relaxed before. Now that the ship is fully operational, it seems to you that she's at peace with herself. She waves you over. "Central has a new mission for us. Looks like an easy one. There's a station on the fringe of the sector that so far is operating independently, but that has taken a special dislike to the deal-altering habits of the Empire and would like to join the cause. The Alliance has determined that we'll send them some supplies. It's our job to babysit the Carrier on its uneventful flight to…" An officer barges into the room, whispering some words in her ear. She visibly becomes tense. "Forget it. The Empire got wind of the affair and is determined to stop us. This is getting much hotter than anticipated."

NEUTRAL TERRITORY – NO TURN LIMIT

Mission Objectives:

Primary	1) The Carrier needs to survive. 2) The Station needs to survive.
Bonus	If the Carrier did not lose any hull, gain **2XP**.
Malus	For every emplacement the players lose, lose **1XP**.
Bonus	For every ship that the turrets damage/destroy, gain **1XP/2XP**.

Rebel Victory: *"That was a close call, but they'll not forget us soon."* **Proceed to Mission 8.**	**Imperial Victory:** *"This is really bad. What could have been an ally is now lost, and the Empire has strengthened its grip on the area."* **Every player loses 6XP. Proceed to Mission 8.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	1 or 8	Attack	+TIE	+TIE	+TIE	+TIE
Beta	Setup	7-8	Strike	+Advanced		+Advanced	
Gamma	Setup	Beta's vector	Escort		+TIE		+TIE
Delta	Setup	2 or 7	Strike	+Bomber		+Bomber	
Epsilon	Setup	Delta's vector	Escort	+TIE	Upgrade to Interceptor	+TIE	Upgrade to Interceptor
Zeta	Special	4 or 5	Attack	+Random ship	Upgrade to Elite	+Random ship	Upgrade to Elite

Rebel setup

The Rebels set up adjacent to the edge in any vector 9 or 10. The Carrier needs to be set up parallel to the Gozanti, with two maneuver tool widths space between them. Player ships may also set up in vector 1 or 2. The Rebels may place two additional minefields no closer than Range 1 to any emplacement and other minefield.

Minefields

The minefields are hostile only to the Imperial player.

Carrier

The Carrier will always execute the same maneuver as the Gozanti. Bear in mind that its Pilot Level of 4 may mean that the Gozanti must move before it. If the Carrier is in arc of any enemy with Strike AI, it performs a Reinforce Action on the section closest to the enemy. If not, it performs a Recover Action to regain lost shields. If it's at full shields, it coordinates the closest Rebel ship, including the Gozanti. The Carrier needs to dock with one of the two docks; to do that, it needs to overlap it with any part of its base. When docked, the Carrier will not perform any actions.

Station

The Station is under attack by enemy forces. If it is crippled, it will be taken over and the players lose the mission. The station is crippled when all its emplacements are destroyed. The AI prioritizes the emplacements in the following order if it must choose between targets: Shield Generator, Fuel Tanks, Turrets, Sensor Array, Cargo. Fuel Tanks deal one damage to all emplacements on their tile and adjacent tiles instead if their normal destruction effect.

Supplying the station and winning the mission

The Carrier needs six rounds to transfer its supplies to the station. Beginning with the round after docking, at the start of each round, place one token on the Carrier. On the round following its activation, it jumps away. The Carrier can be attacked during this time. In this moment, all enemy ships revert to Flee AI. The mission is won when there is no enemy ship left on the board.

Enemy spawn and AI

TIE Advanced from Beta Squad that are destroyed are respawned at the end of the next round. If there is a total of less than (number of players+1) enemy ships without Strike AI on the board, they are accompanied by a TIE fighter. Beta has Strike AI on the Carrier.

TIE Bombers from Delta Squad that have used up their ordnance revert to Flee AI. In the round after they left the board, respawn them in their vector. If there is a total of less than (number of players+1) enemy ships without Strike AI on the board, they are accompanied by a TIE fighter. Delta has Strike AI on the emplacements.

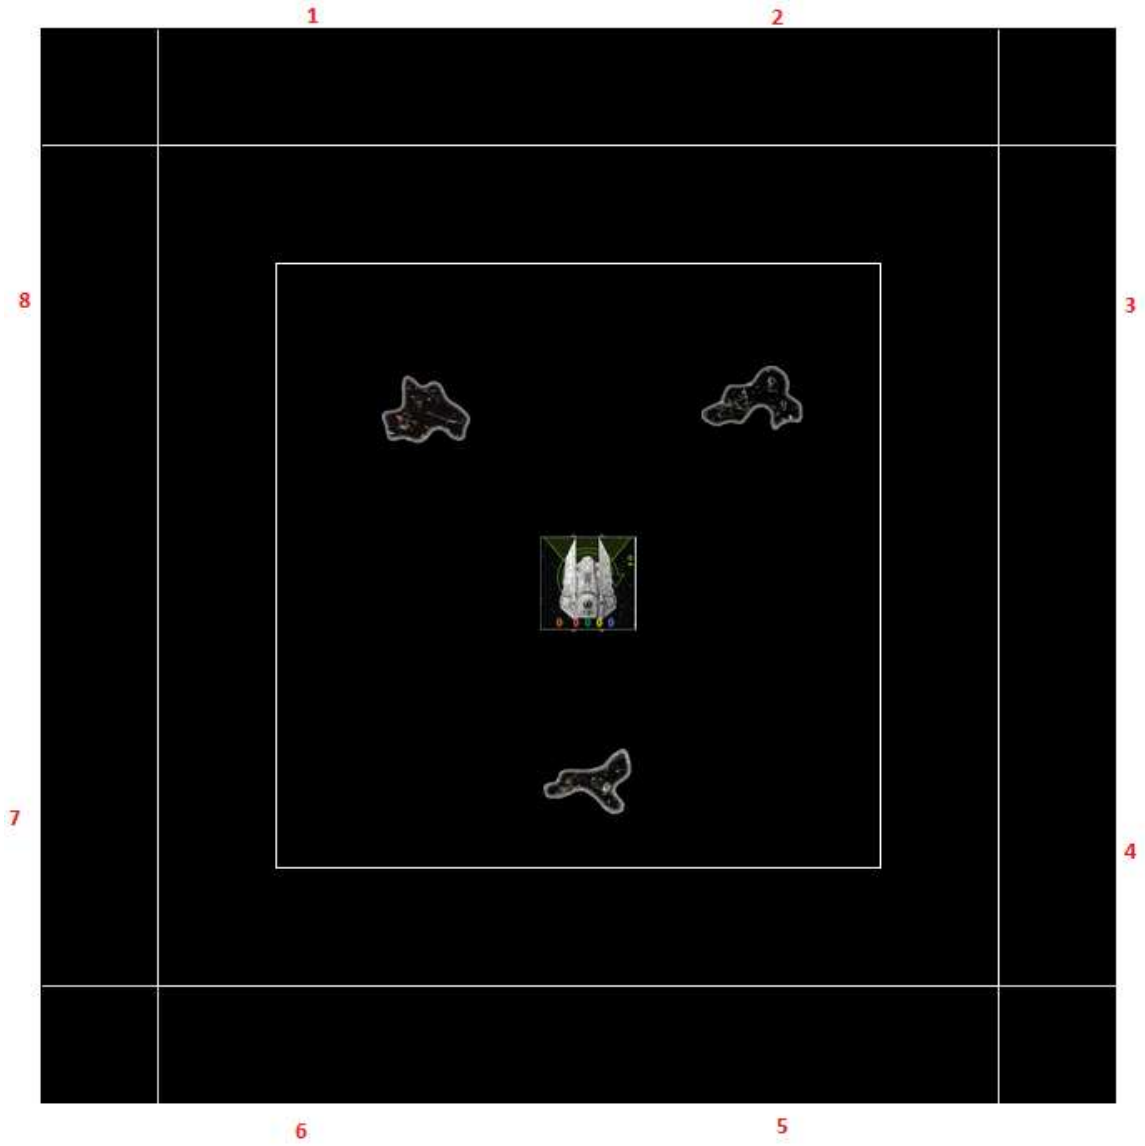

Gamma escorts the TIE Advanced, Epsilon escorts the TIE Bombers.

Zeta spawns in the round following the one in which the Carrier docked to the Station.

Mission 8: Assassination games (no „Pallas", 3x3)

Abel is showing off the grin of the huntress. She looks dangerous. "I received word from Central about a Major Fisk roaming about and trying to cow more neutrals into compliance with the Empire. The man is infamous for ripping apart Rebel ships and whatever else he can point his guns at. If we could take him out, that would be a huge blow to the Empire's prestige and might help boost morale around here. You will jump at the coordinates we have and take the bastard out." As you jump at the coordinates, you can already see the debris of his latest victims floating around.

NEUTRAL TERRITORY – 8 ROUNDS

Mission Objectives:

Primary	Destroy the Decimator.
Bonus	If no Rebel ship lost any hull, gain **2XP**.
Bonus	If the Decimator accrues more than four critical hits, gain **1XP**.

Rebel Victory: *"That bastard has reached the end of the line. People will rejoice to hear this war criminal is dead now."* **Proceed to Mission 9.**	**Imperial Victory:** *"The idea was to gain a boost for morale, not to spread tales of our ineptitude and to bolster that bastard's reputation even more."* **Every player loses 2XP. Proceed to Mission 9.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	Special	Attack	+Decimator	Upgrade to Elite	+TIE	Upgrade to Interceptor

Rebel setup

Rebel players may setup in any vector.

Imperial setup

Place the Decimator as close to the middle as you can. Place all TIE in formation alongside it (basically treat the Decimator as if it was the its own spawning vector at the edge of the game board), spread evenly left and right. Major Fisk is an Elite Decimator. It gains two additional elite levels.

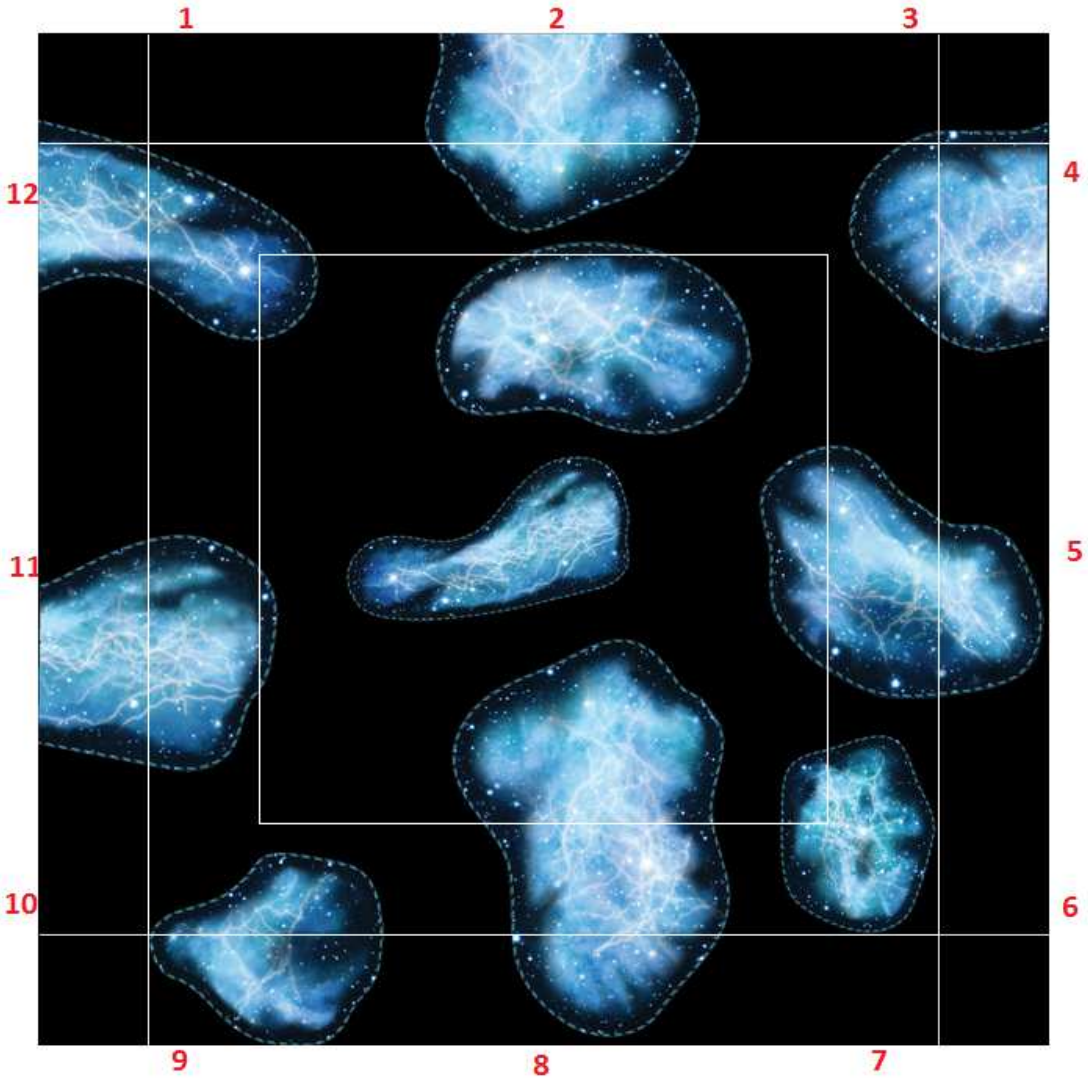

Territory

When Major Fisk is killed, the territory reverts to Friendly Territory.

Mission 9: Traitor Hunt (no „Pallas”, 3x3)

Alarm sirens blare. “Attention! All pilots! Emergency launch!” As your fighters decouple from the Carrier, Abel’s voice is in your earpieces. “Seems like the Imperials paid well enough for Lieutenant Ferengo to consider the offer. He took one of our spare fighters and tries to make contact with the Empire. You need to pursue him and stop him at all costs! Bring him alive if you can, but do not hesitate to shoot.”

NEUTRAL TERRITORY – 7 TURNS

Mission Objectives:

Primary	Kill or capture the Traitor.
Bonus	If the Traitor never chooses a maneuver according to Flee AI, gain **2XP**.
Bonus	If you capture the Traitor, gain **3XP**.

Rebel Victory: *“That should teach others a lesson. We cannot allow anyone to compromise our mission here. Unity is everything.”* **Proceed to Mission 10.**	**Imperial Victory:** *“We failed, and now they’re on our scent!”* **Proceed to Special Mission 1 “„Pallas” attack”. Take over any damage, shield or energy loss you suffered. After, proceed to mission 10.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	D12	Special	+X-Wing	+2 Shield	+2 Shield	+2 Shield

Player and traitor setup

Players may start at any vector, but need to deploy before the traitor. The traitor doesn't start closer than 3 distance to any rebel ship; reroll if necessary.

Traitor AI

The Traitor's PS is 3. Use Attack AI in the beginning, treating the ion cloud nearest to the currently opposing edge as your target. The traitor will not swerve to escape clouds. Whenever there is Line of Sight unbroken by clouds to any rebel ship in range 3 or when any rebel ship is in range 2 or closer (check after each maneuver), the traitor instantly reverts to Flee AI, trying to reach the nearest edge. In this case, he'll jump away. You can find the X-Wing AI at the end of this document. The Traitor also reverts to Flee AI whenever he receives damage.

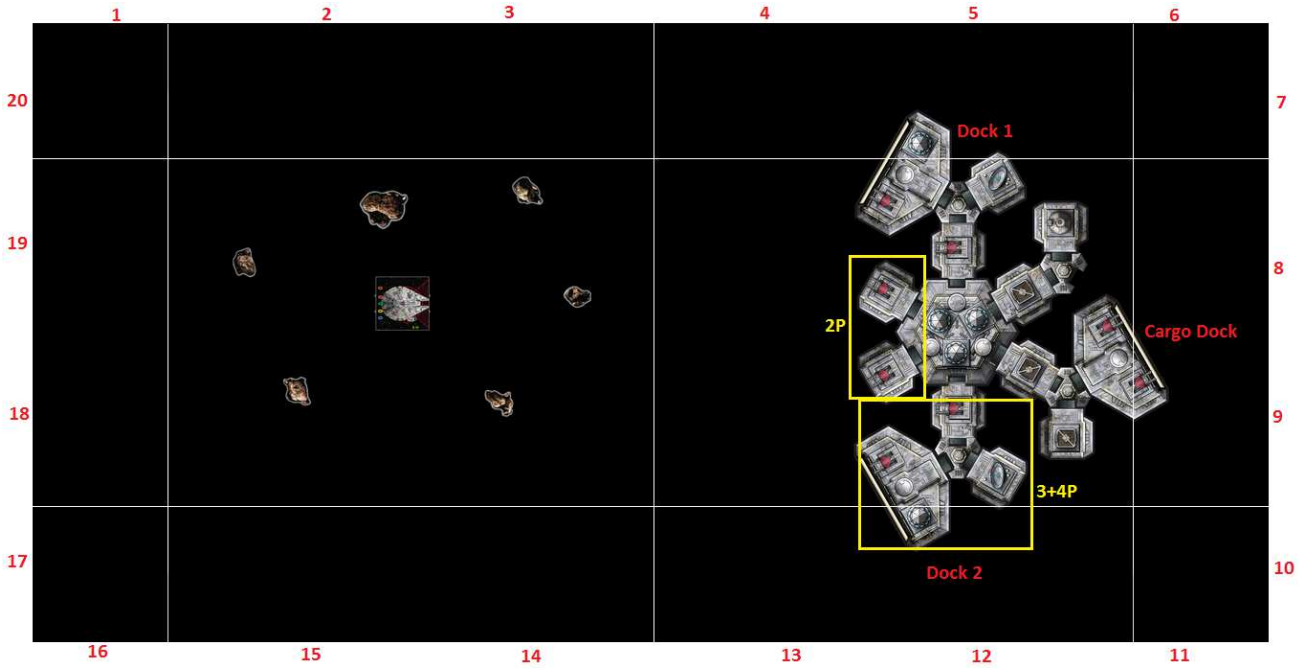

Capturing the traitor

If the traitor is shot down, replace his ship with a bomb token to represent his life pod. The territory reverts to Friendly Territory. To collect it, a rebel ship must overlap the token using a green 1- or 2-maneuver.

Mission 10: Attack on the mining station („Pallas”, 6x3)

“It’s time.” Abel is leaning heavily on her table. “Command has detailed information about an Imperial mining operation in the area. It’s heavily guarded, but if we take it out, it will be a major blow to the Empire. The mining operations are directly connected to an automated fighter production facility. This a good news, bad news situation. Good news is that we get to take that down, too. Bad news is that they will be able to launch quite a lot of reinforcements. Use the space to your advantage, draw back if necessary and fight this out.”

HOSTILE TERRITORY – NO TURN LIMIT

Mission Objectives:

Primary	Destroy the Station.
Bonus	If the YT-1300 is destroyed, gain **3XP**.
Bonus	For every emplacement or module destroyed by the „Pallas”, gain **1XP**.

Rebel Victory: *“We did it! This is a serious blow for the Empire and its aspirations in this sector. Now, let’s get the hell out of here and grab a drink or two!”* **Proceed to Season 2.**	**Imperial Victory:** *A plaque in the Rebel Base commemorates the brave heroes who died in the attack to this day.* **Imperials win.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	2	Dock 1	Attack	+TIE	+TIE	+TIE	+TIE
Beta	Setup	Special	Flee	YT-1300	+1 Shield	+1 Shield	+1 Shield
Gamma	Special	Dock 1/2	Attack	*(see below)*			
Delta	Special	8	Strike	+Bomber	Upgrade to Elite	+Bomber	Upgrade to Elite
Epsilon	Special	9	Attack	Decimator	Upgrade to Elite	+2 Shields	+2 Shields

Player setup

The players may start docked. All their ships are placed in any vector 17-20.

Asteroid setup:

Place six asteroids in the middle of the left part of the map in distance 2 or more to each other.

YT-1300

The YT-1300 represents a mining craft trying to escape the rebel strike force. It will cease mining at the start of round 2 and try to escape to right edge using Flee AI. Use Outer Rim Smuggler for stats.

Destroying the Station

To destroy the station, its Main Module must be destroyed. To do this, the players need to destroy all shield generators on the Main Module (a total of three) and then destroy it. The Main Module has 10 hull and rolls one defense die. Critical hits count as two hits. When the Main Station is destroyed, all player ships and the "Pallas" need to jump away to end the mission.

Shield Generators

In this scenario, Shield Generators provide two additional shields for all adjacent emplacements as well as connected emplacements, including themselves. This means that in the beginning, all emplacements have eight (1-2 players) or ten (3-4 players) additional shields. They do not provide defense dice.

Destroying the Docks

It is advisable to destroy Dock 1 and Dock 2 as well. To do this, the single Shield Generator protecting it must be destroyed. The docks have 8 hull. Critical hits count as two hits. When the Dock(s) is/are destroyed, the Imperials will receive Delta and Epsilon squadrons two turns later.

Imperial Reinforcements (Gamma Squadron)

As long as the docks are active, the Imperials will launch new fighters from them. At the beginning of every turn, throw a dice for each dock. Then, check how many Imperial ships are currently on the table (not counting ships still docked in the Docks). Refer to the table below which ship to spawn.

	0	1	2	3	4	5	6
1 Player	Auto-Spawn	Hit or Crit	Hit or Crit	No Spawn	No Spawn	No Spawn	No Spawn
2 Players	Auto-Spawn	Hit, Crit, Focus	Hit or Crit	Hit or Crit	No Spawn	No Spawn	No Spawn
3 Players	Auto-Spawn	Hit, Crit, Focus	Hit, Crit, Focus	Hit or Crit	Hit or Crit	No Spawn	No Spawn
4 Players	Auto-Spawn	Auto-Spawn	Hit, Crit, Focus	Hit, Crit, Focus	Hit or Crit	Hit or Crit	No Spawn

(*Example: Three players, one Imperial ship on the board. Each dock will spawn at a Focus or Blank result, or put differently, with a 50/50 chance.*)

Then, refer to this table to see which ship type is spawned (roll d20), for each ship individually:

1-14	TIE	15-16	Advanced	17	Interceptor	18	Bomber	19	Phantom	20	Defender

Whenever two ships are spawned in a dock, they take off in that turn. The first ship spawned is Squad Leader. The ships remain in Squad until the formation breaks or the squadmate cannot perform the maneuver of the Squad Leader. Bombers start with Strike AI on the „Pallas", all other ships with Attack AI.

It is a time of jubilance for the rebels aboard the „PALLAS" carrier. After having destroyed the Imperial mining operations, they are on their way back to the small REBEL BASE.

However, the Empire has not been idle. Under the command of the evil ADMIRAL ZERAK, reinforcements have arrived in the Aturi Cluster.

While the Imperial forces are searching for the rebel base, the „PALLAS" needs to take a route through the most inhospitable sectors of the Aturi Cluster to avoid patrols…

Special rules for Season 2:

Pilot Skill is limited to a maximum of six for Season 2.

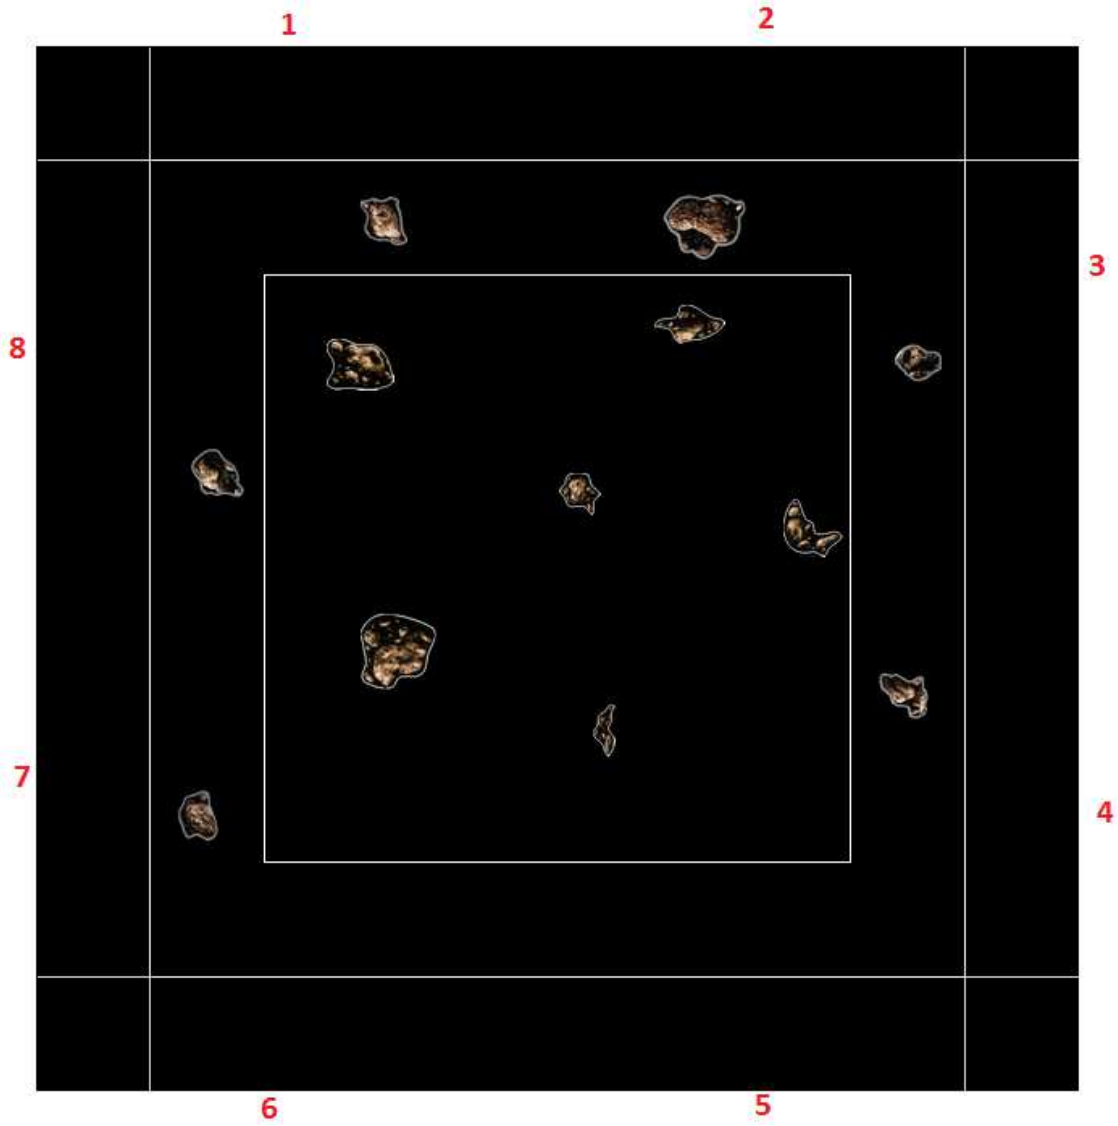

Draw cards for TIE and TIE/fo as well.

Enemy Turbolaser Turrets are considered to always have a Focus token when rolling attacks.

Mission 1: Minesweepers (no „Pallas", 3x3)

Commander Abel is calling you into CIC. "If we want to escape the Imperials, we need to take some detours. This one leads us straight through an asteroid field. Unfortunately, the Imperials are already there and try to lay some mines. You need to destroy the mines and as many asteroids as possible to clear our advance."

FRIENDLY TERRITORY – 10 TURNS

Mission Objectives:

Primary	Destroy all enemy ships.
Bonus	If the Lambda Shuttle is destroyed, gain **2XP**.
Bonus	If an asteroid is destroyed by an attack, the player gains **1XP**.
Bonus	If Delta never spawns, gain **1XP.**

Rebel Victory: *"We avoided the trap the Imperials laid out for us, but the asteroid field is still ahead. Brace yourselves."* **Proceed to Mission 2.**	**Imperial Victory:** *"We were hit! Seems like we didn't clear up all mines after all."* **Proceed to Mission 2. The „Pallas" will start with half hull and shield points.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	5-6	Attack	+TIE	+TIE	+TIE	+TIE
Beta	Setup	5-6	Attack	+TIE	+TIE	+TIE	+TIE
Gamma	3	5-6	Attack	+Shuttle	Upgrade to Elite	+3 Shields	+3 Shields
Delta	6	D8	Attack	+TIE Elite	+TIE Elite	+TIE Elite	+TIE Elite

Player setup

Players may set up in vectors 1 or 2.

Asteroid setup

Distribute 12 asteroids randomly over the map in distance 1 or more to each other.

Mined asteroids

The first time a player gets in Range 1 of an asteroid, roll a die. On a blank, this asteroid explodes. Throw three dice and apply all hits and critical effects in 1 range to the mined asteroid. Remove the asteroid after explosion. Mark asteroids that didn't explode, so you don't check them twice.

Destroying asteroids

The players may destroy asteroids to clear the „Pallas'" path ahead. Asteroids have two hull and one agility.

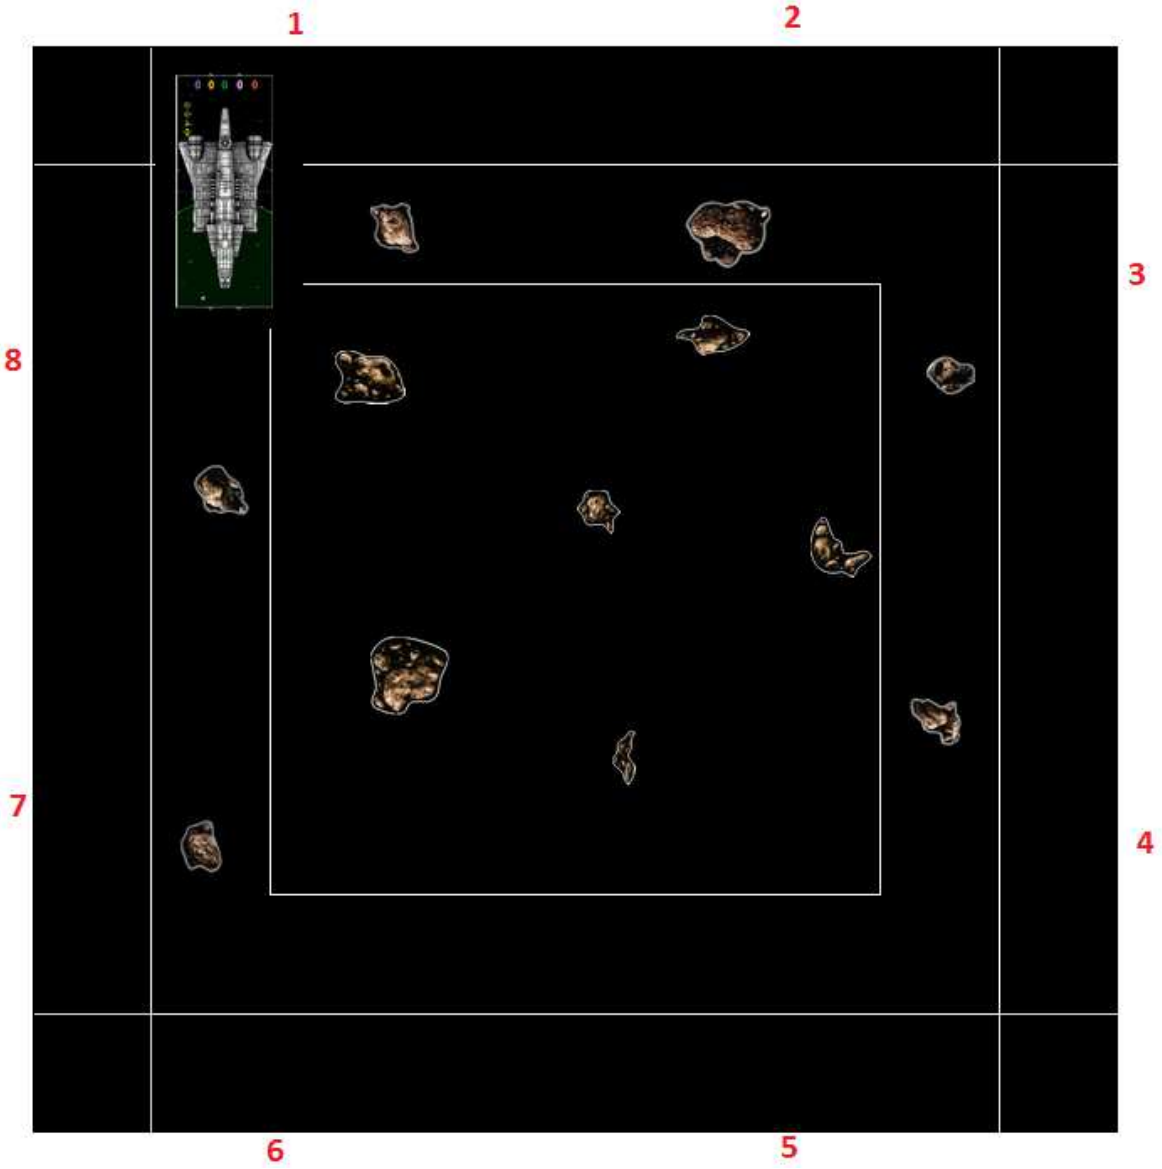

Gamma AI

When all ships save the Shuttle are destroyed, this unit reverts to Flee AI. If this happens before Delta spawned, Delta will never spawn.

Mission 2: Icebreakers („Pallas", 3x3)

"The Imperials are hard on our heels. We need to traverse this field before we can jump into hyperspace and reach our base. You need to escort the ship."

HOSTILE TERRITORY – 8 TURNS

Mission Objectives:

Primary	Leave the mission area through vectors 5 or 6.
Bonus	If the Decimator is destroyed, gain **2XP**.
Bonus	If no player ship ever overlapped an obstacle, gain **2XP**.

Rebel Victory:	**Imperial Victory:**
"We're through! But we just received a distress call from the base. Seems we didn't get it earlier because of the asteroid's interference. We need to make haste!" **Proceed to Mission 3.**	*"We were hit pretty badly. This isn't boding well."* **Proceed to Mission 3. Check the "Failed Mission 2" part there.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	7	Attack	+TIE	+TIE	+TIE	+TIE
Beta	Setup	4	Attack	+Advanced	Upgrade to Defender	+Advanced	Upgrade to Defender
Gamma	3	4	Strike	+Decimator	+TIE	+Bomber	+Bomber

Player setup

Players may set up in vectors 1 or 2. The „Pallas" sets up in vector 1.

Asteroid setup

Distribute 12 asteroids randomly over the map in distance 1 or more to each other.

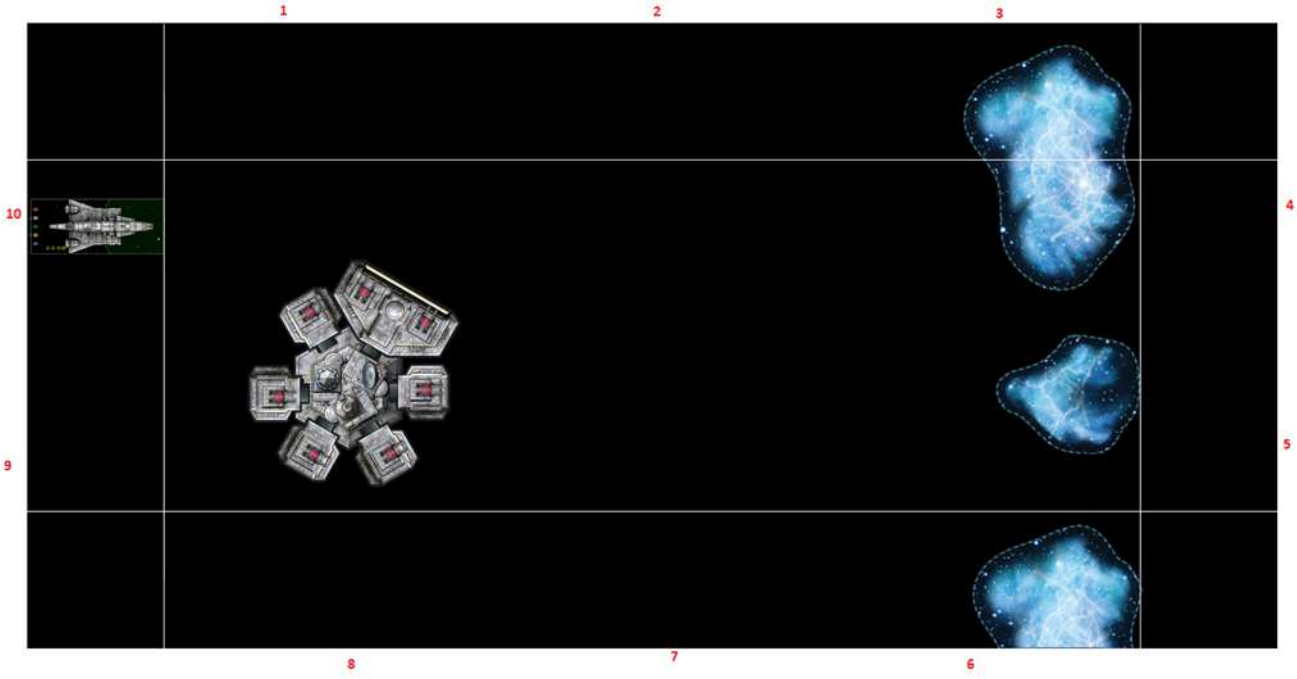

Destroying asteroids

The players may destroy asteroids to clear the „Pallas'" path ahead. Asteroids have two hull and one agility.

Mission 3: The longest day („Pallas", 6x3)

You receive a message from the base: "We need help! A Star Destroyer came out of hyperspace! The nebula prevents it from engaging directly, but enemy fighters and bombers are inbound! We need help, now! We cannot hold!" Commander Abel looks grim. "This is Zerak's work. Favorite tactic of his. There's no way we can hold the base against this onslaught. We need to evacuate everyone still alive."

FRIENDLY TERRITORY – NO TURN LIMIT

Mission Objectives:

Primary	1) Evacuate the Station 2) Flee the battlefield
Bonus	If a turret destroys an enemy ship, gain **1XP**.
Bonus	At the beginning of any round after the first, when there are no TIE Bombers outside the Ion Clouds, gain **3XP**. Can be scored only once.

Rebel Victory:	**Imperial Victory:**
"We rescued most people, but now we're alone in the Cluster, without a chance for reinforcements. We need to be really careful from now on." **Proceed to Mission 4.**	*"We couldn't rescue them all. They're dead."* **Lose 1XP per token remaining on the Main Module per player. Proceed to Mission 4.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	Special	Strike	+Bomber		+Bomber	
Beta	2	Special	Strike		+Bomber		+Bomber
Gamma	Setup	Special	Strike	+Bomber		+Bomber	
Delta	2	Special	Strike		+Bomber		+Bomber
Epsilon	Setup	Special	Attack	+TIE		+TIE	
Zeta	2	Special	Attack		+TIE		+TIE
Eta	Setup	4-5	Attack	+Shuttle	Upgrade to Elite	Upgrade to Decimator	Upgrade to Elite

Player setup

The players set up in vector 10.

Station setup

Players control the turrets. The Turrets on the dock are Single Turbolaser Turrets (Range 3-5, 4 Firepower, double target agility, revert one blank to hit).

Strike AI

Ships with Strike AI will attack targets with this priority: Shield Generator, Main Module, Turrets, „Pallas".

Main Module

The Main Module can be attacked as soon as the Shield Generator has been destroyed. It has 10 hull points and one Agility. Critical hits count as two hits. When the Main Module is destroyed before the evacuation is complete, the players lose the mission.

Alpha/Beta, Gamma/Delta and Epsilon/Zeta starting area

Alpha/Beta and Gamma/Delta squad start in the clouds next to vectors 3 and 6, respectively. Epsilon/Zeta starts in the middle cloud.

TIE Bomber Ordnance

Do not draw a card for the TIE Bombers. Instead, each TIE Bomber carries two Proton Torpedoes.

TIE Bomber AI and Imperial Reinforcements

TIE Bombers use their ordnance against their targets and then revert to Flee AI. The round after they left the board, or whenever any TIE Bomber is destroyed, spawn a new TIE Bomber and TIE Fighter into their respective squads, using the setup spawn point as described above. If a Large Ship is destroyed, spawn a new one in its setup location.

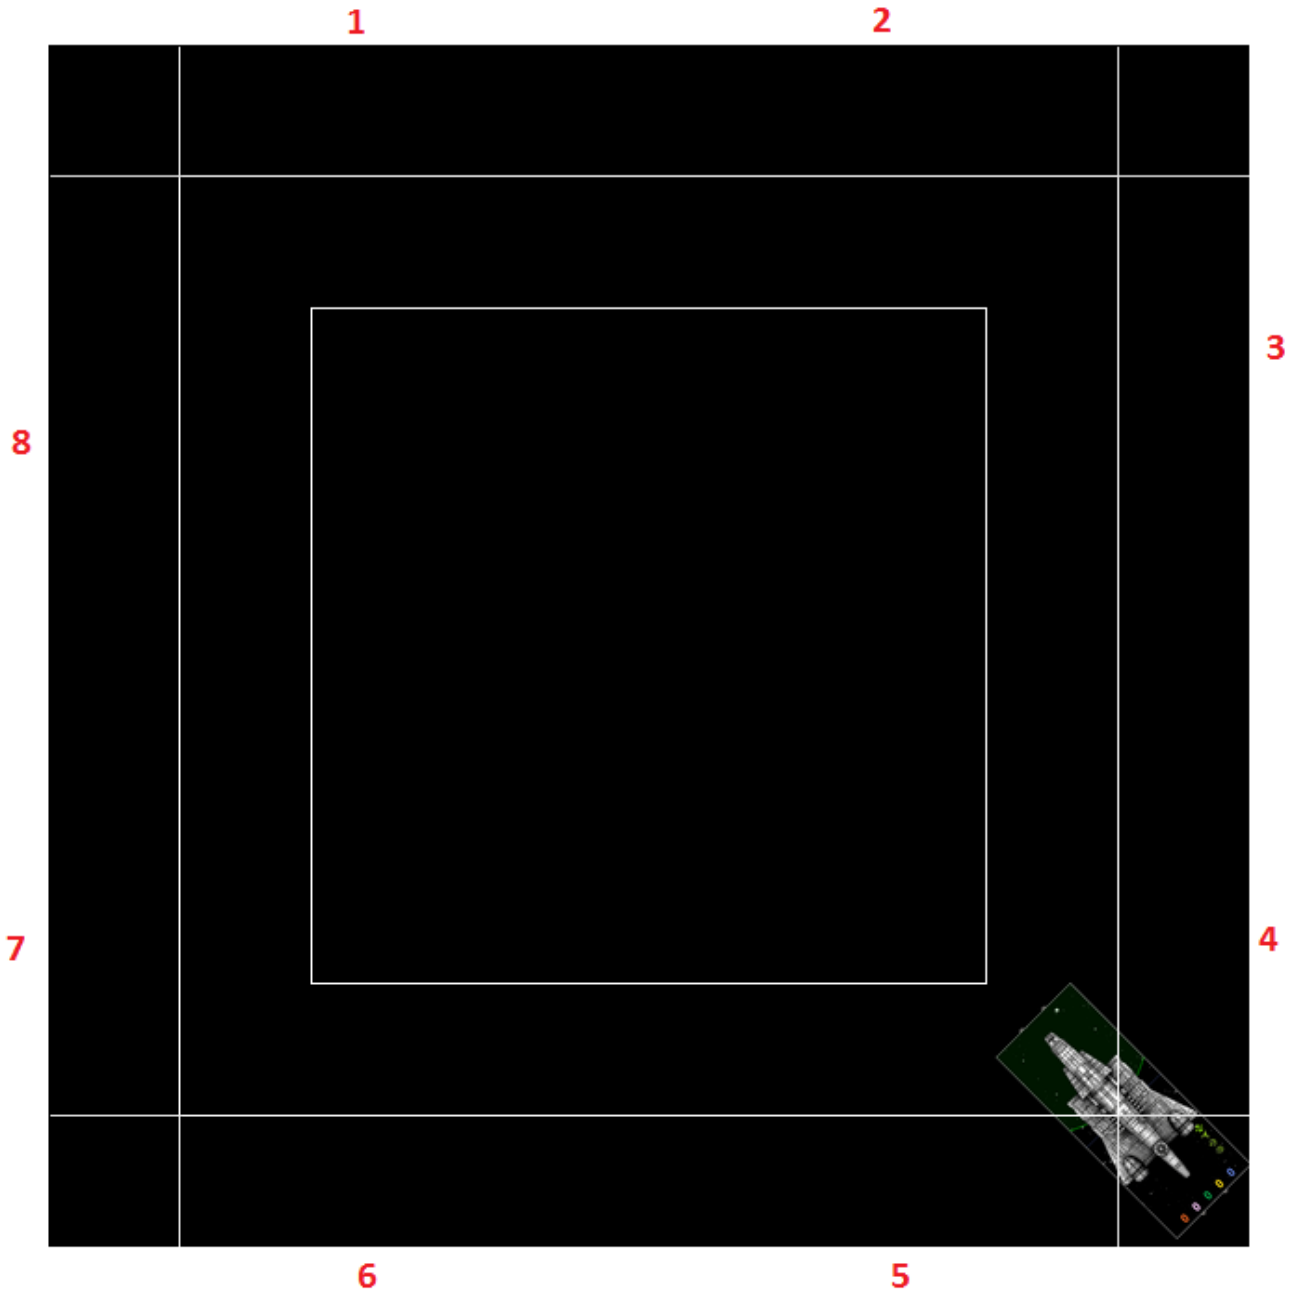

Evacuation

To evacuate the station crew, the „Pallas" needs to dock with the main dock. To do this, the „Pallas'" maneuver tool needs to overlap the dock "entrance" with the part of its chosen speed. When the „Pallas" docks, place it alongside the dock as evenly as possible. The „Pallas" is now immobile (+3 energy per round), but can still take actions and attack. Place ten critical hit tokens on top of the dock. At the beginning of every round, starting the one after the docking is complete, remove one token. When all tokens are removed, the evacuation is complete. The mission ends when all rebel ships have left the board.

Mission 4: Buccaneers (no „Pallas”, 3x3)

One can see the effect of days without enough sleep on Abel's face. "If we ever want to return the favor and conquer us a base, we need to surprise them. I want you to take Sergeant Kabowski to capture an Imperial transmitter so we can pose as one of their ships. To be convincing, we need one from an enemy Gozanti, so this should evoke some memories."

HOSTILE TERRITORY – 12 TURNS

Mission Objectives:

Primary	Board the enemy Gozanti.
Bonus	If the U-Wing doesn't lose more than 1 shield, gain **2XP**.
Bonus	If the Gozanti doesn't lose any hull to attacks other than Ion attacks, gain **2XP**.

Rebel Victory: *"Now we have the unique opportunity to spring a deadly trap on the Imperials. Let's get to work."* **Proceed to Mission 5.**	**Imperial Victory:** *"That went badly. Let's hope we can find another one."* **Lose 7XP per player. Repeat the mission.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	Special	Attack	+TIE	+TIE	+TIE	+TIE
Beta	Setup	4-5	Protect	+Interceptor	+Interceptor	+Interceptor	+Interceptor
Gamma	6	Special	Attack	+Phantom	Upgrade to Elite	+Phantom	Upgrade to Elite

Player setup

Players may set up in any vector 1, 2 or 8.

Alpha setup

Alpha squad is docked to the Gozanti. In any round in which the players come in range 2 of the Gozanzi, the Gozanti gains a free action to unlock the squadron in its upcoming activation phase. Alpha Squadron takes off from the section of the Gozanti closest to the offending player.

Gamma setup

Gamma squadron launches in the vector closest to the players.

U-Wing

The U-Wing is a Blue Squadron Pathfinder and carries an unlimited supply of Ion Torpedoes and Sergeant Kabowski.

Boarding the Gozanti

When the Gozanti has zero shields, it may be ionized. Whenever the maneuver tool of the Blue Squadron Pathfinder overlaps the ionized Gozanti, it gets boarded. Place the Blue Squadron Pathfinder adjacent to the Gozanti. It is not ignored by the AI, but will move along with the Gozanti (and thus cannot be attacked by the Gozanti itself). Each subsequent round, throw three red dice and three green dice. If you achieve one or more uncancelled hit or critical results, the Gozanti is boarded. In the following round, you regain control over the Blue Squadron Pathfinder.

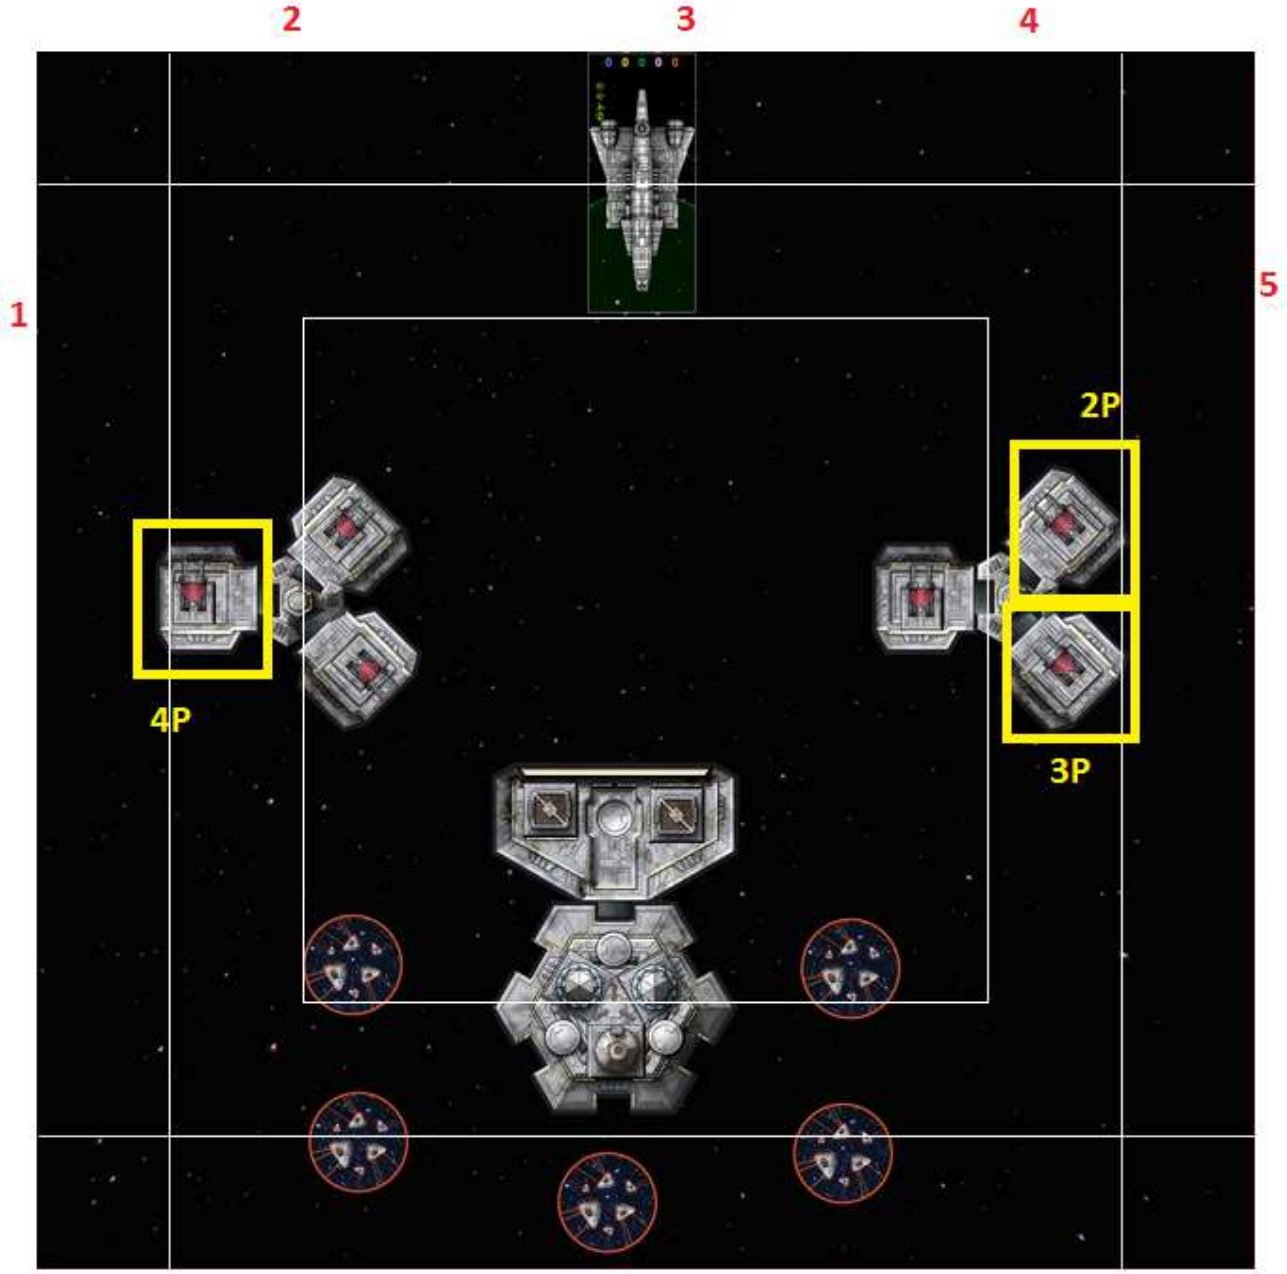

Gozanti upgrades and AI.

The Gozanti has equipped Tibana Gas Supplies, Dual Laser Turrets, Docking Clamps, Agent Kallus. Agent Kallus chooses the first player's ship. Tibana Gas Supplies are used when Energy is at 1 or lower. Energy is assigned to the Dual Laster Turrets, if able. The Gozanti always reinforces the section closest to the players' ships. The Imperial fighters will try the best possible maneuver to get to the side of the Gozanti where the player ships are. The Gozanti always chooses the 3-straight-maneuver. When it's ionized, it will fly 1-straight on its next turn.

Mission 5: Back to the shack („Pallas", 3x3)

"We have the transmitter, now we have to install it. This refit station is sufficiently far out. It will take them a while to get behind what exactly we did, especially if we don't leave any witnesses. Prepare to engage!"

HOSTILE TERRITORY – 12 TURNS

Mission Objectives:

Primary	1) Dock to the station. 2) Flee with the refit done.
Bonus	If a turret shoots down an enemy ship, gain **1XP**.
Bonus	If an enemy ship is destroyed by Mines, gain **2XP**.

Rebel Victory: *"Work's done, people. Now it's time to hit them where it hurts. Who wants themselves a new base?"* **Proceed to Mission 6.**	**Imperial Victory:** *"That went badly. Let's hope we can find another one."* **Lose 7XP per player. Repeat the mission.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	Special	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor
Beta	4	1	Attack	+Advanced	Upgrade to Elite	+Advanced	Upgrade to Elite
Gamma	5	5	Attack	+Advanced	Upgrade to Elite	+Advanced	Upgrade to Elite
Delta	6	3	Strike	+Bomber	+1 Shield	+Bomber	+1 Shield

Player setup

Players may set up their ships in any vector 1-5.

Alpha Squadron setup

Alpha squadron starts docked to the Dock and will undock in its first turn.

Docking with the „Pallas"

The „Pallas" docks by overlapping the Dock entrance with its maneuver tool with the part of its chosen speed. When the „Pallas" docks, place it alongside the dock as evenly as possible. The „Pallas" is now immobile (+3 energy per round), but can still take actions and attack. Place three tokens on the Dock. At the beginning of each subsequent turn, remove one. When all tokens are removed, the „Pallas" may undock (its aft adjacent to the Dock) and flee through any vector 1-5. After all Rebel ships left the board, the mission ends.

Turrets and minefields

Both start under Imperial control. When the „Pallas" docked, the turrets are under player control. The Minefields switch to hostile for both sides. When the „Pallas" undocks, the turrets revert to Imperial control.

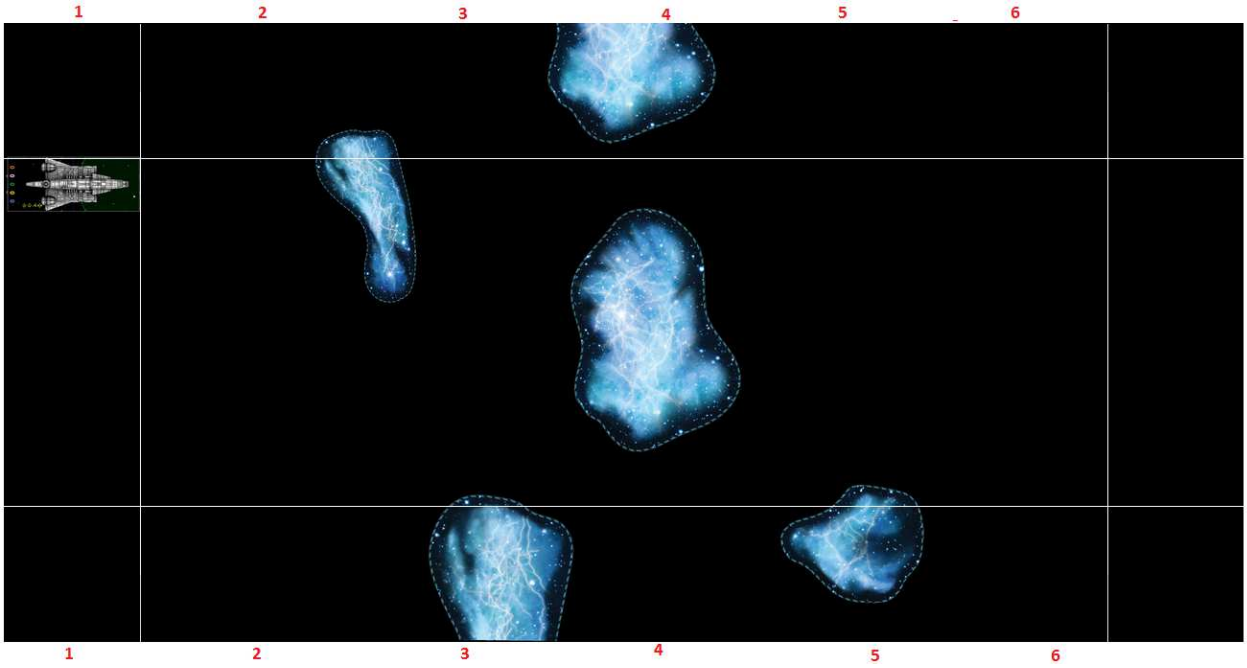

Jumping

Jumping is not possible in this mission.

Mission 6: The Fugitives („Pallas", 6x3)

"We have what we wanted", Commander Abel is telling you as you are impatiently waiting for your ships to be rearmed. "But the Imperials want it back. In this Ion storm ahead, jumping's nigh impossible, so we need to get past it first. You need to protect the ship until we're ready to jump."

HOSTILE TERRITORY – 15 TURNS

Objectives:

Primary	Leave the map through the sectors 4 or 5.
Bonus	When the „Pallas" never overlaps an Ion Storm, gain **2XP**.
Bonus	When the „Pallas" doesn't lose any hull, gain **2XP**.

Rebel Victory: *"We're out! Now let's take an Imperial base. They'll never know what hit them."* **Proceed to Mission 7.**	**Imperial Victory:** *"They're all over us! Prepare for battle!"* **Lose 4XP per player. Proceed to Special Mission 1. Then proceed to Mission 7.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	1/4/7	Special	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor
Beta	1/4/7	Special	Strike	+Bomber	+Bomber	+Bomber	+Bomber
Gamma	3/6/9	Special	Attack	+Defender	Upgrade to Elite	+Defender	Upgrade to Elite
Delta	8/11	Special	Attack	+TIE	+TIE	+TIE	+TIE
Epsilon	9/12	Special	Attack	+Interceptor	Upgrade to Elite	+Interceptor	Upgrade to Elite

Player setup

The „Pallas" sets up in vector 10. The player may deploy docked or at any point in range 1 of the „Pallas".

Ion Clouds

Whenever any part of a ship overlaps an Ion cloud, it cannot select a maneuver higher than "2". AI does not try to swerve.

Jumping

Jumping is not possible in this mission.

Imperial spawning

These squadrons spawn always on the side of the map father away from the „Pallas". Their spawn vector is determined by the „Pallas'" advance: when the „Pallas" has passed into the latitude of vector 2, enemies spawn in vector 1, and so on.

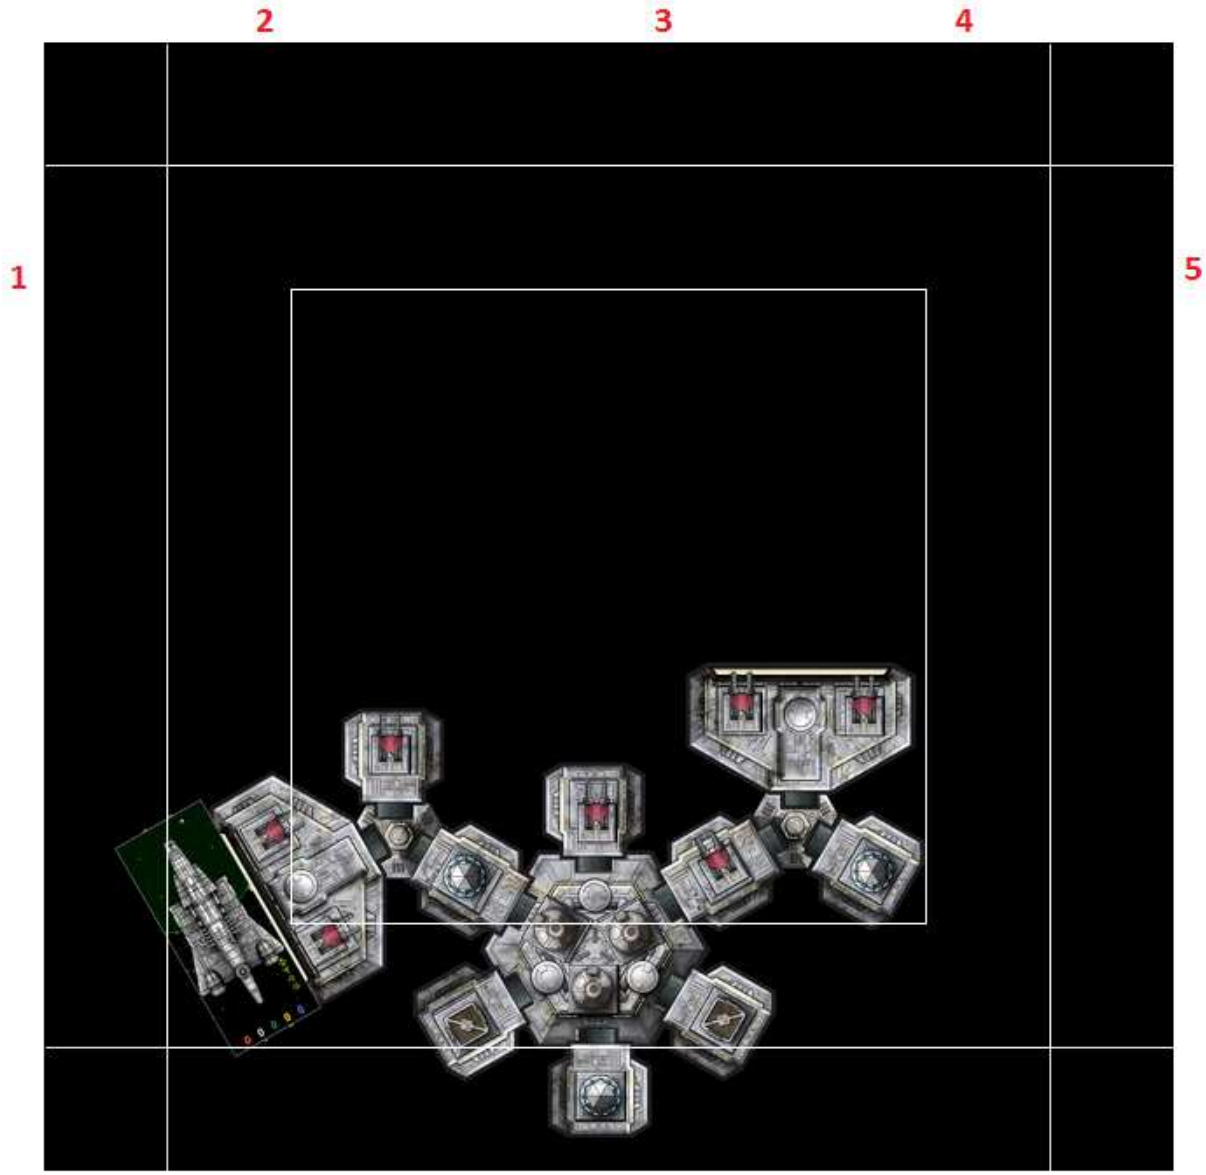

Imperial AI

Bombers that spent their ordnance revert to Flee AI.

Mission 7: My Home Is My Castle („Pallas", 3x3)

"With our new transmitter, we will be able to directly fly into the Imperial base. We will take it and hold it against the inevitable counter-attack." Commander Abel is looking determined. "The Imperials will try to destroy the base, I'd recon. Your job is to protect it as best you can. Saving the „Pallas" from a few repairs if the base goes to hell is no good bargain."

FRIENDLY TERRITORY – NO TURN LIMIT

Mission Objectives:

Primary	Defend the Station against the waves of enemy fighters.
Bonus	If a turret shoots down an enemy ship, gain **1XP**.
Bonus	If an emplacement, player ship or turret gets destroyed, lose **2XP**.

Rebel Victory: *"We did it! This station is ours. From now on, refueling and rearming is quite a bit easier. Even better, the station contained information about Admiral Zeraks location. We're going to carry the fight to him."* **Proceed to Mission 8.**	**Imperial Victory:** **This Mission cannot be lost.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	1/5/9	1-5	Attack	+Interceptor	+TIE	+Interceptor	+TIE
Beta	2/6/10	1-5	Strike	+Punisher	+Bomber	+Punisher	+Bomber
Gamma	3/7/11	1-5	Attack	+TIE	Upgrade to Interceptor	+TIE	Upgrade to Interceptor
Delta	4/8/12	1-5	Strike	+Decimator	+TIE	+Decimator	+TIE

Player setup

The players start the mission docked to the right dock. The „Pallas" starts the game docked to the left dock, as depicted. It may undock or remain docked and immobile (+3 energy per round, protection from the Shield Generators).

Docking

Players may dock with either the „Pallas" or the right dock. Docking provides them with full shields and replaces any discarded upgraded cards, such as torpedoes. Only the „Pallas" can repair ships. If a player is shot down, they may respawn in a generic TIE/fo in the right dock. They lose 1XP per lost TIE/fo as if they were flying in Z95.

Winning the mission

When the players destroyed (Player number)+1 Decimators, they win the mission. All enemy ships remaining on the board revert to Flee AI.

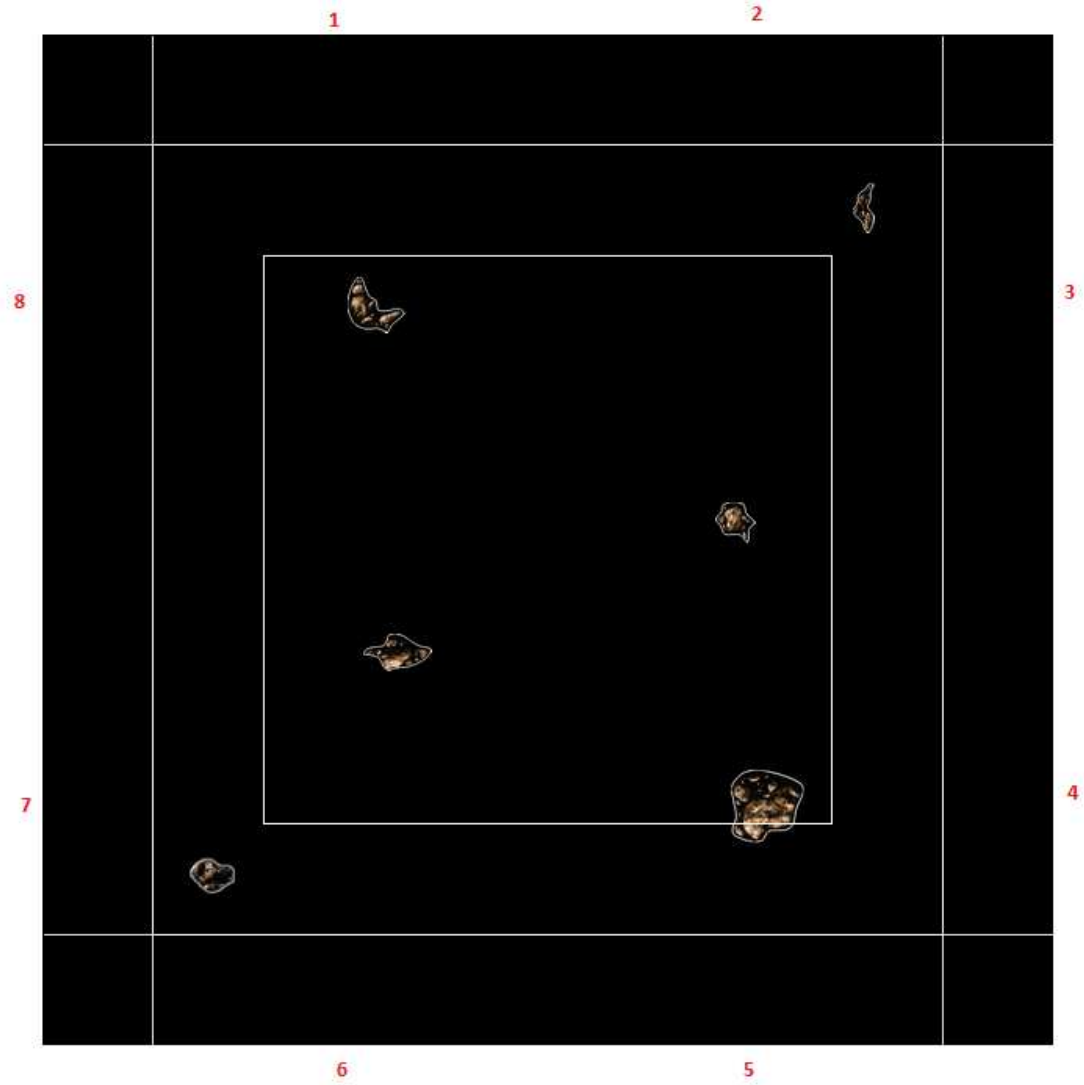

Strike AI

The Strike AI prioritizes the following targets (Decimators also shoot at rebel ships if they're at range 1): Shield Generators, Dock Turbolasers, other Turbolasers, Fuel Tanks, Cargo Containers. TIE Bombers are always armed with two Proton Torpedoes. All Decimators are equipped with Anti Pursuit Lasers.

Mission 8: Reconnaissance duty (no „Pallas", 3x3)

"The Empire is using quite a lot of advanced fighters since Zerak showed up. As you by now doubtlessly experienced, this is posing unique challenges to the Alliance. Central has therefore determined that we need to make something out of this and to gain some intel on the technologies they are using. They also determined that this is your job, so go out there. We need you to get quite a lot of information, so this won't be too easy."

NEUTRAL TERRITORY – NO TURN LIMIT

Mission Objectives:

Primary	Accrue a total of (players*3) scan tokens.
Bonus	If no Rebel ship gets shot down, gain one free Rebel ship of any available type in the hangar.
Bonus	If you destroy all enemy fighters, gain **1XP**.
Bonus	For every scan action performed, the player gains **1XP**.

Rebel Victory: *"I hope Central will be satisfied with the material. I fear we just tweaked the lion by its tail."* **Proceed to Mission 9.**	**Imperial Victory:** *"Great. Not only didn't we get the Intel and Central is pissed at us, but they're also alerted to our scent. Wonder what's next."* **All TIE/fo in Mission 9 and 10 gain an additional shield. Proceed to Mission 9.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	7	Attack	+Defender	Upgrade to Elite	+ Elite Level + 1 Shield	+1 Elite Level +1 Shield
Beta	Setup	4	Attack	+TIE/fo	Upgrade to Elite	+TIE	+TIE
Gamma	7	D8	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor

Rebel setup

The rebels may set up in vectors 1 or 2.

Scanning

When players are in Range 1 of either the TIE Defender or the TIE/fo, they may perform a scan action. When it's not possible to perform a scan action because the TIE Defender and TIE/fo have been destroyed or fled the battlefield, the mission is considered lost.

Alpha and Beta AI

Once (players*2) scans have been performed, the TIE Defender and TIE/fo revert to Flee AI, with the remaining ships of the squadron breaking formation and reverting to Protect AI.

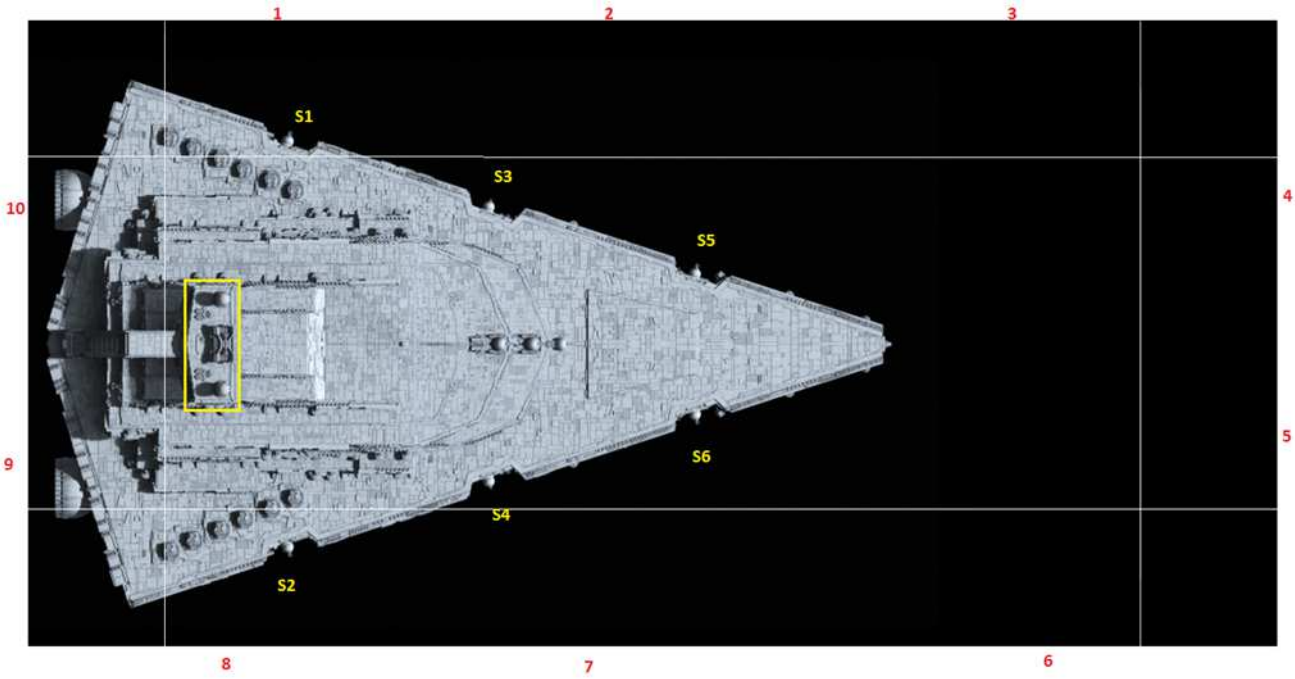

Mission end

The mission ends when all players have left the mission area.

Mission 9: It's a trap! („Pallas", 6x3)

Red warning lights flash everywhere – on the bridge, in the hallways, in the hangar, in the mess hall. You haste onto CIC as quick as you can. You never saw Commander Abel as shaken as she stands now. "Star Destroyer directly ahead. It's an Allegiance class. Seems like they're armed with a Disruptor. Unless they start to allocate energy to their shields, we'll have a serious problem. You need to escort a bomber so it can drop EMP right at the Star Destroyer's bridge so we can plot a jump out of here."

HOSTILE TERRITORY – NO TURN LIMIT

Mission Objectives:

Primary	1) Force the Star Destroyer to switch off the Disruptor. 2) The B-Wing must survive until the bomb is dropped. 3) Jump away.
Bonus	For every scan action performed, the player gains **1XP**.
Bonus	For every destroyed turret, the player gains **1XP**.

Rebel Victory:	**Imperial Victory:**
"This was way too close. The Star Destroyer is now likely en route *to the station. If we don't stop it, everything was for naught."* **Proceed to Mission 10.**	*[Pretend you never started the mission in the first place.]* **Every player loses their most expensive upgrade, including EPT. Retry the mission.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	S3-S4	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor
Beta	Setup	9-10	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor
Gamma	4	S1-S2	Strike	+Bomber	+Bomber	+Bomber	+Bomber
Delta	7	S5-S6	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor
Epsilon	10	9-10	Attack	+TIE +TIE	+TIE +TIE	+TIE +TIE	+TIE +TIE

Player setup

Players may set up their ships in vectors 4 and 5. They mustn't start docked.

Star Destroyer armaments

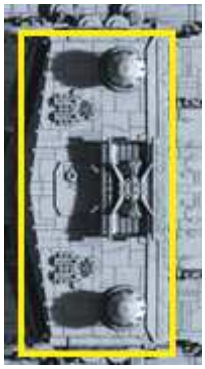

The Star Destroyer is almost invulnerable against fighter attacks. It sports a total of 12 heavy turbolasers, six to either side, and three heavy Ion cannons in the front. They are designed for fighting against other capital ships and will not shoot the player's ships, not even at the "Pallas". Place the HotAC turbolasers on the three broadside ion cannons (the round things on the side) facing forward. They're acting as the ASD's anti-fighter armament. Treat them as if they were protected by [number of players] Shield Generators. Mainly, though, it relies on its fighter squadrons to fend off fighters.

B-Wing AI

Players have an AI controlled B-Wing in this mission. The B-Wing is armed with an Ion Cannon that it uses at range 2-3 and with an EMP bomb to drop on the bridge. It has Strike AI on the bridge and will drop the bomb as soon as the rules allow any bomb marker to overlap the bridge. If the B-Wing is killed before the mission is a success, the players lose. After dropping the bomb, the B-Wing reverts to Flee AI. The B-Wing costs 5XP, which are subtracted from the mission's total, and the players can keep it in their reserves if it survives the mission.

Shield Damage

To force Admiral Zerak to pull energy from the Disruptor, the players need to allow their B-Wing to drop an EMP bomb on the bridge. The bridge section is the "highest" level of the Star Destroyer (see illustration). As soon as this happens, the players can try to perform a jump. The scenario ends victorious for the players when at least one ship jumps out.

Bridge section

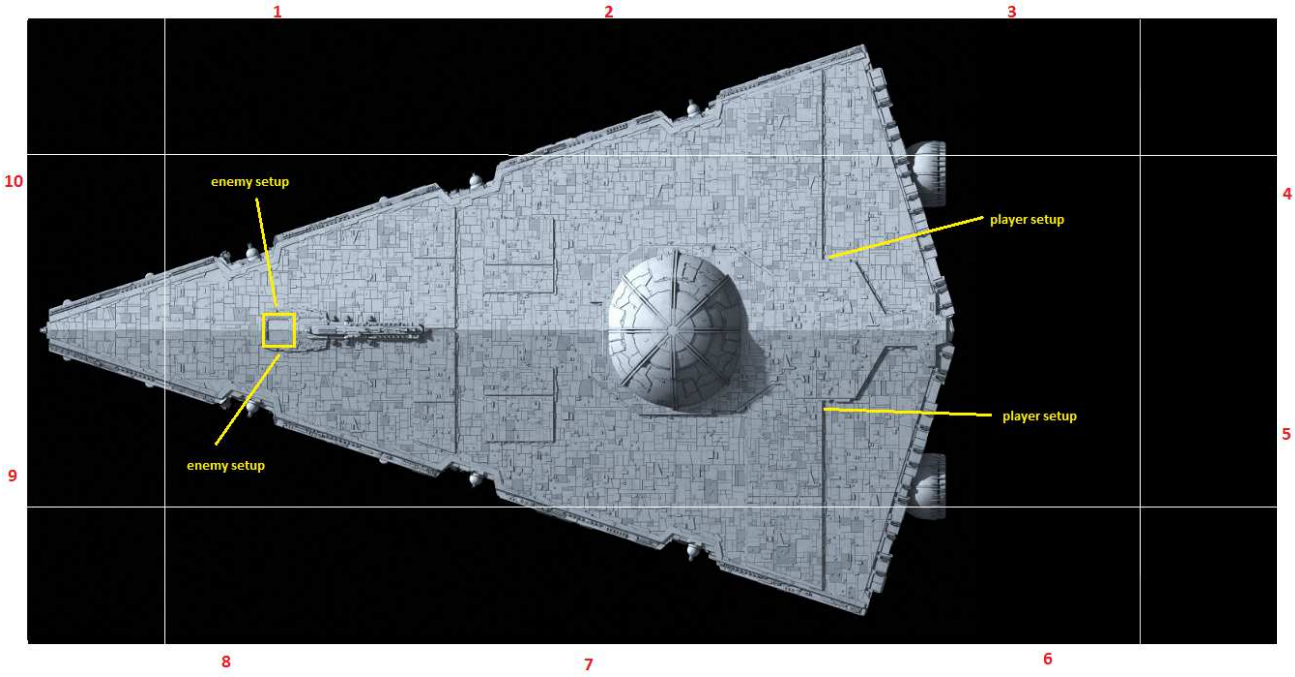

Scanning

Players may perform scans whenever they are in range 1 of the Star Destroyer template as per HotAC rules. Note the total number of successful scans for the next mission.

Mission 10: Time buys lives (no „Pallas", 6x3)

Commander Abel leans heavily on the table projecting a map of the Aturi Cluster. "This is really bad. Really, really bad", she murmurs. It's less than a day before the Star Destroyer can reach your base, and everyone knows it. She straightens, and her mouth tightens. "Can't be helped. We have to evacuate the base right now. HQ is sending us a Carrier, but I don't see how we'll manage in time if we do not delay the enemy's advance. While we assist the evacuation, I need you to perform an almost suicidal task. You'll jump on them as they are preparing for jump themselves, where, per Imperial protocol, the guns are drained of energy for a few minutes to stabilize everything and all fighters are in the hangar. You will then proceed and damage the ASD so that it has to undertake repairs. Then, return asap. Dismissed."

HOSTILE TERRITORY – 10 ROUNDS

Mission Objectives:

Primary	1) Damage the Docking Bay. 2) Jump away.
Bonus	Once per round, when damaging the Docking Bay, gain **1XP**.
Bonus	Every time a player spends a scan token to avoid damage from the ASD, gain **1XP**.

Rebel Victory:	**Imperial Victory:**
"This should have bought us the time needed to evacuate the Aturi Cluster. We'll be back. Count on it." **Proceed to Season 3.**	*A plaque in the rebel headquarters remembers the brave heroes who died here until this day.* **The Imperials win.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	Special	Attack	+TIE	+TIE	+TIE	+TIE
Beta	2	Special	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor
Gamma	4	Special	Attack	+TIE	+TIE	+TIE	+TIE
Delta	6	Special	Attack	+TIE	+TIE	+TIE	+TIE
Epsilon	8	Special	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor

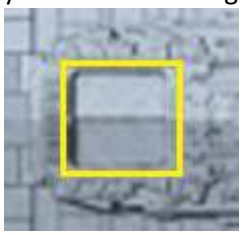

Scans

Divide the total number of scans performed in mission 9 by the number of players (round up). The players gain as many scan tokens. Scan tokens can be used to

- force an enemy fighter to skip its attack this round
- treat the ASD's armaments as it it's round 1-3 (see below)

Player setup and damaging the Docking Bay

Player set up on the vertical line of the Star Destroyer between vectors 2 and 3. The players need to damage the Docking Bay, as it will force the Star Destroyer to repair before jumping. You can identify the Docking Bay by the illustration on the right. The Docking Bay has (players*5) hull (critical hits count as two damage), (players*3) shields and 0 Agility. To damage the Docking Bay, players need to reduce its hull to zero. The Docking Bay can only be attacked in a round in which a fighter spawns.

Docking Bay

Enemy ships

Enemy fighters are taking off the Docking Bay and are placed adjacent to it, so that the Docking Bay acts as the 1-straight template that you usually use to build the box formation. Whenever an enemy ship is shot down, it immediately respawns this way at the beginning of the next round. If it's a round with a regular spawn, just add it to the spawning squad.

Star Destroyer Armaments

Due to the jumping procedures, the armaments are shut down. While the attack is underway, the turrets are powering back up. Traversing the length of the Star Destroyer becomes increasingly difficult as more and more weapons are coming back online. Luckily, the rebel ships will easily be able to stay on the bottom side of the Star Destroyer. Use the following rules whenever the rebel's ships are overlapping the Star Destroyer template. The players can spend a scan token to treat their current round as 1-3.

Round	Effect	Round	Effect
1-3	No effect	7-10	Roll one red die. Suffer any hits or critical hits.
4-6	Roll two red dice against your agility value. Suffer any damage.	11+	Roll two red dice. Suffer any damage.

After only closely escaping the Imperial Star Destroyer of the evil ADMIRAL ZERAK, the rebels are now completely driven out of the Aturi Cluster.

After establishing a base, the evil Admiral now prepares to launch attacks in neighboring rebel sectors. Veteran pilots and prototype starfighters are summoned.

However, things can't stand that way. And so, the daring group of veteran pilots in the „PALLAS" gets the mission to sneak in and prepare a new push to gain a foothold in the Aturi Cluster…

Special rules for Season 3:

Do not get a bonus XP for Standard TIE.

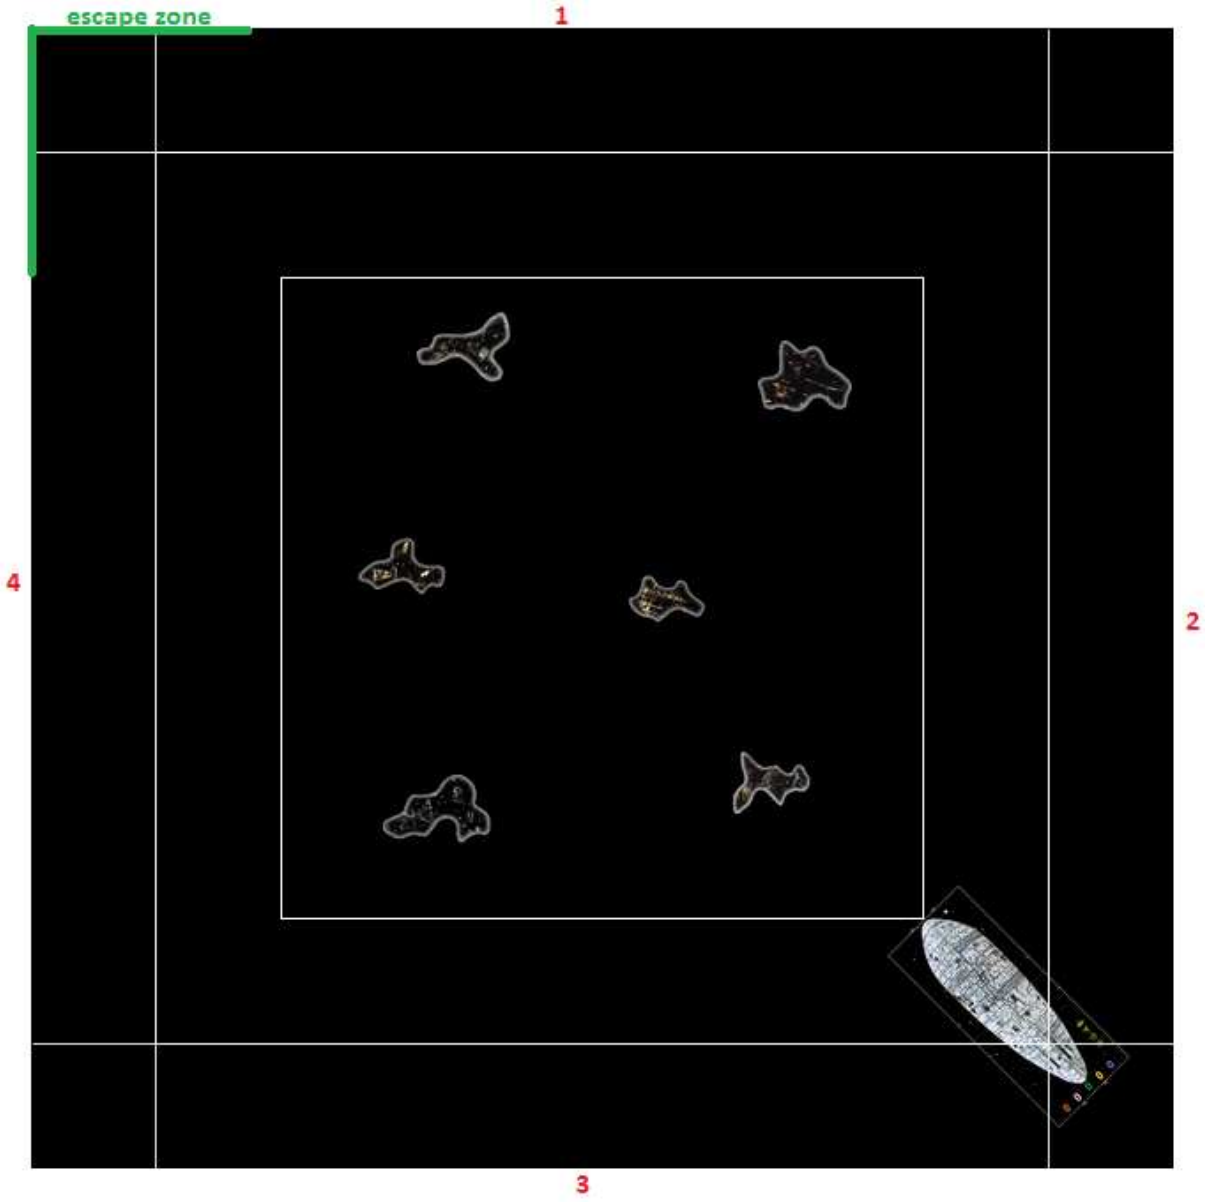

Draw a card for TIE and TIE/fo.

Enemy Turbolaser Turrets are considered to always have a Focus token when rolling attacks.

Mission 1: Trash, Lies and Identification Codes (no „Pallas", 3x3)

Commander Abel calls you to CIC. "Listen up, pilots. Command decided to go back to the Aturi Cluster and to impede Imperial operations there. We're to be the tip of the spear. But if we want to stand even the slightest chance, we'll need current Imperial codes that we didn't already use before. Intelligence has found a small independent operation nearby, salvaging junk. You're to board the junk processor unit and use its codes. It's not much, but it's the best we have until we get close to a real Imperial unit with current codes. For even this crutch to succeed, however, it's imperative that no Imperial fighter escapes."

NEUTRAL TERRITORY – NO TURN LIMIT

Mission Objectives:

Primary	Destroy all enemy craft.
Bonus	If no Rebel player starts at the same edge (opposite edges if possible), gain **2XP**.
Bonus	For every Imperial fighter disabled by an Ion weapon, gain **1XP**.

Rebel Victory: *"Let's hope those identification codes are passing superficial muster."* **Proceed to mission 2.**	**Imperial Victory:** *"Maybe you're not as good as they say after all. Anyway, there's a lot of junk out here. Let's search for more of those ships."* **Lose 7XP. Repeat the mission.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	1	Special	Flee	+TIE/fo	+TIE/fo	+TIE/fo	+TIE/fo
Beta	4	Special	Flee	+TIE/fo	+TIE/fo	+TIE/fo	+TIE/fo
Gamma	8	Special	Flee	+TIE/fo	+TIE/fo	+TIE/fo	+TIE/fo

Rebel Setup:

The players set up their ships in any vector.

Enemy setup

Enemy squads take off from the Processor. They undock as if the transporter was a Gozanti Carrier. The first ships to undock will perform a Barrel Roll to clear the space for the following ships (if need be). The fourth ship will choose a maneuver of a speed one lower than the preceding ship to avoid overlapping. They will always choose a maneuver of maximal speed with the bearing that the AI roll selected.

Junk Processor

The Junk Processor is represented by a Rebel Carrier, is invulnerable (although it can be targeted by attacks) and doesn't move. However, it will try to defend itself by swinging out with its collector arms. Any rebel ship in Range 1-3 of the Processor will be attacked with 2 red dice at the end of the combat phase.

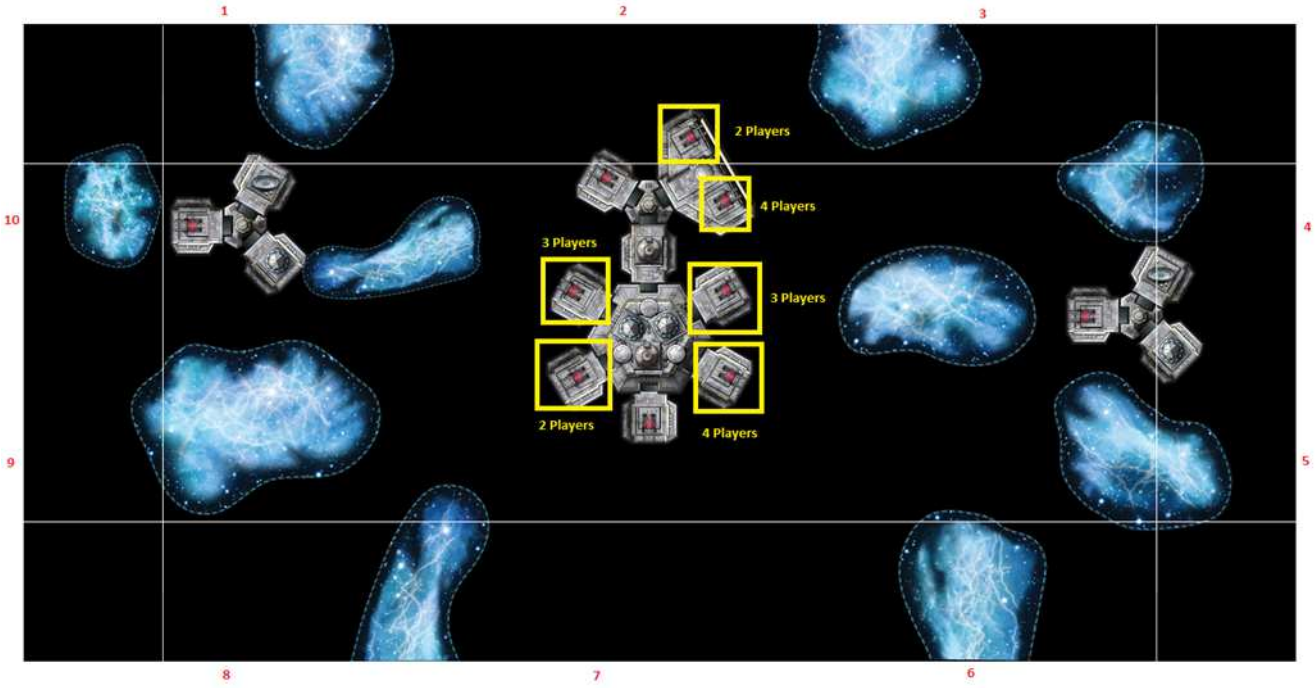

Enemy escape

The enemy squads will try to escape. To achieve this, they will need to flee from through the board edge in the Escape Zone. The Escape Zone is 2 Range wide in every direction.

Mission 2: Like the Good Old Days (no „Pallas", 6x3)

Now that you have the identification codes, a new suspense can be felt on the ship. Commander Abel calls you to CIC to brief you on the latest intel. "Our guys found a remote Imperial base hidden in a nebula. It's an old base, staffed only by a skeleton crew and mainly performing scanning duty. Command wants us to take it, but for that, we need to eliminate, you know, its scanning equipment. You will be assigned a counter-intelligence vehicle to block their communications and sensors, but be warned, it's very close range. You'll need to get into a knife-fight with this. The listening posts are outside the worst ion storms, so when they're down, the base will be essentially blind. You're going in fast, and when you're finished, you'll call reinforcements."

HOSTILE TERRITORY – 12 TURNS

Mission Objectives:

Primary	1) Destroy the sensor arrays in both small stations outside the main base. 2) Do not get discovered before.
Bonus	If no rebel ship gets shot at, gain **2XP**.
Bonus	For each round that you stay below the turn limit, gain **1XP**.

Rebel Victory: *"Reinforcements are on the way, I repeat, reinforcements are on the way. Let's hit them hard."* **Proceed to mission 3.**	**Imperial Victory:** *"Shit, they're onto us. This will get harder than we thought!"* **Proceed to Mission 3. All player ships start with half shields, round down, and one point of hull damage.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Special	Special	Special	+TIE/fo	+TIE/fo	+TIE/fo	+TIE/fo
Beta	3	2 or 7	Attack	+Shuttle	Upgrade to Elite	+Shuttle	Upgrade to Elite
Gamma	6	Special	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor
Delta	Special	Special	Attack	+Defender	Upgrade to Elite	+Defender	Upgrade to Elite

Ion Clouds
The clouds are Ion Storms.

Rebel Setup:
The rebel players may setup in either sectors 4, 5, 9 or 10.

Counter-intelligence unit
The rebel players also control a Rebel Operative (Sergeant Kabowski equipped) and delays the alarm for one round when at range 1 to the sensor array.

Shield Generators
The Shield Generators on the two sensor arrays produce one Agility per player. They need to be destroyed before the Sensor Arrays can be attacked.

Enemy setup
Most enemy craft are launched from inside the base (Vector "Special"). They are placed adjacent to the dock.

Alpha Squad
Squad Alpha is launched to investigate whenever a sensor array is destroyed. Alpha starts out with Strike AI for the sensor array and reverts to Attack AI when it's within LOS of a player ship or to Strike AI on the other array when it's in LOS of the destroyed array.

Gamma Squad
Gamma Squad arrives in any sector 2, 4, 6, or 8 that is closest to the players.

Delta Squad
Delta Squad is spawned like Alpha Squad when the alarm is set off.

Line of Sight
A unit or emplacement is said to have LOS if it's could perform a range 3 attack unobstructed.

Alarm
If the rebel ships ever get within unobstructed LOS of any sensor array, the crew will try to set off the alarm, which will succeed if the emplacement isn't destroyed at the end of the round or not blocked by the HWK-290. If this happens, the ion clouds do not block LOS anymore for all imperial units EVEN IN MISSION 3.

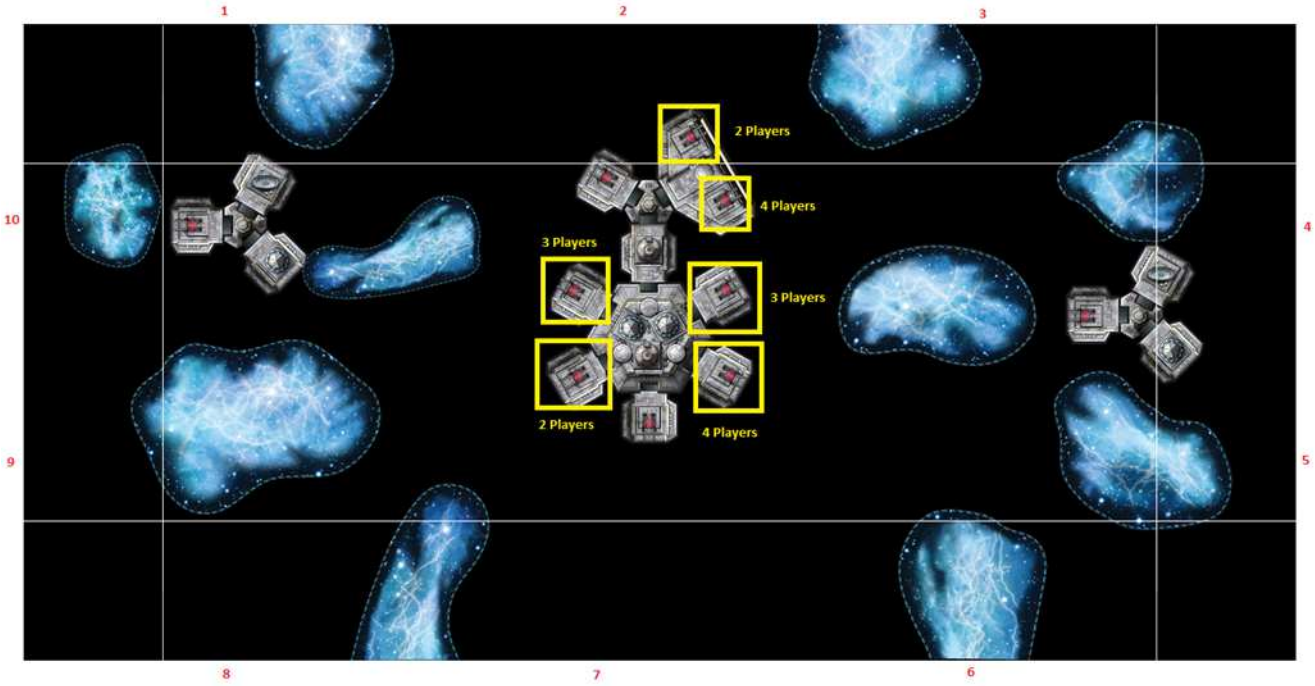

Rebel jump
Rebel ships can perform a hyperjump to switch to the other side of the board. If a jump was successful, simply place the ships adjacent to either sector 4, 5, 9 or 10.

Setup for mission 3
Do not remove any tiles or enemy craft from the board. Mission 3 will utilize the board as is.

Mission 3: Like the Good Old Days („Pallas", 6x3)

The „Pallas" jumps into the sector, carrying ordnance and reinforcements. Turbolaser blasts cut through space as the attack begins. "Escort us to the Docking Bay!" you hear Abel's voice over the comms. "We will drop Marines in, but you need to keep those turrets occupied!"

HOSTILE TERRITORY – NO TURN LIMIT

Mission Objectives:

Primary	1) The „Pallas" must not be destroyed. 2) The base must be captured.
Bonus	If the „Pallas" doesn't take any hull damage, gain **1XP**.
Bonus	If the HWK-290 survives the mission, gain **2XP** (Note: it might have been destroyed in mission 2 already, in which case the bonus can't be gained).

Rebel Victory: *"That was intense. Everyone clean up the mess so we can have some R&R in their canteen."* **Proceed to mission 4.**	**Imperial Victory:** *"This was a lot costlier than we thought. A lot of good people died today."* **Proceed to Mission 4. The „Pallas" and all players each lose one upgrade costing four or more XP.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	4	4 or 5	Attack	+TIE	+Bomber	+TIE	+Bomber
Beta	7	4 or 5	Attack	+Phantom	+TIE	+Defender	+TIE
Gamma	10	9 or 10	Attack	+TIE	+Decimator	Upgrade to TIE/fo	Upgrade Decimator Elite

Rebel Setup:

The rebel players start exactly where they ended the last mission. The „Pallas" is set up in sector 10.

Docking with the „Pallas"

The „Pallas" docks by overlapping the Dock entrance with its maneuver tool with the part of its chosen speed. When the „Pallas" docks, place it alongside the dock as evenly as possible. The „Pallas" is now immobile (+3 energy per round), but can still take actions and attack.

Capturing the base

The Marines move through the dock and the connecting piece into the Main Module as per standard HotAC rules. At the beginning of each turn, roll three dice. If the total number of hits is equal or higher than the number of emplacements on that station tile, move forward one station tile (skip the triangular one). Otherwise, they destroy one emplacement. When the Commandos succeed their movement roll in the Main Module, they capture the base. Players gain control over all remaining turrets and all enemy ships revert to Flee AI. The mission ends when no enemy ships remain on the board.

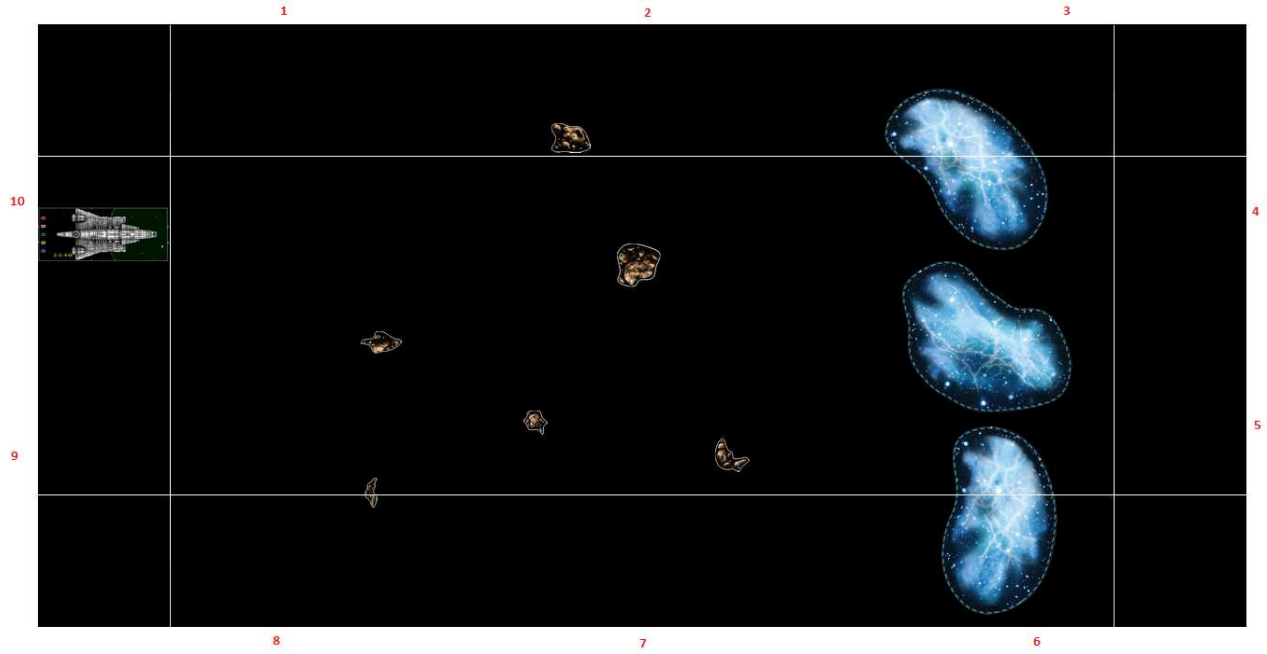

Turret AI

The turrets view the „Pallas" as a valid target even when she's docked. They will prioritize player ships in range 2, however, even if this means that they'll need to turn.

Mission 4: Specialist Murphy („Pallas", 6x3)

After what should have been a routine jump, the „Pallas" is ripped out of hyperspace in the roughest manner imaginable. After you collected yourselves from falling over each other in the mess hall, you can hear the announcement of multiple failures and the stampede of engineer boots outside. One of the many messages blaring over speaker commands you to attend CIC, immediately. There you find Commander Abel perched over the command console, bleeding from a head wound. "Our flank has been ripped open by some uncharted anomaly. We need to conduct emergency repairs asap, but we're in the thick of enemy territory. Most systems aren't functional, so you need to fly escort like we're some goddamn freighter. Go out there and keep us safe."

HOSTILE TERRITORY – 15 TURNS

Mission Objectives:

Primary	1) The „Pallas" must not be destroyed. 2) The „Pallas" must leave the mission area.
Bonus	If the „Pallas" doesn't take any hull damage, gain **1XP**.
Bonus	Every time a player ship gets shot at by an enemy with Strike AI, that player gains **1XP**.

Rebel Victory: *"Now that we're in something resembling safety, we need to get some stuff. You need to bring it here."* **Proceed to mission 5.**	**Imperial Victory:** *"The „Pallas" is totally disabled and floating in space. You need to protect it until we can get the engine running again."* **Lose 5XP per player. Proceed to Special Mission 1. Danger Level: Keep all damage gained this mission. Then proceed with mission 5.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	2	Strike	+Punisher	+Bomber	+Punisher	+Bomber
Beta	Setup	7	Attack	+TIE/fo	+TIE/fo	+TIE/fo	+TIE/fo
Gamma	3	4	Attack	+Decimator	+Lambda	Upgrade Lam to Elite	Upgrade Dec to Elite
Delta	6	9	Attack	+Interceptor	+TIE	+Interceptor	+TIE
Epsilon	10	7	Attack	+Defender	Upgrade to Elite	+Defender	Upgrade to Elite

Rebel Setup:

The rebel players start alongside the „Pallas". The „Pallas" is set up so that its aft is adjacent to the left edge of the play area in vector 10.

Leaving the mission area

The „Pallas" and all players automatically leave the mission area when the Gozanti's base overlaps the right edge of the playing area.

Strike AI

Strike AI targets the „Pallas".

„Pallas" systems

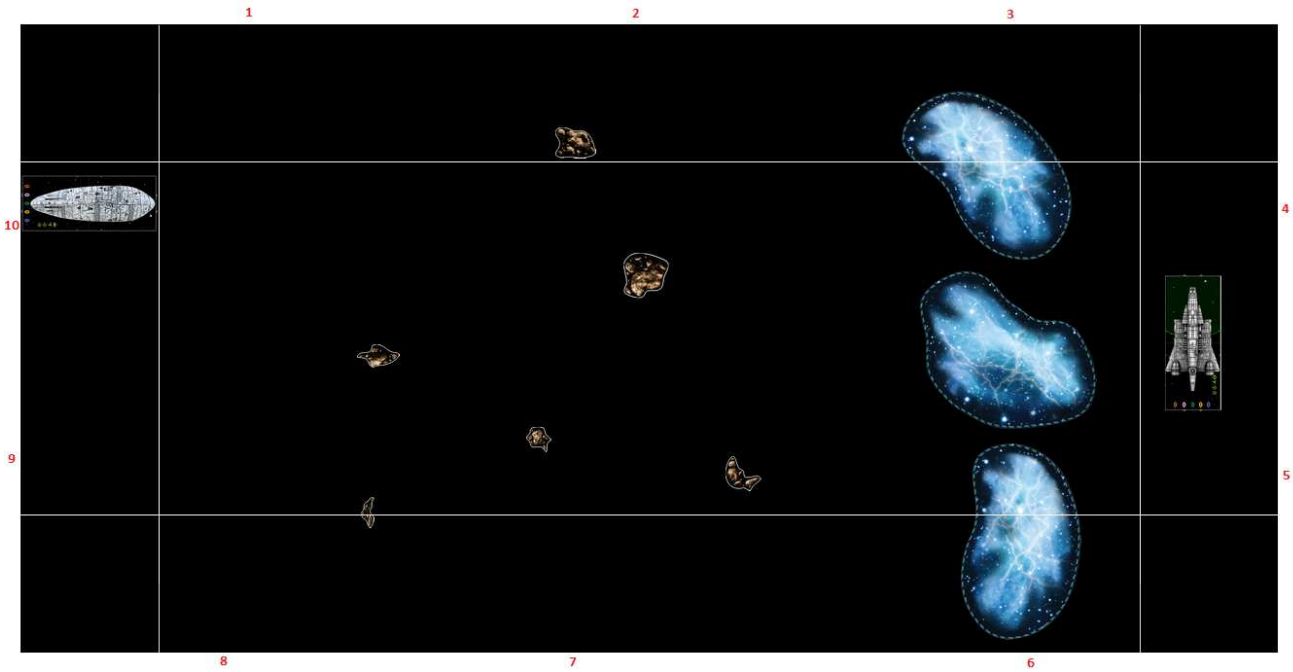

The „Pallas'" systems are all damaged and need to power up. This happens automatically at the start of the following rounds; until then, the system in question is inoperable or its stat zero.

System (game function)	Available at turn
Engine (Movement)	2
Computers (Actions)	4
Shields (Shield points)	6
Weapon systems (Weapon, attack)	8

Mission 5: A Friend in Need („Pallas", 6x3)

"We're safe for the moment, but unfortunately, we're also run out of spare parts. Command has sent us a freighter with supplies, but our safety here comes at a cost – it can't jump in directly, as the nebula is messing with the computers. You need to escort the freighter here in one piece, and preferably keep us alive, too."

HOSTILE TERRITORY – NO TURN LIMIT

Mission Objectives:

Primary	1) The „Pallas" must not be destroyed. 2) The Freighter must not be destroyed. 3) The „Pallas" must be fully repaired and then conduct a jump.
Bonus	If the „Pallas" doesn't take any hull damage, gain **1XP**.
Bonus	Every time a player ship gets shot at by an enemy with Strike AI, gain **1XP**.

Rebel Victory: *"We're operational again. And there's some juicy information from Command to boot. Let's get at it."* **Proceed to mission 6.**	**Imperial Victory:** *"Luckily, we managed without the supplies, but we had to salvage some equipment to do so."* **Lose [number of players] „Pallas" upgrades. Choose the most expensive ones first. You may lose purchased extra ships. Then proceed to mission 6.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	8	Attack	+TIE	+TIE	+TIE	+TIE
Beta	Setup	2	Strike	+Advanced	+Advanced	+Advanced	+Advanced
Gamma	Setup	7	Strike	+Advanced	+Advanced	+Advanced	+Advanced
Delta	5	9	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor
Epsilon	Special	2	Attack	+Random TIE	+Random TIE	+Random TIE	+Random TIE
Stigma	Special	7	Strike	+Punisher	+Bomber	+Punisher	+Bomber
Zeta	Special	3 or 6	Attack	+Phantom	+Lambda (Elite)	+Defender	+Interceptor (Elite)

Rebel Setup:

The „Pallas" is set up in 2 distance to the right board edge between vectors 4 and 5. The Freighter is set up so that its aft is adjacent to the left edge of the play area in vector 10. The players may each start the mission either adjacent to the "Pallas" or the Freighter. The "Pallas " is immobile until repairs are conducted.

Repairing the „Pallas"

The Freighter needs to dock with the „Pallas". It then needs five turns to conduct repairs. After repairs are conducted, the „Pallas" and the Freighter can jump away. The mission ends when the „Pallas" and the players successfully conducted a jump. The Freighter counts as destroyed if it remains on the play area.

Beta and Gamma squad armaments

All TIE Advanced of Beta and Gamma Squad carry Cluster Missiles.

Epsilon, Stigma and Zeta Squad arrival

Epsilon and Stigma arrive in the turn after the Freighter has docked to the „Pallas". Zeta arrives in the fifth round of repairs.

Strike AI

Strike AI targets:

- Beta: „Pallas"
- Gamma: Freighter
- Stigma: Whichever is closer

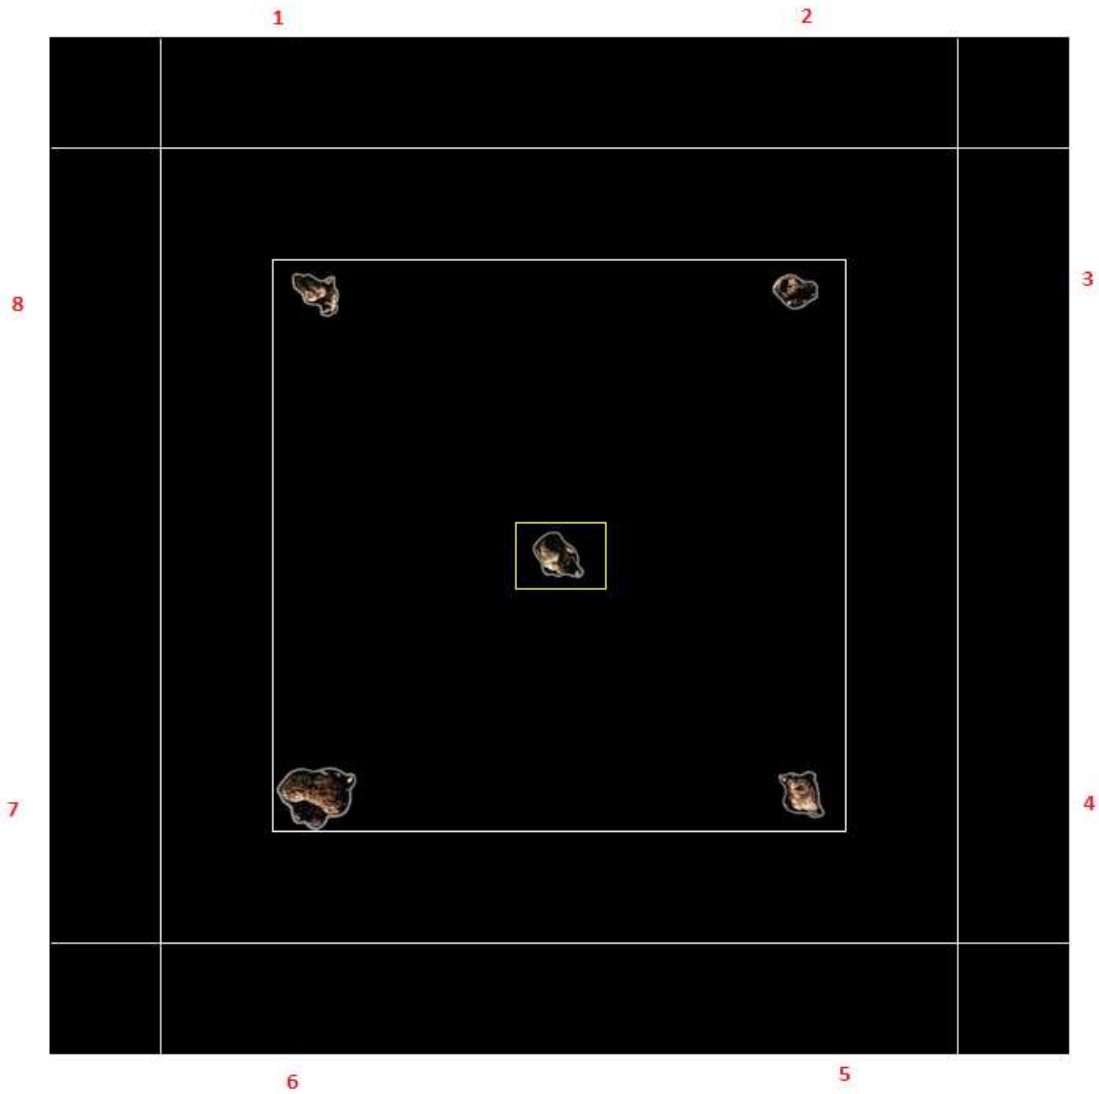

Mission end

The mission ends when all player ships and the "Pallas" have left the board.

Mission 6: Rookie Training (no „Pallas", 3x3)

You were sent out to train some of the rookie pilots you received during the resupply mission. They are green as grass, but you need them fully operational as soon as possible, so taking out an unawares enemy patrol during a life-fire-exercise seems like the way to go.

FRIENDLY TERRITORY – 20 TURNS

Mission Objectives:

Primary	1) The Rookies must survive. 2) All enemy craft need to be destroyed.
Bonus	Every time you maneuver your ship into the firing arc of an enemy ship in a way that protects a rookie, gain **1XP**.
Bonus	Every time a rookie damages/destroys an enemy ship, gain **1/2XP**.

Rebel Victory: *"These guys have shaken off the worst anxieties, I'll wager."* **Proceed to mission 7.**	**Imperial Victory:** *"We could have really used those pilots. Your job was to safeguard them, not to rampage around on your own. I am deeply disappointed in you."* **Lose 10XP per rookie lost. Then proceed to mission 7.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	3	Attack	+TIE	+TIE	+TIE	+TIE
Beta	4	6	Attack	+Advanced	+Advanced	+Advanced	+Advanced
Gamma	8	1	Attack	+Interceptor	Upgrade to Elite	+Interceptor	Upgrade to Elite

Rebel Setup:

The rebel players start in vector 7. Every rebel player gets one Bandit Squadron Pilot (Z95 Headhunter) as wingman, which is placed at distance 1 to himself.

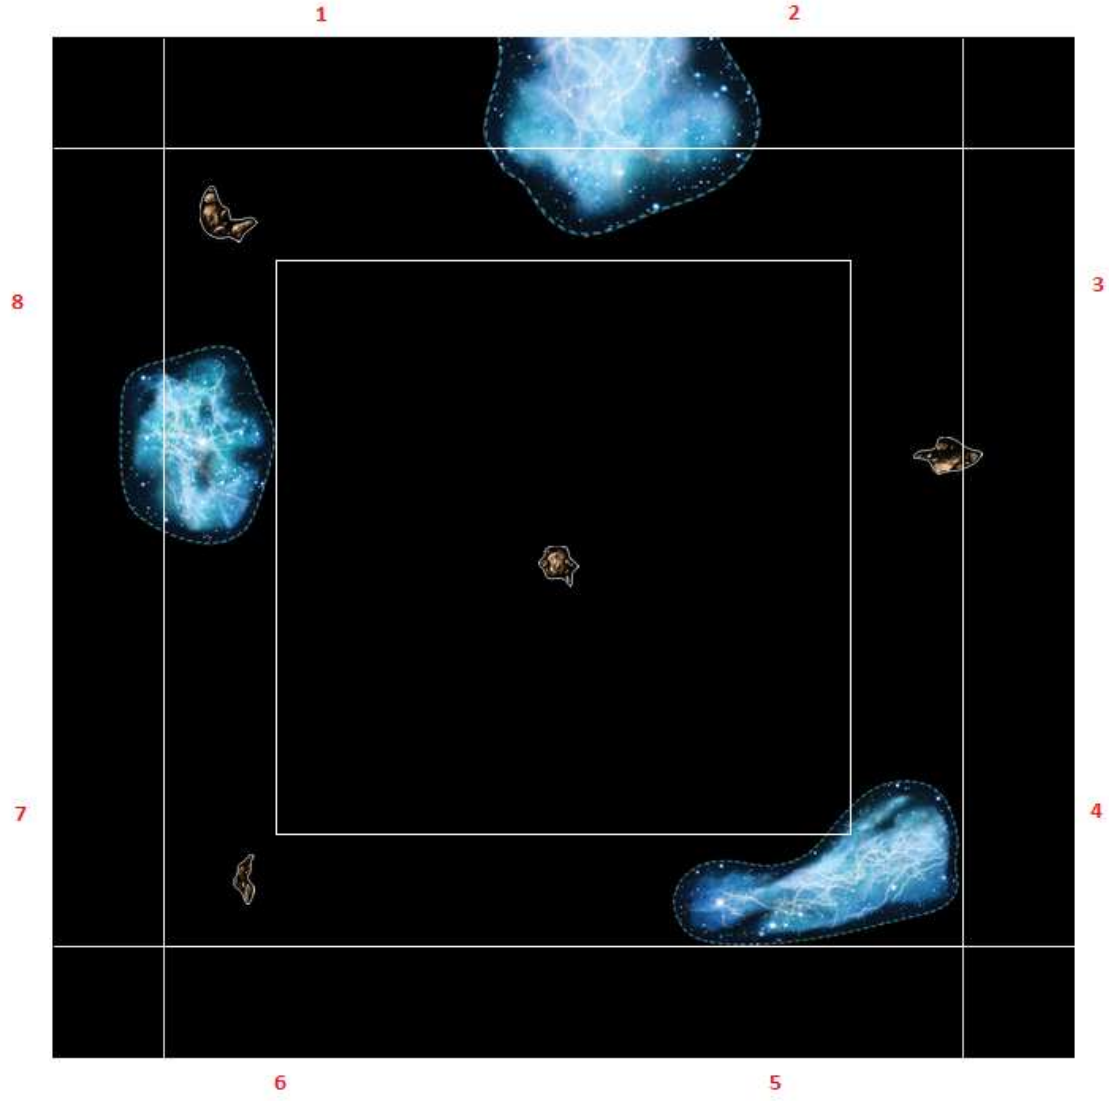

Rookie AI

You find the Z95 AI sheet in the end section of this document. The Rookie AI works like TIE fighter AI: they will stay in formation with you until they are damaged or you are not facing in the same direction. They will not flee, however, but rather fight until destroyed.

Mission 7: Wolf in sheep's clothing (no „Pallas", 3x3)

"Listen up, pilots. Command has sent us the coordinates of one of Zerak's subordinate officers. The man is apparently a replacement, coming in from outside the sector, and personally not known to Zerak. We need to intercept his shuttle and swap him with one of agents. If we can successfully infiltrate his Star Destroyer, we might just be able to get an opening for an attack."

FRIENDLY TERRITORY – 20 TURNS

Objectives:

Primary	1) Capture the Shuttle. 2) No Imperial ship must escape.
Bonus	If you ionize the Shuttle by luring it in the Ion Storm, gain **5XP**.
Bonus	For every enemy fighter that loses all its hull points in a single attack, gain **1XP**.

Rebel Victory: *"We have the guy. He's interrogated by our agent. After that, we'll flush him out the airlock with the trash."* **Proceed to mission 7.**	**Imperial Victory:** *"The Empire might have very well gotten wind of this operation. It will take us some serious extra effort to pull this off."* **Proceed to mission 7. Keep your failure in mind for mission 11.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	3	Flee	+Shuttle	+1 Agility	+1 Agility	+1 Agility
Beta	Setup	3	Attack	+TIE	+TIE	+TIE	+TIE
Gamma	Setup	2 and 5	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor

Player setup

Players may setup their ships in any sector 1 or 6.

Flee AI

The Shuttle tries to escape through the lower left board edge. Measure Range 2 along vector 7 for this. The Shuttle ignores all asteroids for its movement selection.

Ionizing the Shuttle

When the Shuttle gains any Ion token, it is disabled and will not move (it can still obstruct movement, though). It counts as captured when all other ships are defeated.

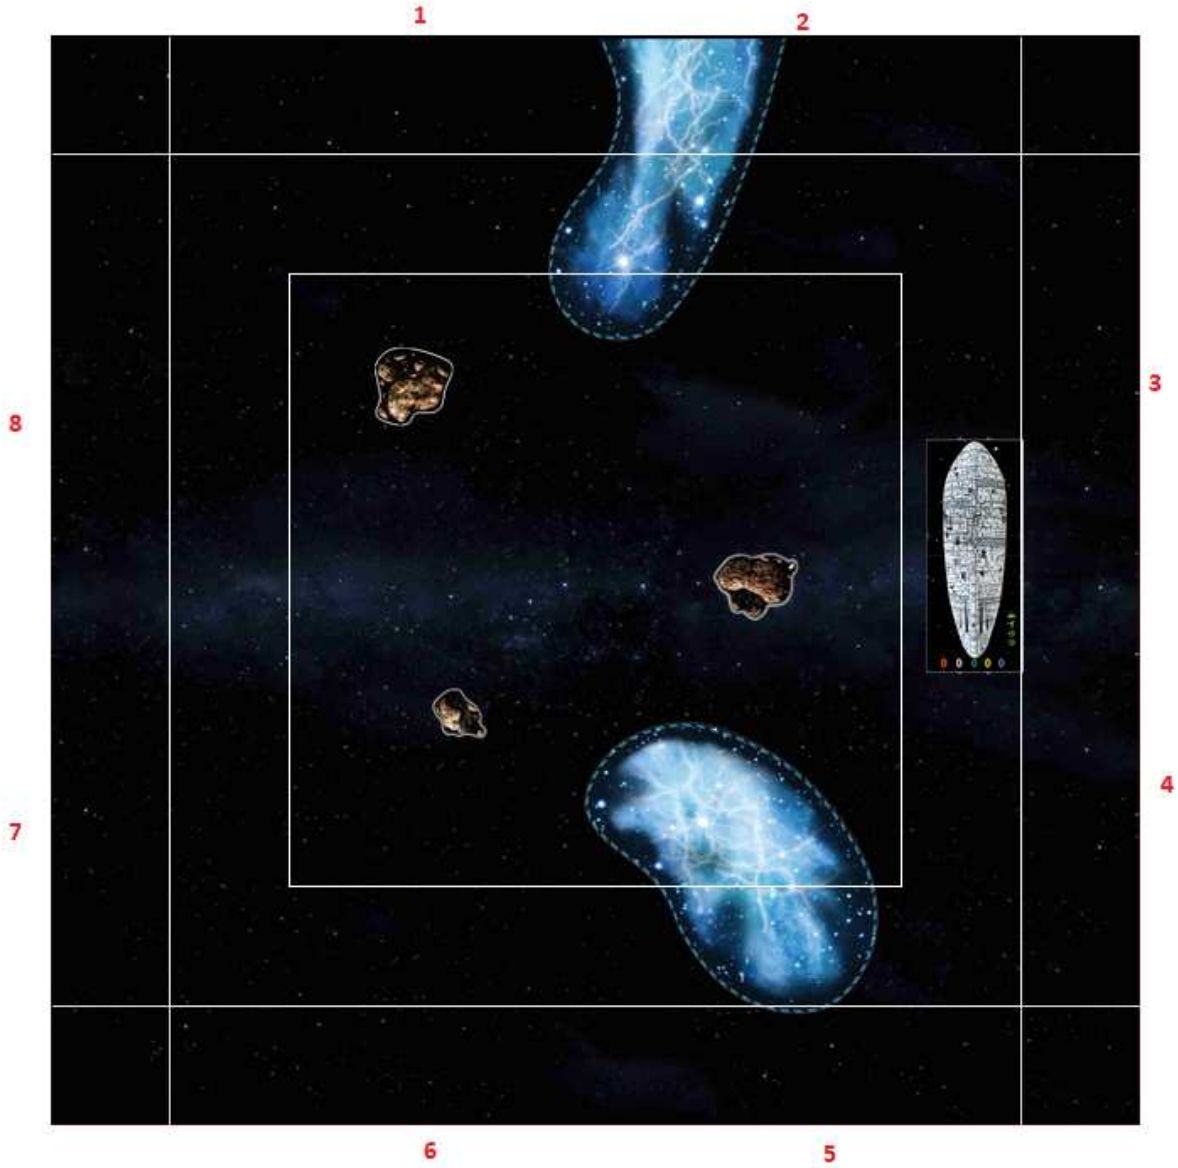

Ion Storms

If any ship or its maneuver template overlaps any Ion Storm, it gains one Ion Token.

Mission 8: Bring out the big guns (no "Pallas", 3x3)

"If we want to take out a Star Destroyer, we need to seriously upgrade our weaponry. I think our best shot is to steal one of those giant turbolasers that usually go onto a Star Destroyer, strap it to the "Pallas" and use all available energy to fire the damn thing. Central has given us the coordinates of a transporter that's en route with one of those. It's not for Zerak, unfortunately, but the transport is cutting through the Aturi Cluster to save some time. We can lay a trap for them and get the cannon. You need to be quick about it."

ENEMY TERRITORY – 12 TURNS

Objectives:

Primary	1) Board the transport. 2) Jump the transport out of the play area.
Bonus	If the U-Wing survives, gain **1XP**.
Bonus	If the transport doesn't lose any hull, gain **3XP**.

Rebel Victory: *"Very good. It will take some time to install this monster, but we will be ready in time for the assault."* **Proceed to mission 9.**	**Imperial Victory:** *"The transporter is not yet out of the Cluster. You need to follow it and take this cannon!"* **Lose 4XP. Retry the mission.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	3	Attack	+TIE/fo	+TIE/fo	+TIE/fo	+TIE/fo
Beta	Setup	4	Attack	+TIE/sf	Upgrade to Elite	+TIE/sf	Upgrade to Elite
Gamma	5	1	Attack	+TIE/fo	+TIE/fo	+TIE/fo	+TIE/fo
Delta	7	6	Attack	+TIE/v1	Upgrade to Elite	+TIE/v1	Upgrade to Elite
Epsilon	Special	4	Strike	+Interceptor	+Interceptor	+Interceptor	+Interceptor

Player Setup

The players set up in vector 7. They also gain a U-Wing with Sergeant Kabowski on board, which is under control of the players.

The Carrier

The Carrier is immobile and does not take any actions.

Boarding the transport

When the U-Wing docks with the GR75, place it adjacent to the Carrier. It's immobile, but it can still take actions and attack as well as being targeted. At the beginning of each subsequent round until succeeding, roll three attack dice. When you roll three hits or crits, you succeeded. For each round you failed, add one die. When you succeeded, you regain full control over the U-Wing. You also gain control over the transport.

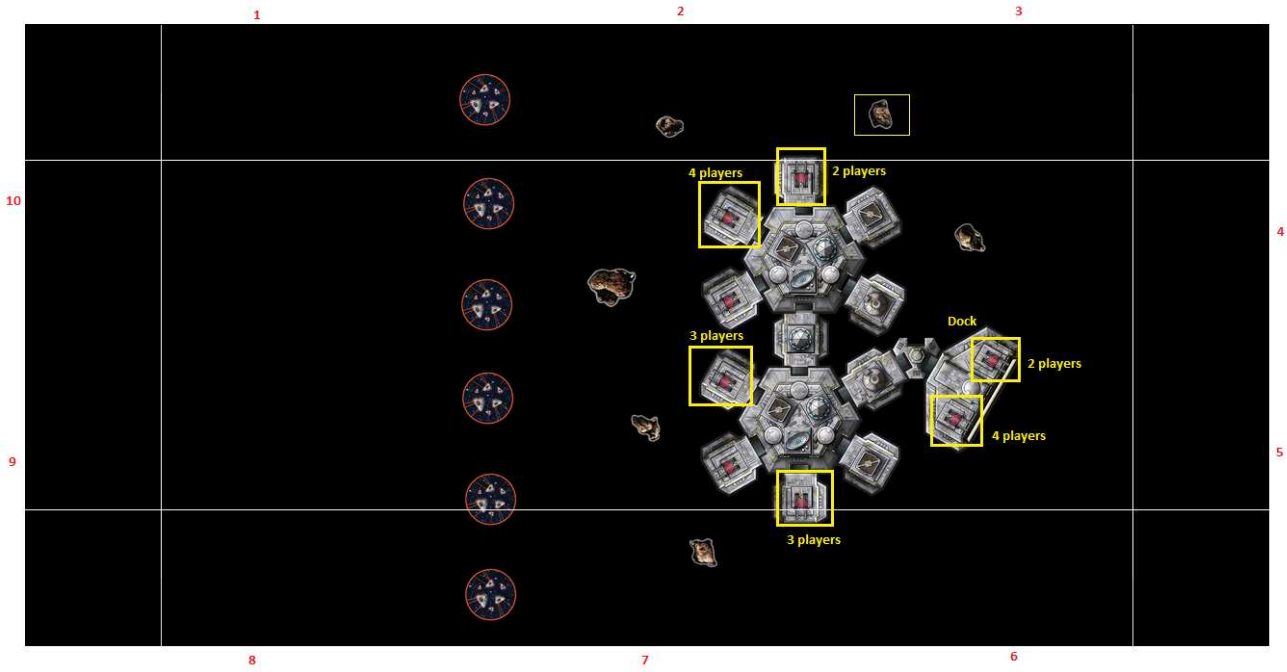

Epsilon squad

In the round in which you succeeded in taking over the Carrier, spawn Epsilon squad. It has Strike AI on the Carrier.

Mission 9: The Bait („Pallas", 6x3)

"We don't want to fight Zerak on terrain of his own choosing. Therefore, it is necessary to draw him out into a more remote area, where he cannot count on swift resupplies and reinforcements. Intelligence has determined that the best way to achieve this goal is to attack a refinery that is situated on an asteroid. You will fly an attack on this refinery, so that Zerak is forced to use his strongest weapon to protect its repairs. Since he can't expose all of the Aturi Cluster, he'll need to send the Star Destroyer in a pretty barebones fashion. Go at it."

ENEMY TERRITORY – NO TURN LIMIT

Objectives:

Primary	Destroy all emplacements.
Bonus	For every destroyed emplacement, the player gains **1XP**.
Bonus	If the „Pallas" doesn't lose any hull, gain **2XP**.

Rebel Victory:	**Imperial Victory:**
"That's one refinery less for the Empire. Let's hope it's as dear to them as intelligence thinks it is."	*"We have did draw him out, alright, but the cost has been enormous."*
Proceed to mission 10.	**Lose 5XP. Proceed to mission 10.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P

Epsilon	8	Special	Attack	+TIE/fo	Upgrade to Defender	+Interceptor	Upgrade to Elite
Zigma	12	4	Attack	+Decimator	+TIE +TIE	Upgrade Dec to Elite	Upgrade TIE to TIE/fo

Player setup

The „Pallas" starts with its aft adjacent to any point of the left edge. The player ships start docked.

Enemy spawning ("Special")

Enemy TIE fighters are spawning from the dock. Normal HotAC rules apply.

Gamma Squad

Whenever there are fewer than [number of players] TIE fighters on the board, Gamma Squad spawns.

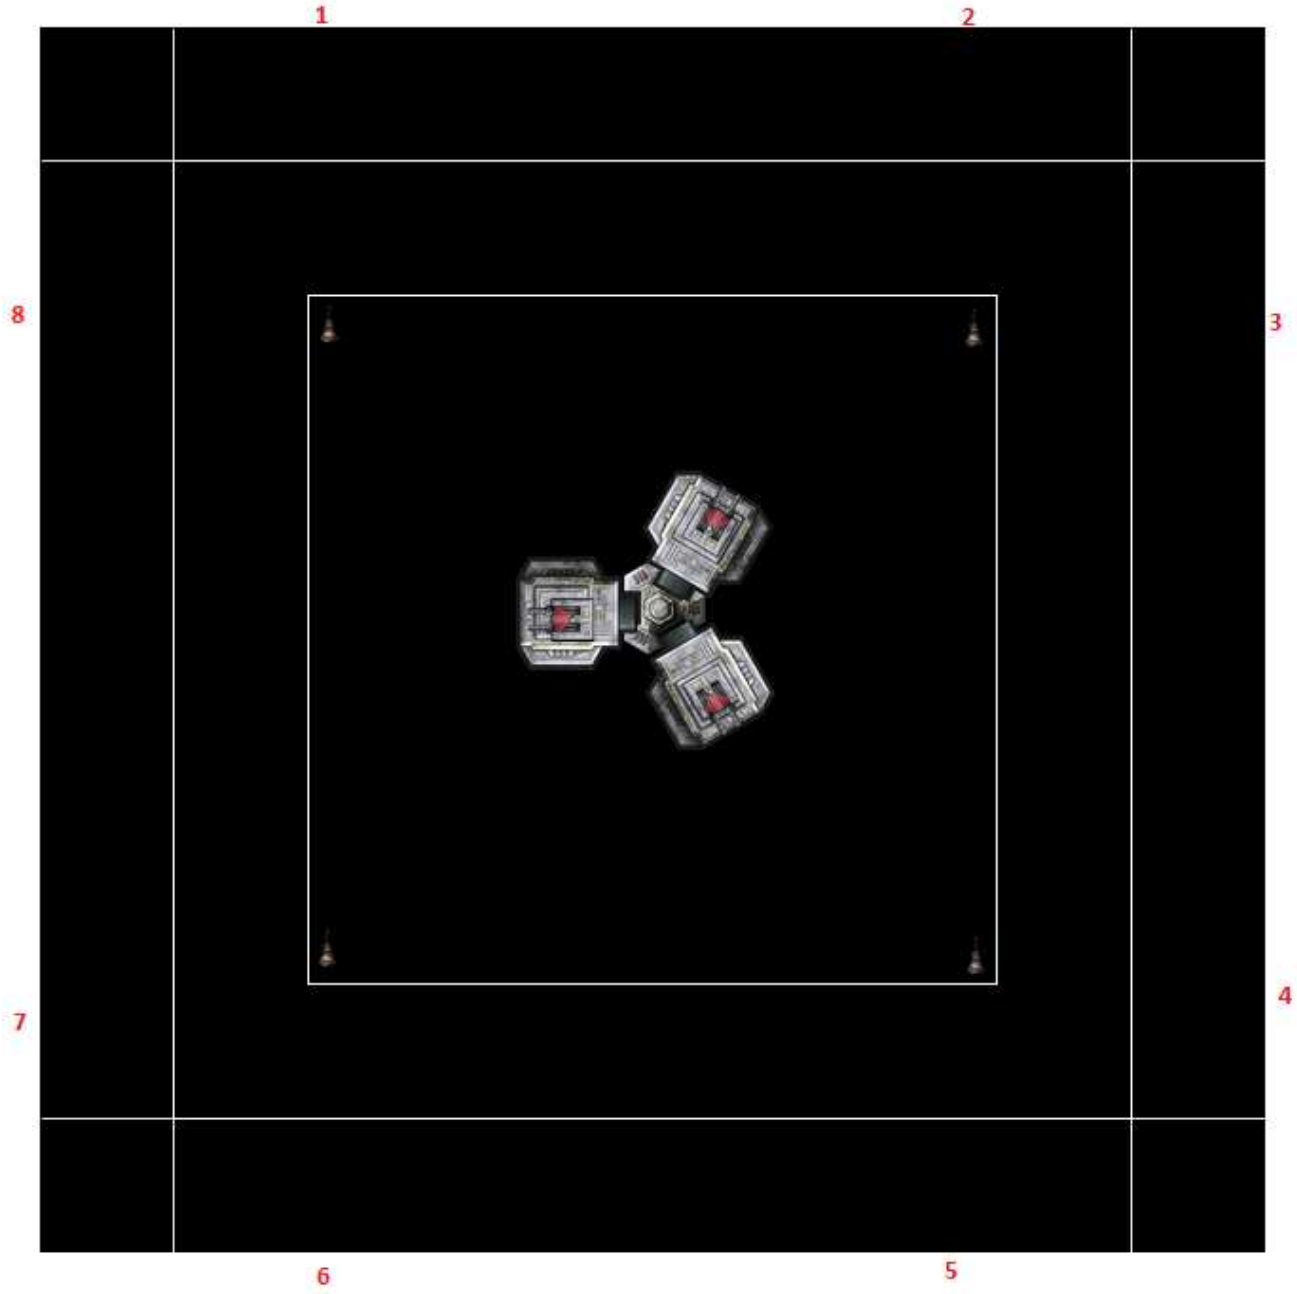

Mission end

The mission ends once all player ships and the "Pallas" left the mission area.

Mission 10: Blindsided (no "Pallas", 3x3)

"We're almost ready. Intel reports that Zerak has indeed split up his forces. Now all we need to do is to secure that he cannot smell the trap we're laying out. You need to disable the sensor net in the area, so he's truly flying blind. Then we'll hit him hard."

ENEMY TERRITORY – 12 TURNS

Objectives:

Primary	Destroy all sensors.
Bonus	For every destroyed sensor, the player gains **1XP**.
Bonus	If all enemy ships are destroyed, gain **2XP**.

Rebel Victory: *"Now we're as prepared as once can be in order to get at Zerak. Let's hope this will work all out. Enjoy your last supper, people."* **Proceed to mission 11.**	**Imperial Victory:** *"Damn this. Now Zerak knows what awaits him. We can be glad that he's an arrogant bastard, he's going in regardless."* **Proceed to mission 11. Keep your failure in mind.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	2	Attack	+Shuttle	+TIE	Upgrade Shuttle to Elite	Upgrade TIE to TIE/fo

Gamma	3	1	Attack	+Random TIE	Upgrade to Elite	+Random TIE	Upgrade to Elite
Delta	7	5	Attack	+Random TIE	Upgrade to Elite	+Random TIE	Upgrade to Elite

Rebel setup

The player ships are set up in vector 8.

Sensors

The sensors are placed at Range 3 of the Turrets in a rectangular grid (see graphic). Each sensor has one hull and five agility.

Gamma and Delta squad

Gamma and Delta each consist of the same ship type.

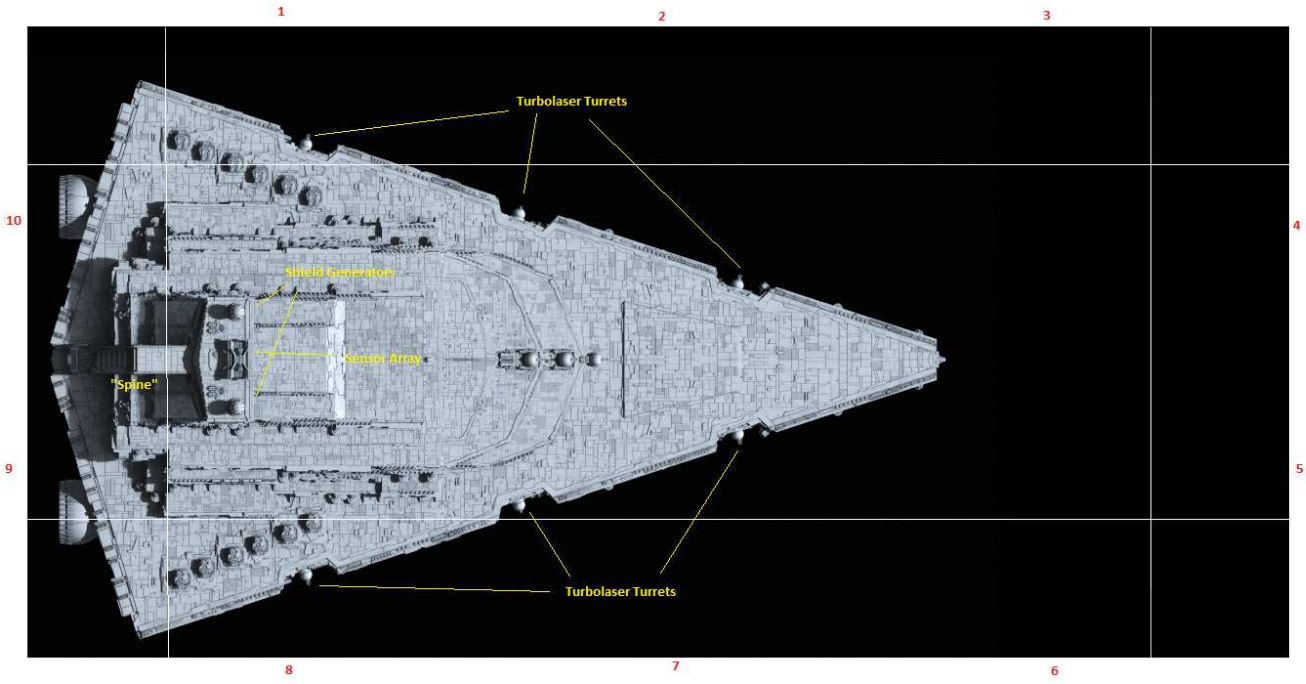

Mission end

The mission ends when all player ships left the mission area.

Mission 11: Come at the king („Pallas", 6x3)

"It is time, gentlemen. Our agent inside the Star Destroyer sent a signal that everything is set. Once we jump in, the Star Destroyer will experience multiple failures that should give us our opening to attack. If we manage to destroy Zerak, the Aturi Cluster will be in disarray. Several independent mining ventures have already signaled their interest to join forces with us. This is our best chance to turn the tables on the whole Aturi Cluster. Let's not waste it."

NEUTRAL TERRITORY – NO TURN LIMIT

Objectives:

Primary	Destroy the Star Destroyer.

Rebel Victory: *"Admiral Zerak is defeated. The Imperial forces are in disarray. This is the hour of the Alliance. For now, we celebrate, but tomorrow, work is to be done. So don't stay up late."* **The Rebels win.**	**Imperial victory:** *A plaque in the rebel headquarters remembers the brave heroes who died here until this day.* **The Imperials win.**

Squad	Arrival	Vec.	AI	1P	2P	3P	4P
Alpha	Setup	1	Attack	+TIE +TIE	+TIE +TIE	+TIE +TIE	+TIE +TIE
Beta	Setup	2	Attack	+Interceptor	+Interceptor	+Interceptor	+Interceptor
Gamma	Setup	8	Attack	+Shuttle	Upgrade to Elite	+Shuttle	Upgrade to Elite
Delta	Special	7	Strike	+TIE/fo	+TIE/fo	+TIE/fo	+TIE/fo
Epsilon	Special	8	Strike	+Defender	+Defender	+Defender	+Defender
Zigma	Special	2	Strike	+Decimator	+Advanced	+Decimator	+Advanced

Player setup

The „Pallas" is placed with its aft adjacent to the right edge of the game board. The player ships start docked.

Imperial spawn

Imperial fighters spawn adjacent to the Star Destroyer (to simulate their launch from the hangar below it), but still adhering to the vector. Approximate the position in good faith. At the end of each round, the ASD spawns one TIE in a random vector unless there are already [number of players*2] or more standard TIE on the board.

Star Destroyer layout

The Star Destroyer is protected by six Turbolasers. On the bridge, there are a sensor array and two shield generators. Those are represented by the graphic itself and don't need to be marked by HotAC material (but of course you can if you like). The prominent line on the aft of the ship, marked as "spine", is only relevant if you lost mission 7. The Bridge, as outlined in Mission 9 of Season 2, is also a specific area.

	Turbolasers*	Sensor Array*	Shield Generator	Bridge*	Spine
Hull	5	10	5	10	10
Shields	2	2	5	2	2

*can only be damaged or destroyed once the Shield Generators are down

Star Destroyer actions

The Star Destroyer acts at the beginning of any round, before any other effect is resolved. It takes two actions: one Bridge Action and one Sensor Action. For each, a d6 is rolled. Both actions are only taken until Bridge and/or Sensor Array are destroyed.

Bridge Action:

- 1-2: Regenerate Shields. The Shield Generators regenerate their full shields unless they are already full or destroyed. In this case, reroll.
- 3: Maneuver: All Rebel ships overlapping the ASD gain one stress or have to suffer one damage.
- 4: Coordinate Fleet: All Imperial ships gain a Focus token.
- 5: Evasive Action: The ASD adds one green die to all its defensive rolls this round.
- 6: Intensify firepower: All Turbolasers roll one additional attack die.

Sensor Action:

- 1-2: Regenerate Shields. The Shield Generators regenerate their full shields unless they are already full or destroyed. In this case, reroll.
- 3: Jam: The nearest player ships gains one stress token.
- 4: Target Lock: All Turbolasers may reroll one die.
- 5: CAG Intervention: The highest ranking (PS) ship in any player's arc or the ship closest to the Sensor Array gains an Evade Token.
- 6: Deploy TIE: Spawn a single TIE fighter in a random vector.

If you failed mission 7 or 10

If you failed mission 7, you need to destroy the Spine before you can destroy any other part of the ASD. If you failed mission 10, spawn an additional version of Delta at setup.

Winning the game

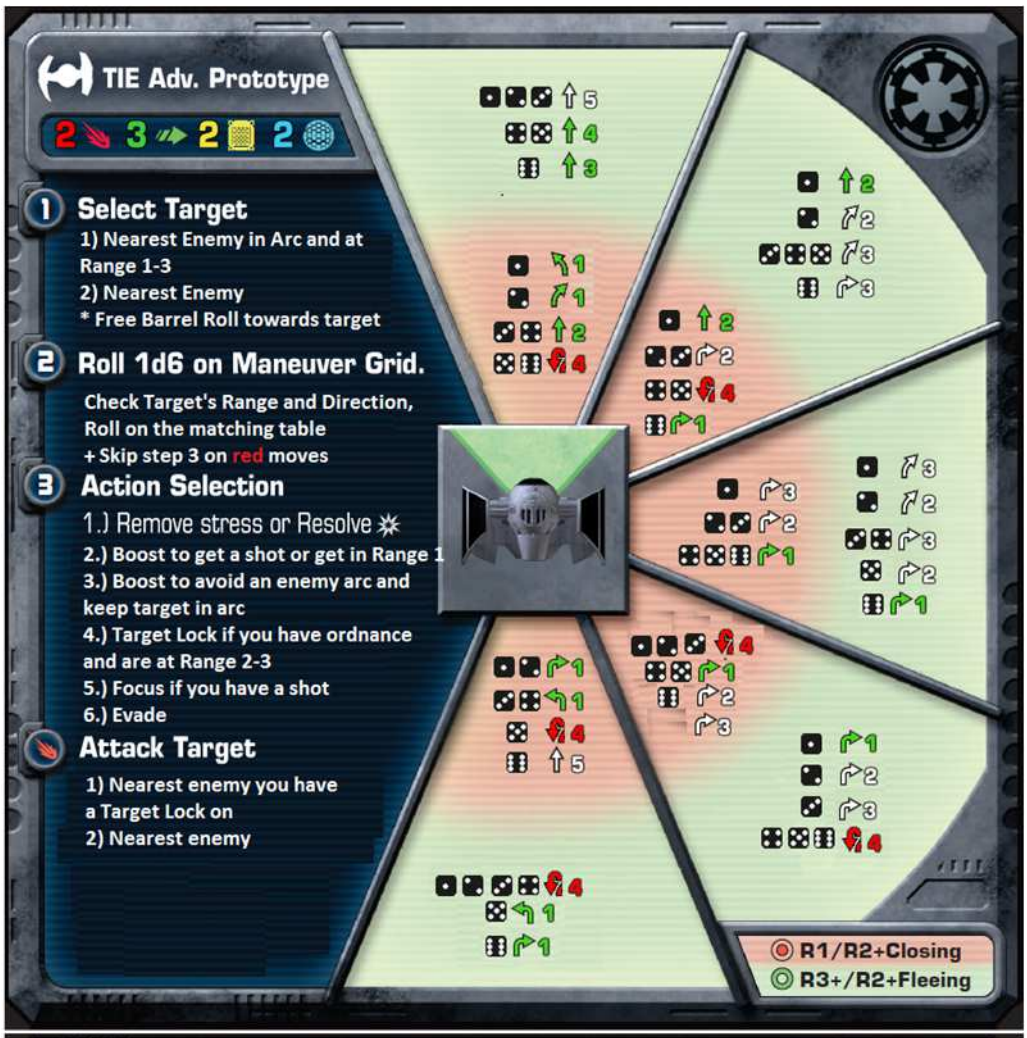

The ASD is destroyed when both Shield Generators, the Bridge and the Sensor Array are destroyed.

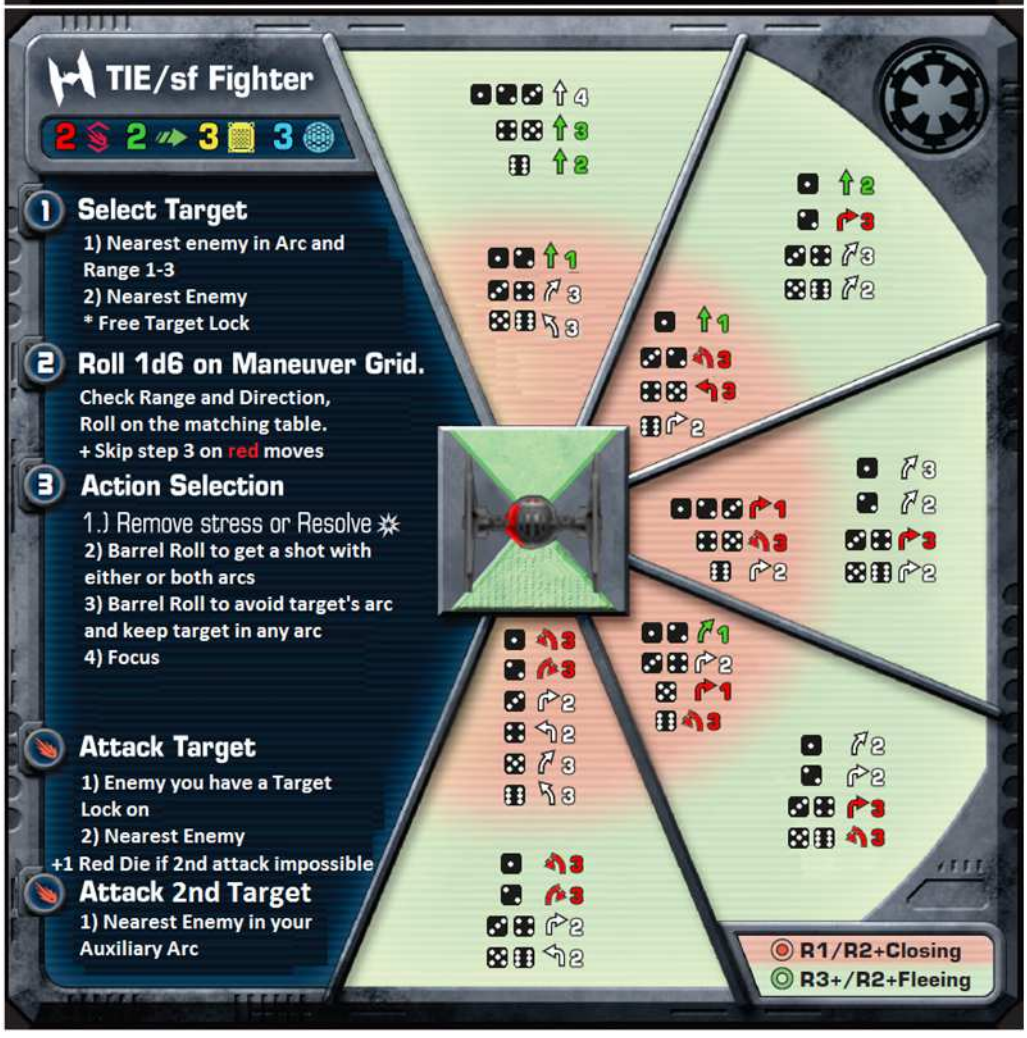

Delta, Epsilon and Zigma squadrons

Delta spawns when the first Shield Generator is destroyed, Epsilon after the second, and Sigma when either Sensor Array or Bridge are gone. They have Strike AI on whoever destroyed the given emplacement.

3. Focus.
4 Attack Target
Torpedo if Possible. Nearest Enemy in arc.
Proton Torpedo R2-3 & Guidance Chips
4 dice turn 1 Focus into a Critical and 1 blank or focus into a critical.
R7 Astromech
If you have already fired or are unable to fire your torpedo, when defending you may spend your TL on the attacking ship to make the attacker reroll all hit and critical results.
Fire Control System
After you perform an attack you may acquire a Target Lock on the defender.

Explanation for the „Pallas" card

The actions need to be bought separately. To mark your purchase, simply cross the small rectangle adjacent to the corresponding action. Your Shield, Hull and Energy values can be upgraded as well, so simply mark the current values in the boxes next to three traits.

New Titles:

A-Wing Mass Production Model

A-Wing only. Title.

Increase your Hull Value by 1. Place a munitions token on an equipped upgrade.

Treat your (↑4) and (↑5) maneuvers as white.

You may equip the A-Wing Test Pilot title.

2

A-Wing Mk. II

A-Wing only. Title.

Add the upgrade slot to your upgrade bar.

When you are assigned an evade token, assign an additional evade token to your ship.

You may equip the A-Wing Test Pilot title.

6

A-Wing Mk. III

A-Wing only. Title.

Add the and upgrade slots to your upgrade bar.

When attacking, you may treat the range as 1 range band less than it is (up to a minimum of 1).

You may equip the A-Wing Test Pilot title.

16

T65B X-Wing

X-Wing only. Title.

Increase your shield value by 1. Add the icon to your action bar.

You may treat (↑3) maneuvers as green.

12

T65AC4 X-Wing

X-Wing only. Title.

Treat all (↑) maneuvers as green.

After performing a green maneuver, you may perform a free action and receive a weapons disabled token.

2

ACT65 X-Wing

X-Wing only. Title.

Increase your shield value by 1.

After you perform a protect action, you may perform a free or action.

7

S-Foils (Closed)

X-Wing only. Title. Dual card.

Action: Flip this card.

You cannot attack. After executing a maneuver, perform a white (↑2) maneuver.

You can equip other titles.

0

S-Foils (Opened)

X-Wing only. Title. Dual card.

Action: Flip this card.

You can equip other titles.

0

B-Wing B6 Prototype

B-Wing only. Title.

You gain an additional slot with the Autoblaster equipped. You cannot equip anything else in that slot.

9

Gyro Stabilization System

B-Wing only. Title.

If you have 2 stress or less, you may perform red maneuvers and actions normally.

1

Alliance Retrofit

HWK-290 only. Title.

Your upgrade bar gains the upgrade icons.

Increase your primary weapon value by 1. You may perform attacks against ships outside of your normal firing arc.

10

BTL-S3 Y-Wing

Y-Wing only. Title.

Increase your primary weapon value to 4. The defender doubles their agility value against primary weapon attacks.

1

Gyroscopic Cockpit

B-Wing only. Title.

After you execute a 1-speed maneuver you may rotate your ship 90°. Then add 1 stress token.

0

Republic Courier

HWK-290 only. Rebel only. Title.

If you equip a upgrade, its squad point cost is reduced by 2 (to a minimum of 0).

0

• Scarlet Star

YT-2400 only. Title.

Your upgrade bar loses the upgrade icon.

You may equip "Small ship only" upgrades

You may equip "Huge ship only" upgrades that do not have "ENERGY" in the text.

0

New Crew:

•MK-09
Rebel and Scum only.
Once per turn, when you receive an ion token or a weapons disabled token, you may receive 2 stress tokens instead.
1

Turret Gunner
Limited.
When attacking with a at Range 1-2, reduce the target's agility value by 1. After performing this attack, you cannot attack again.
3

•Hondo Ohnaka
Rebel and Scum Only.
Your upgrade bar gains the upgrade icon.
You cannot equip more than 1 of the same upgrade cards.
1

•K-2SO
Rebel only.
While you have three or less stress tokens, stress tokens do not prevent you from taking focus, evade, or target lock actions.
3

•Saw Gerrera
Rebel Only.
Once per turn, when defending, you may add a to the attacker's roll. If you do so, the attacker suffers 1 damage.
3

•Wedge Antilles
Rebel only.
When attacking a ship inside your firing arc, if you are not inside that ship's primary firing arc, that ship may not spend focus or evade tokens.
3

Rebel Tech Expert
When attacking, if you have a Target Lock on the target, you may reroll one die.
1

•BB-8
Resistance Only.
When you reveal a or maneuver, you may instead perform the corresponding Tallon Roll maneuver. If you do, gain one stress, and reduce your agility by one (to a minimum of 0) until the end of the round.
3

•Lieutenant Blount
Rebel only.
At the start of the Combat phase, you may acquire a target lock on an enemy ship at range 1.
3

•Eaden Vrill
Rebel only.
Once per round, when defending, if the attacker modifies 1 or more attack dice, you may immediately assign an evade token to your ship.
3

Pallas Upgrades:

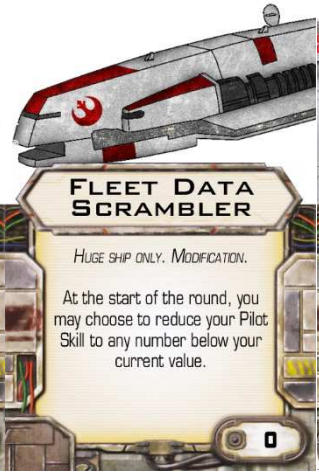

New Modifications:

New System:

New Tech:

New Miscellaneous:

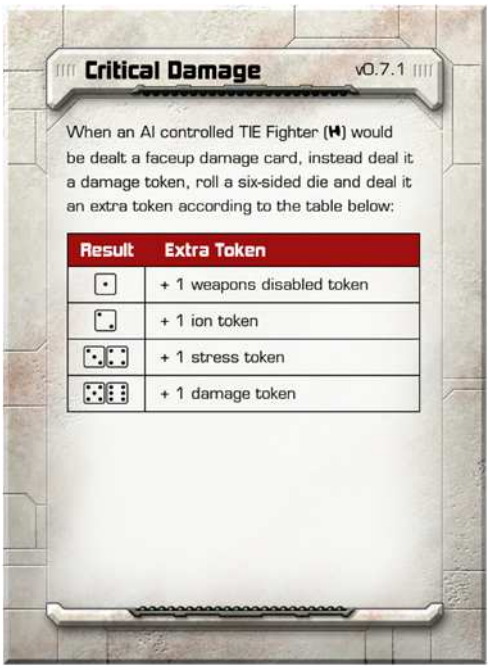

New Dials:

New resolving method for AI Critical Damage:

Reference Sheet

Terrain

- **Clouds**: Obstructs. No attacks at range 3. AI doesn't swerve.
- **Dock**: Landing by overlapping with a non-red maneuver. If ship's base overlaps, but not template, suffer one face-up damage card.
- **Ion Storm**: Overlap: roll one die, on crit one damage and one Ion token. Obstructs. No attacks at range 3. AI doesn't swerve.
- **Minefield**: Hostility determined by scenario. Overlap: roll one die per remaining hull, suffer all rolled damage. Obstruct attacks. Have 3 hull, 1 agility. AI swerves.

Miscellaneous

- **Assist**: Target Lock, Focus, Barrel Roll, Boost, Pilot Ability
- **Campaign round**: Assign Squad Leader, Mission setup, equipment and deployment, Play Mission, Upkeep Phase
- **Earning experience**: +1 TIE, +1 other TIE, +1 Elite (for everyone), +1 Large.
  +1 Assist, +1 Guardian, +1 at least 1 damage per turn
- **Guardian**: Focus, Evade, Barrel Roll, Boost, Pilot Ability, Protect
- **Upgrade cost**: Point cost, with exception of EPT (double) and Pilot level (twice new level)

New actions

- **Dock**: Ship: touch target, declare dock. Next round, no maneuver, agility zero. May maneuver and perform actions normally.
- **Jump to hyperspace**: Perform green maneuver. Declare jump. Skip attack (not action), gain hyperspace token. Roll two attack dice. Add one for every hyperspace token. Successful jump on three hits or crits, Focus tokens may apply. May be repeated until attacking or revealing non-green maneuver. In that case, lose all jump tokens.
- **Protect**: Friendly ship in Range 1 gains one Evade token.
- **Scan**: Scan a target at Range 1, effect dependent on scenario.

TIE Punisher

BASIC

2

Plasma Torpedoes
Attack 4, Range 2-3: Attack (target lock): Spend your target lock and discard this card to perform this attack. If this attack hits, after dealing damage, remove 1 shield token from the defender.

Advanced Proton Torpedoes
Attack 5, Range 1: Attack (target lock): Spend your target lock and discard this card to perform this attack. You may change up to 3 of your blank results to Focus results.

TIE Punisher Elite

ELITE

4

Guidance Chips:
Once per round, when attacking with a torpedo or missile secondary weapon, you may change 1 die result to a hit result (or a critic result if your primary weapon value is "3" or higher).

Crack Shot:
Attack (target lock): Spend your target lock and discard this card to perform this attack. You may change up to 3 of your blank results to Focus results.

PS4+ — 5

Shield Upgrade:
Increase your Shield value by 1.

PS6+ — 7

Scourge:
When attacking a defender that has 1 or more Damage cards, roll 1 additional attack die.

PS8+ — 9

Kath Scarlett:
When attacking, the defender receives 1 stress token if he cancels at least 1 Crit result.

TIE Punisher

BASIC

2

Advanced Homing Missiles:
Attack 3, Range 2: Attack (target lock): Discard this card to perform this attack. If this attack hits, deal 1 faceup Damage card to the defender. Then cancel all dice results.

Proton Torpedoes:
Attack 4, Range 2-3: Attack (target lock): Spend your target lock and discard this card to perform this attack. You may change 1 of your Focus results to a Hit result.

TIE Punisher Elite

ELITE

4

Sensor Jammer:
When defending, you may change 1 of the attacker's results into a Focus result. The attacker cannot reroll the die with the changed result.

Lightweight Frame:
When defending, after rolling defense dice, if there are more attack dice than defense dice, roll 1 additional defense die.

PS4+ — 5

Chaser: When another friendly ship at Range 1 spends a focus token, assign a focus token to your ship.

PS6+ — 7

Rear Admiral Chiraneau
When attacking at Range 1-2, you may change 1 of your Focus results to a Crit result.

PS8+ — 9

Major Rhymer:
When attacking with a secondary weapon, you may increase or decrease the weapon range by 1 to a limit of Range 1-3.

TIE Punisher

BASIC

2

Guidance Chips
Once per round, when attacking with a torpedo or missile secondary weapon, you may change 1 die result to a hit result (or a crit result if your primary weapon value is "3" or higher).

Assault Missiles
Attack 4, Range 2-3: Attack (target lock): Spend your target lock and discard this card to perform this attack. If this attack hits, each other ship at Range 1 of the defender suffers 1 damage.

TIE Punisher Elite

ELITE

4

Night Beast:
After executing a green maneuver, you may perform a free focus action.

Extra Munitions:
When you equip this card, place 1 ordnance token on each equipped Torpedo, Missile and Bomb Upgrade card. When you are instructed to discard an Upgrade card, you may discard 1 ordnance token on that card instead.

PS4+ — 5

Dead Eye: You may treat the Attack (target lock): header as Attack (focus): When an attack instructs you to spend a target lock, you may spend a focus token instead.

PS6+ — 7

Conner Net: Action: Discard this card to drop 1 Conner Net token. When a ship's base or maneuver template overlaps this token, this token detonates. Conner Net Token: When this bomb token detonates, the ship that moved through or overlapped this token suffers 1 damage, receives 2 ion tokens, and skips its "Perform Action" step. Then discard this token.

PS8+ — 9

Deathfire: When you reveal your maneuver dial or after you perform an action, you may perform a Bomb Upgrade card action as a free action.

TIE Punisher

BASIC

2

Guidance Chips:
Once per round, when attacking with a torpedo or missile secondary weapon, you may change 1 die result to a hit result (or a crit result if your primary weapon value is "3" or higher).

Plasma Torpedoes:
Attack 4, Range 2-3. Attack (target lock): Spend your target lock and discard this card to perform this attack. If this attack hits, after dealing damage, remove 1 shield token from the defender.

TIE Punisher Elite

ELITE

4

Thermal Detonators:
When you reveal your maneuver dial, you may discard this card to drop 1 thermal detonator token. This token detonates at the end of the Activation phase. Thermal Detonator Token: When this bomb token detonates, each ship at Range 1 of the token suffers 1 damage and receives 1 stress token. Then discard this token.

Extra Munitions:
When you equip this card, place 1 ordnance token on each equipped Torpedo, Missile and Bomb Upgrade card. When you are instructed to discard an Upgrade card, you may discard 1 ordnance token on that card instead.

PS4+ — 5

Munitions Failsafe:
When attacking with a secondary weapon that instructs you to discard it to perform the attack, do not discard it unless the attack hits.

PS6+ — 7

Carnor Jax:
Enemy ships at Range 1 cannot perform focus or evade actions and cannot spend focus or evade tokens.

PS8+ — 9

Omega Leader:
Enemy ships that you have locked cannot modify any dice when attacking you or defending against your attacks.

TIE and TIE/fo

BASIC

2

Hull Upgrade:
Increase your hull value by 1.

TIE and TIE/fo Elite

ELITE

4

Fearlessness:
When attacking, if you are inside the defender's firing arc at Range 1 and the defender is inside your firing arc, you may add 1 hit result to your roll.

PS4+

5

Howlrunner:
When another friendly ship at Range 1 is attacking with its primary weapon, it may reroll 1 attack die.

PS6+

7

Zeta Ace:
When performing a barrel roll, use the Straight 2 template (instead of the Straight 1 template).

PS8+

9

Omega Leader:
Enemy ships that you have locked cannot modify any dice when attacking you or defending against your attacks. (TIE gains free Target Lock after executing its maneuver)

TIE and TIE/fo

BASIC

2

Shield Upgrade:
Increase your shield value by 1.

TIE and TIE/fo Elite

ELITE

4

Predator:
When attacking, you may reroll 1 attack die.

PS4+

5

Scourge:
When attacking a defender that has 1 or more Damage cards, roll 1 additional attack die.

PS6+

7

Nigh Beast:
After executing a white maneuver, gain one Focus token.

PS8+

9

Dark Course:
When defending, ships attacking you cannot spend focus tokens or reroll attack die.

TIE and TIE/fo

BASIC

2

Autothrusters:
When defending, if you are inside the attacker's firing arc beyond Range 2 or outside the attacker's firing arc, you may change 1 of your blank results to an evade result.

TIE and TIE/fo Elite

ELITE

4

Crackshot:
When attacking a ship inside your firing arc, at the start of the "Compare Results" step, you may discard this card to cancel 1 of the defender's evade results.

PS4+

5

Fel's Wrath:
When this ship is destroyed, it's not removed until the end of the combat phase.

PS6+

7

Chaser:
When another friendly ship at Range 1 spends a focus token, assign a focus token to your ship.

PS8+

9

Winged Gundark:
When attacking at Range 1, you may change 1 of your hit results to a critical result.

TIE and TIE/fo

BASIC

2

Stealth Device:
Increase your agility value by 1 until hit by an attack.

TIE and TIE/fo Elite

ELITE

4

Juke:
When attacking, if you have an evade token, you may change 1 of the defender's Evade results to a Focus result. (AI prioritizes Evade over Focus)

PS4+

5

Backstabber:
When attacking from outside the defender's firing arc, roll 1 additional attack die.

PS6+

7

Soontir Fel:
When executing a red maneuver, gain one Focus token.

PS8+

9

Mauler Mithel:
When attacking at Range 1, roll 1 additional attack die.

Decimator

BASIC

2

Tactician:
After you perform an attack against a ship inside your firing arc at Range 2, that ship receives 1 stress token.

Decimator Elite

ELITE

4

Veteran Instincts:
All PS levels are raised by 2. Represented in right bar.

PS4+

5

Agent Kallus:
At the start of the combat phase, choose the closest enemy small or large ship that has you in its arc. When attacking or defending against that ship, you may change 1 of your focus results to a hit or evade result.

PS6+

7

Hot-Shot Copilot:
When attacking with a primary weapon, the defender must spend 1 focus token if able. When defending, the attacker must spend 1 focus token if able.

PS8+

9

Countermeasures:
At the start of the Combat phase, increase your agility value by 1 until the end of the round. Then you may remove 1 enemy target lock from your ship.

Decimator

BASIC

2

Mara Jade:
At the end of the Combat phase, each enemy ship at Range 1 that does not have a stress token receives 1 stress token.

Decimator Elite

ELITE

4

Plasma Torpedoes (+1 Ordinance Token):
Attack 4, Range 2-3. Attack (target lock): Spend your target lock and discard this card to perform this attack. If this attack hits, after dealing damage, remove 1 shield token from the defender.

PS4+

5

Operations Specialist:
After a friendly ship at Range 1-2 performs an attack that does not hit, you may assign 1 focus token to a friendly ship at Range 1-3 of the attacker. Prioritize ships: Higher PS, Enemy in arc, closest.

PS6+

7

Snap Shot:
After an enemy ship executes a maneuver, you may perform this attack against that ship. Attack 2, Range 1. You cannot modify your attack dice and cannot attack again this phase.

PS8+

9

Expertise:
When attacking, if you are not stressed, you may change all of your focus results to hit results.

Decimator

BASIC

2

Moff Jerjerrod:
Do not roll/draw cards when resolving a critical hit. Instead, gain one Stress.

Decimator Elite

ELITE

4

Intimidation:
When you are touching an enemy ship, reduce that ship's agility value by 1.

PS4+

5

Shield Upgrade:
+1 Shield

PS6+

7

Ion Projector:
After an enemy ship executes a maneuver that causes it to overlap your ship, the enemy ship receives 1 ion token.

PS8+

9

Dauntless:
When you are touching an enemy ship, immediately receive a free action. AI does not swerve to avoid touching Rebel ships.

Decimator

BASIC

2

Weapons Engineer:
You may maintain 2 target locks (only 1 per enemy ship). When you acquire a target lock, you may lock onto 2 different ships.

Decimator Elite

ELITE

4

Proton Torpedoes (+1 Ordinance token):
Attack 4, Range 2-3. Attack (target lock): Spend your target lock and discard this card to perform this attack. You may change 1 of your Focus results to a Hit result.

PS4+

5

Ysanne Isard:
At the start of the Combat phase, if you have no shields and at least 1 Damage card assigned to your ship, you may perform a free evade action.

PS6+

7

Guidance Chips:
Once per round, when attacking with a Torpedo or Missile secondary weapon, you may change 1 die result to a hit result (or a crit result if your primary weapon value is "3" or higher).

PS8+

9

Rebel Captive:
Once per round, the first ship that declares you as the target of an attack immediately receives 1 stress token.

TIE Advanced Prototype

BASIC

2

Veteran Instincts:
All PS levels are raised by 2. Represented in right bar.

TIE Advanced Prototype Elite

ELITE

4

Lone Wolf: When attacking or defending, if there are no other friendly ships at Range 1-2, you may reroll 1 of your blank results.

Crack Shot:
When attacking a ship inside your firing arc, at the start of the "Compare Results" step, you may discard this card to cancel 1 of the defender's evade results.

PS4+

5

Snap Shot: After an enemy ship executes a maneuver, you may perform this attack against that ship. Attack 2, Range 1: Attack 1 ship. You cannot modify your attack dice and cannot attack again this phase.

PS6+

7

Trick Shot:
When attacking, if you are not stressed, you may change all of your focus results to hit results.

PS8+

9

Calculation: When attacking, you may spend a focus token to change all of your focus results to critical results.

TIE Advanced Prototype

BASIC

2

Cluster Missiles:
Attack 3, Range 1-2: Attack [Target Lock]: Spend your target lock and discard this card to perform this attack twice.

TIE Advanced Prototype Elite

ELITE

4

Guidance Chips:
Once per round, when attacking with a Torpedo or Missile secondary weapon, you may change 1 die result to a hit result (or a crit result if your primary weapon value is "3" or higher).

TIE/v1:
After you acquire a target lock, you may perform a free evade action.

PS4+

5

Deadeye: If you have a Focus token, use it instead of a Target Lock to fire ordinance.

PS6+

7

Valen Rudor:
After defending, perform a free Focus action.

PS8+

9

Adrenaline Rush:
Your red maneuvers are treated as white maneuvers.

TIE Advanced Prototype

BASIC

2

Concussion Missiles:
Attack 4, Range 2-3: Attack [Target Lock]: Spend your target lock and discard this card to perform this attack. You may change 1 of your blank results to a hit result.

TIE Advanced Prototype Elite

ELITE

4

Guidance Chips:
Once per round, when attacking with a Torpedo or Missile secondary weapon, you may change 1 die result to a hit result (or a crit result if your primary weapon value is "3" or higher).

Munitions Failsafe: When attacking with a secondary weapon that instructs you to discard it to perform the attack, do not discard it unless the attack hits.

PS4+

5

Extra Munitions: When you equip this card, place 1 ordnance token on each equipped Torpedoes, Missiles, and Bomb Upgrade card. When you are instructed to discard an Upgrade card, you may discard 1 ordnance token on that card instead.

PS6+

7

Lieutenant Lorrir:
When performing a barrel roll action, you may use the [Bank Left 1] or [Bank Right 1] template instead of the [Straight 1] to roll.

PS8+

9

Rexler Brath:
After you perform an attack that deals at least 1 Damage card to the defender, if you a focus token available, spend it to flip those cards faceup.

TIE Advanced Prototype

BASIC

2

Stealth Device:
Increase your agility value by 1. If you are hit by an attack, discard this card.

TIE Advanced Prototype Elite

ELITE

4

Predator:
When attacking, you may reroll 1 attack die. If the defender's pilot skill value is "2" or lower, you may instead reroll up to 2 attack die.

Shield Upgrade:
Increase your Shield value by 1.

PS4+

5

Fel's Wrath: When the number of Damage cards assigned to you equals or exceeds your hull value, you are not destroyed until the end of the Combat phase.

PS6+

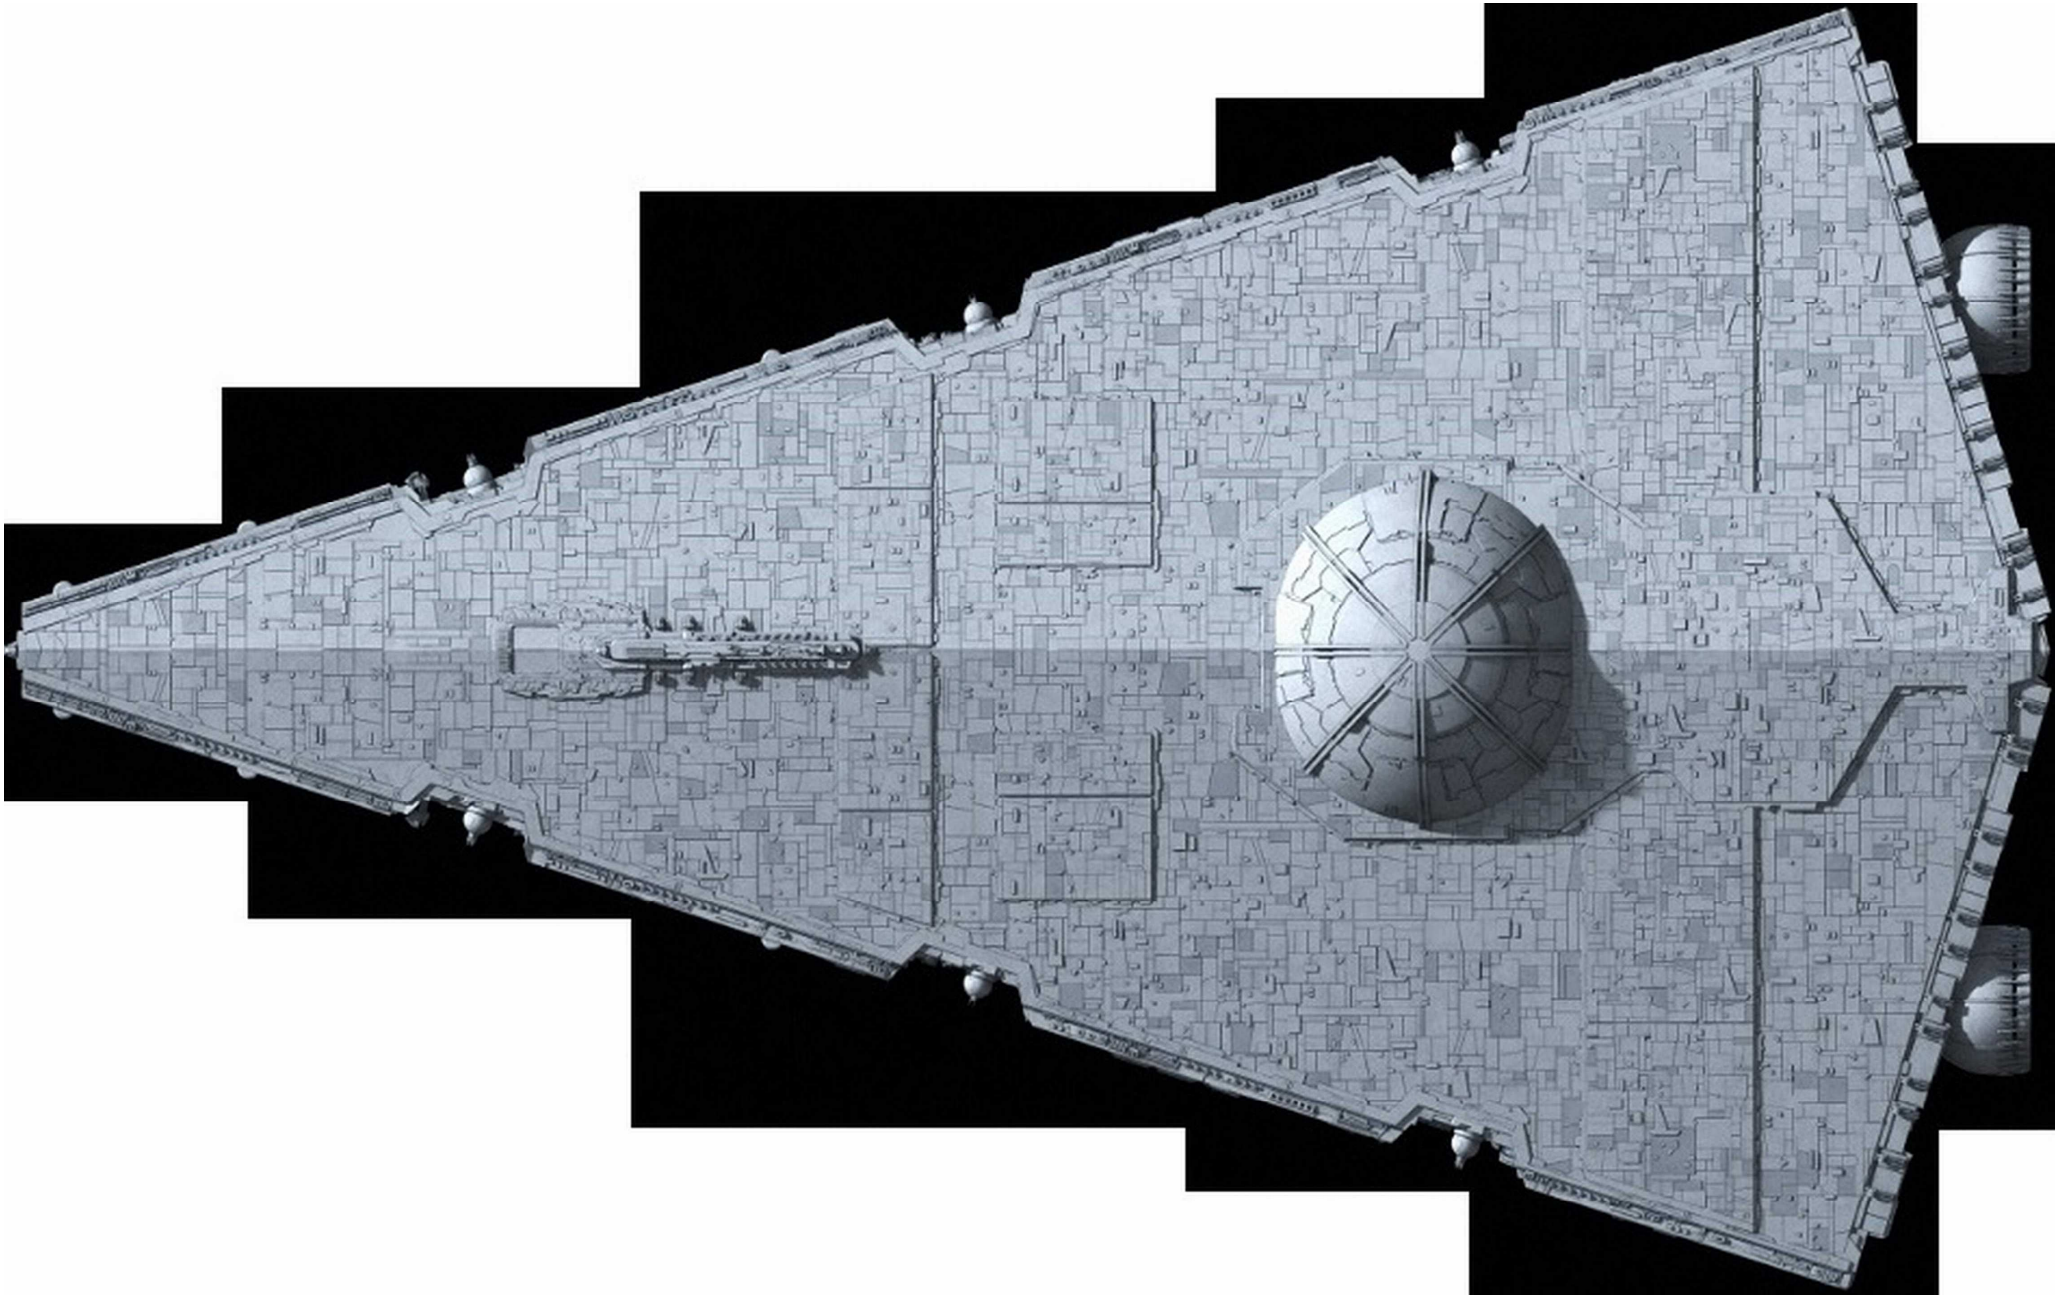

7

Carnor Jax: Enemy ships at Range 1 cannot perform focus or evade actions and cannot spend focus or evade tokens.

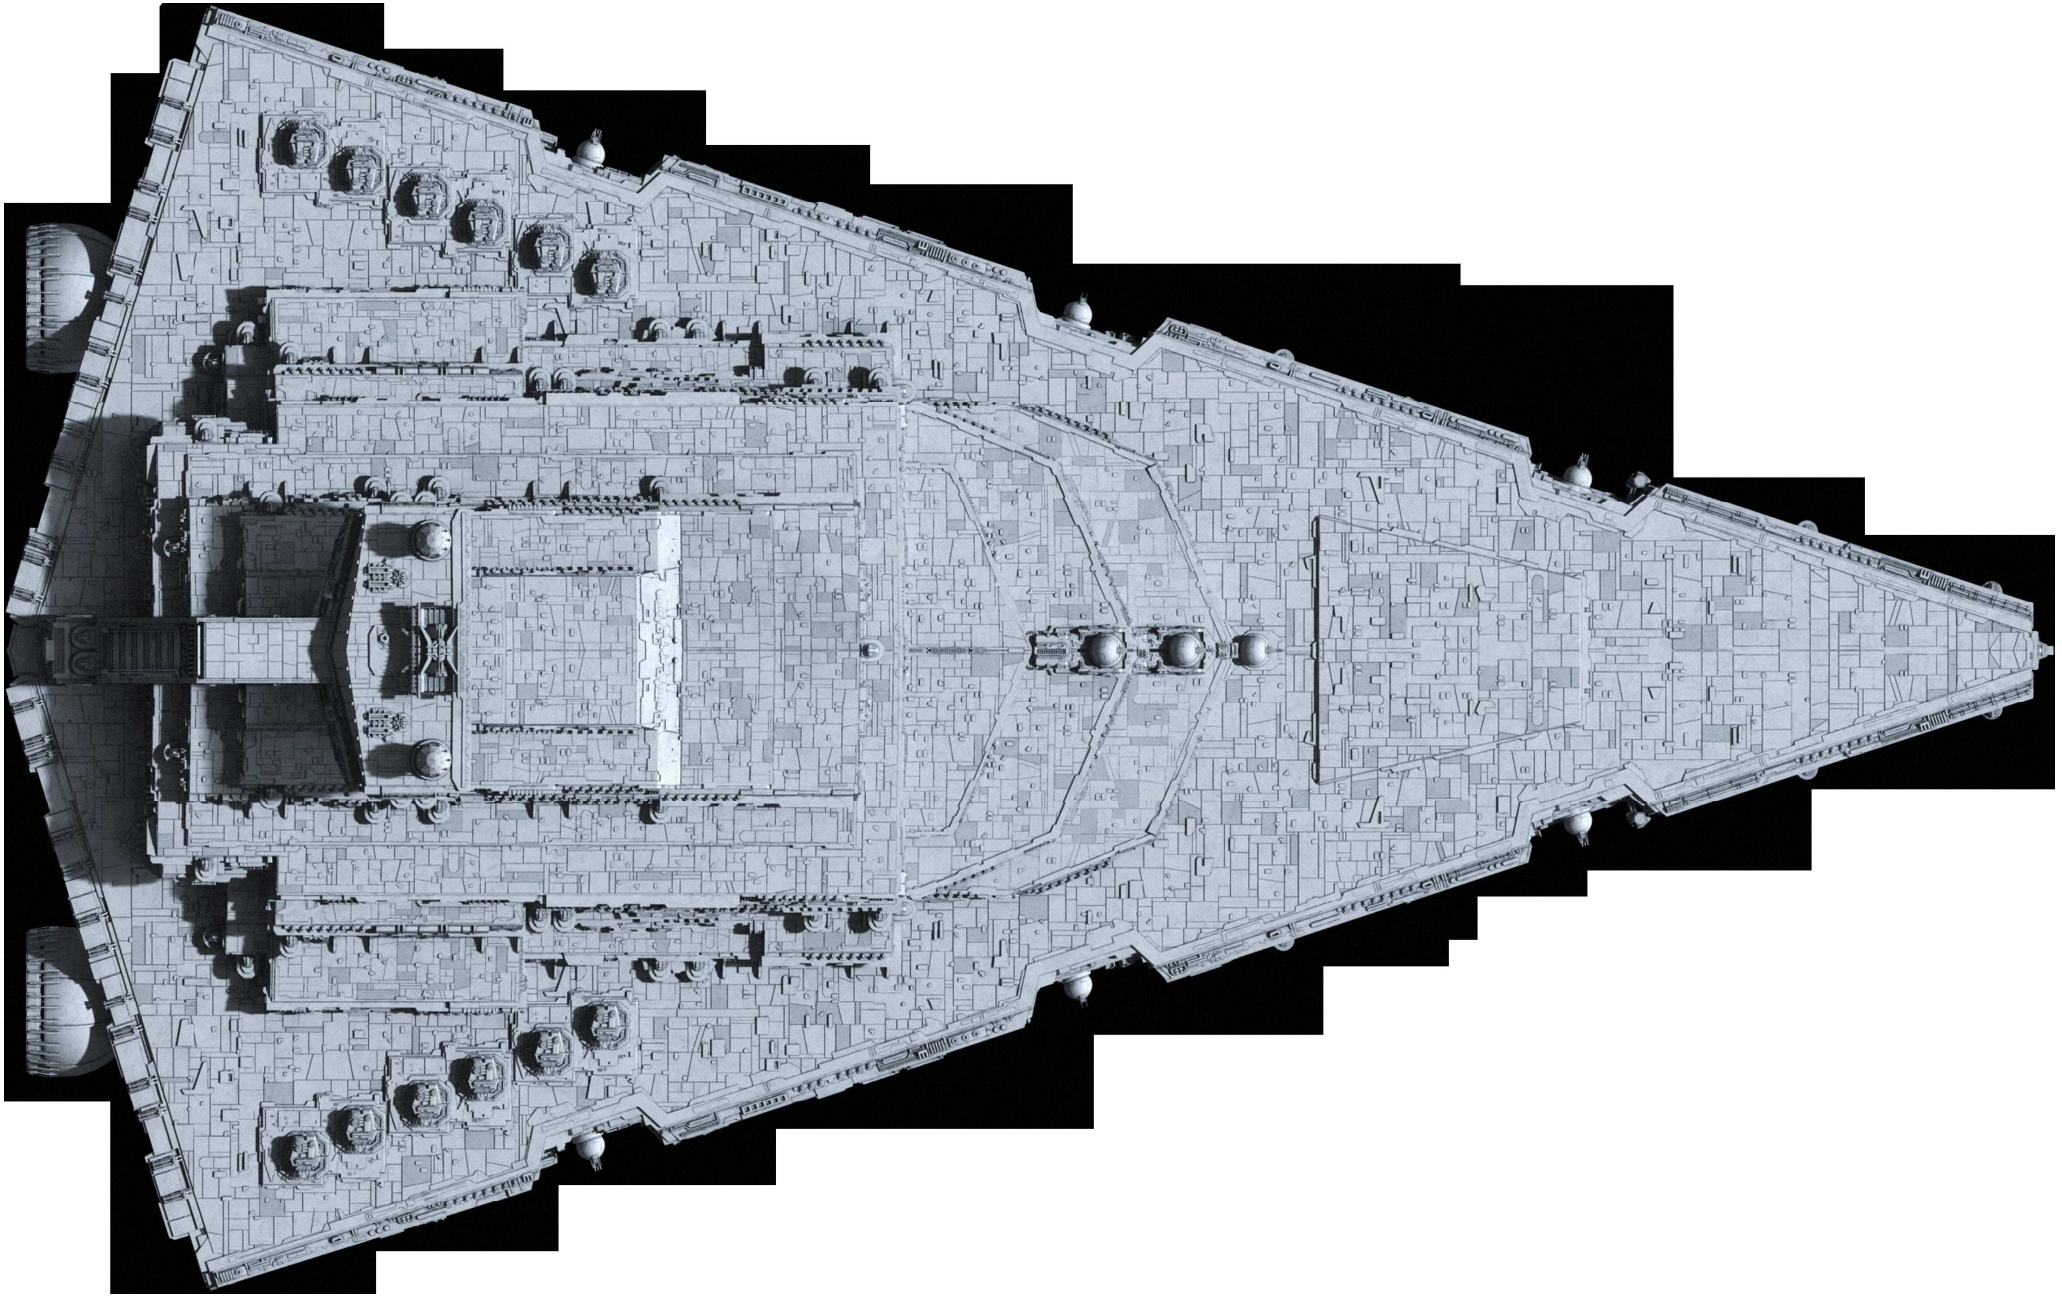

PS8+

9

The Inquisitor:
When attacking with your primary weapon at Range 2-3, treat the range of the attack as Range 1.

Construction manual: enlarge the two images of the Star Destroyer's top and bottom to a width of 120cm (4 feet), print them and glue them together so you get one Star Destroyer that you can turn depending on whether you're attacking the bottom or top. Get the original images here: http://www.fractalsponge.net/gallery/asd/index.html

Frequently Asked Questions

"Pallas"

Why would I ever dock without replenishing ordnance, repairing hull or recovering shields?
Because in this case, the AI loses you as its target. The "Pallas" will also move that turn, which gives you a plethora of movement options in the next round.

If I buy a torpedo and Ordnance Tubes for the "Pallas", it can shoot an endless stream of torpedoes, yes?
Yes, but keep in mind that this is restricted to its forward-facing firing arc and requires a Target Lock. If you shoot both Ordnance Tubes in the same round, you also need to keep two energy on the "Pallas" and spend them.

The rules say I can't allocate energy to the Ordnance Tubes. What does that mean?
That the energy needed to fire both in the same round must come from the energy that's on the "Pallas". The Ordnance Tubes do not constitute an additional "energy storage" like the other hardpoints do, which also means they don't qualify for the Optimized Generator. It's a balance issue, really.

Why would I ever not equip "Rebel Docking Clamps"?
At risk of stating the obvious, if you don't plan to dock in any given mission, you can keep them unequipped for the mission. Most of the times, though, it is strongly recommended to keep that option open.

What use is Raymus Antilles?
If you use Raymus Antilles, instead of looking at the non-existent AI maneuver dial, you wait for it to roll. Anything that's not red counts as white.

AI

Most ships aren't really good against the "Pallas" and don't even attack her, right?
Yes. If there's a player ship available, most AI ships will target them. Keep in mind however, that TIE Bombers and TIE Advanced often have Strike AI against the "Pallas" and carry ordnance.

The AI gets hung up on the Gozanti model, resulting in weird shit that gets it killed.
Unfortunately, this can happen. In these cases either laugh manically at the stupid Imperials or choose a maneuver that actually makes sense in that situation. This situation is addressed in missions in which it occurs frequently.

Why is the AI swerving so extremely out of the Gozanti's path? Shouldn't it be able to bump into it?
Unfortunately, the AI isn't able at all to accommodate for the fact that the Gozanti is a) so huge and b) moves only after the AI, so ships, especially when they target the Gozanti, would constantly bump into it (and receive damage!) if the AI didn't swerve radically from its chosen maneuver to avoid this.

XP and Upgrades

In some missions, my group makes next to no XP. Sometimes we even actually lose some!
That's intentional. Some missions that require you to escort someone or to destroy something specific don't allow for much XP-heavy heroics. But there are other missions in which waves and waves of enemies need to be kept at bay that make up for this.

We do not have enough XP to fill up every upgrade slot with a viable upgrade and/or to unlock all ships. Is this intentional?
Yes.

Why wouldn't I play the missions to unlock the T70, K-Wing, etc. as soon as they're available?
Keep in mind that you need to fly them instantly after any given mission, without a chance to recover hull, shield and ordnance. Those missions also don't score XP, but if you get shot down, you still lose XP. So that's quite a risk.

Aren't the unlockable ships wildly better than the ships available at start?
Oh, quite. But they're available only later in the campaign when the enemies become much stronger, too, and they're costing a fortune to unlock. If you buy the T70, for example, you almost certainly will lose either a few upgrades (for the "Pallas", for example) or a complete pilot level.

So if I get any title for the T65 X-Wing, and later upgrade to the T70, I get a refund for my old title?
Exactly.

And if I buy the A-Wing titles?
Exactly the same. If you buy the "A-Wing Mass Production Model" for 2XP and later the "A-Wing Mark II" for 6XP, you can return the "A-Wing Mass Production Model" to pay only 4XP. Of course you can also keep it and switch models between missions or when docking to the Pallas.

Is the old Millenium Falcon title automatically equipped on all YT-1300 iterations?
Yes.

When do I pay the XP to unlock a new ship?
At any point after you succeed in the unlocking mission. Of course, you can only buy the new ship once you paid the XP.

Miscellaneous

How much playtime do I need to plan for?
Generally, the missions involving defending things, where enemies respawn, are pretty epic in scope and take much more time. Other missions are very short and can be played in less than half an hour.

What happens if I don't leave the mission area before the mission timer runs out?
In Friendly Territory, you won. In Neutral and Hostile Territory, ships that are left behind are destroyed.

Do I still need to track XP in the final mission?
Yes. If you're shut down, you want to buy a new ship and launch from the "Pallas" (as long as the "Pallas" isn't destroyed), and that costs 5XP (plus the 2XP penalty for hostile territory).

Additional Material

Why is there so much additional upgrade material coming with this expansion?
Upgrades are fun. Feel free to ignore any of them if you don't like them or think they're broken (in the latter case, leave a note if you will).

Is there any reason why there are so many different titles?
The general idea is to differentiate ships further, giving them different roles. For example, the ACT65 X-Wing is more geared towards protecting the Pallas or other vessels, whereas the BTL-S3 Y-Wing is a dedicated hunter of slow ships like bombers, shuttles or Decimators.

One of the upgrade cards in this document was created by someone else without proper attribution.
I hope that this is not the case, but please contact me so I can rectify the mistake.

How do I use the different player cards and titles?
Every title that changes your ship by giving it new upgrade slots or movement options comes with its own player card, so you do not need to change the old card by hand. Simply take the new player card, copy over your Pilot Level and purchased upgrades, and discard the old one. The title spaces are only for such titles as do not change the player card, such as the new Millenium Falcon.

Why is there no box for XP and notes anymore?
I felt that the space could be put to better use for the upgrades, so that you don't need to cram in your text quite as hard. I usually use the backside of the player cards to track XP.

When I use the "Electromagnetic Gyros" or "PS-6 Engine Upgrade", are the Tallon Rolls and Segnor's Loops red?
Yes.

When I remove a shield with the "Precision Blasters", does this count as damage for the XP achievement of at least one damage per turn?
Yes.

When I equip Advanced Sensors with Target Lead Indicator, do I get two actions, one before movement and one before combat?
No. You can skip the Perform Action step only once, so you must decide for either one.

Docking

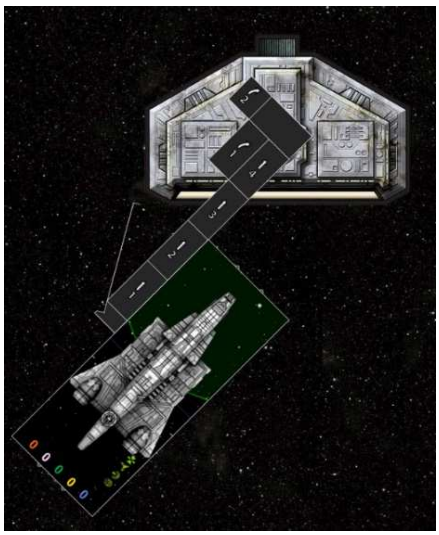

So, how does docking work?
Let's do this with some illustrations, hm?

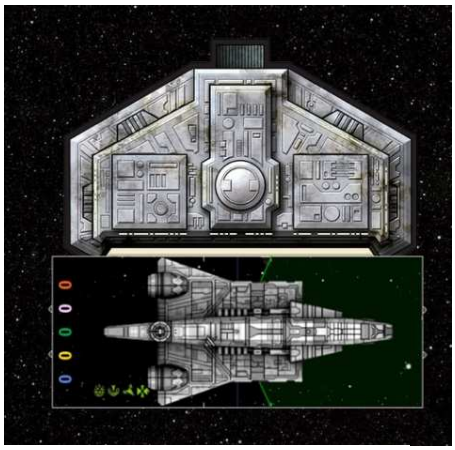

Docking Huge Ships with a dock:

Docking by overlapping.

Some missions require ships to "overlap the dock" in order to dock. In this case, the ships base needs to actually overlap the dock to complete the docking process. Immediately when the docking is complete, reposition the ship sideways with the dock (see below) if you're instructed to remove it from play.

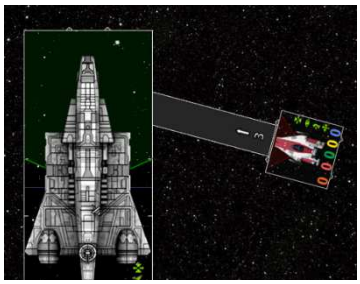

Other missions require you to overlap the dock with your maneuver tool. In this case, when the maneuver tool overlaps the dock, your docking process is complete. In the example here, the Gozanti would dock if it was going at speed 3 or 4 (since these parts of the tool are overlapping the dock), whereas speed 1 and 2 do not suffice to complete the docking. Note that missions may require you to reach a certain speed in order to dock.

Docking by overlapping the maneuver tool.

A repositioned Huge Ship after docking.

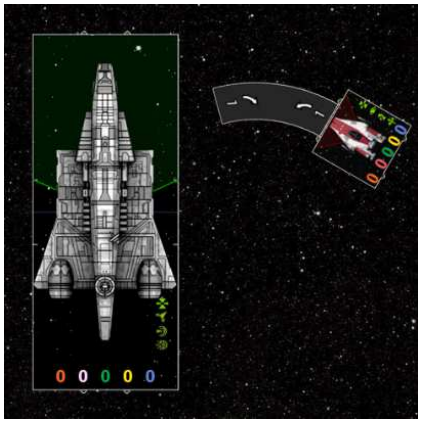

Once docking is complete, you need to rearrange the Huge Ship as equal as possible along the illuminated entrance of the dock. Don't go overboard trying to get this as precise as possible; an approximation suffices. Huge Ships that are docked this way are still physically in play and can be shot at, bumped in, take actions and perform attacks. Usually, the mission description tells you whether and how you can do all these things.

Docking Small and Large Ships with a Huge Ship:

Successful docking: the maneuver tool overlaps the Huge Ship.

Oftentimes, you will want to dock other ships with your Gozanti carrier or other Huge Ships, as the mission rules require. In this case, you need to overlap the Huge Ship with your maneuver tool. Bumping into a Huge Ship when your maneuver tool does not overlap the Huge Ship does not lead to a successful docking.

Unsuccessful docking: the A-Wing will bump into the Gozanti and not dock.

Acknowledgments

This work would of course not have been possible without the great “Heroes of the Aturi Cluster”-campaign by Josh Derksen, so the first acknowledgment and thanks has to go to him. Everything in here builds on his awesome work.

Josh also graciously allowed me to use his preliminary Bomber and Punisher AI for playtesting, so if you have any issues with it, he’s glad to hear from you.

My thanks also go to David Julien, who provided stunning artwork for the player cards, custom upgrades and the elite cards. Without him, you would be thrown back to my MS Paint skills, which are really not all that good.

The original idea for the A-Wing cards comes from FFG-forum user Razgriz25thinf and his "40 Years of Speed" expansion.

The Rebel AI is from the “Defenders of the Empire” custom campaign by Boardgamegeek user “Storgar The Viking”.

The Crew card “BB8” comes from FFG forums user “emeraldbeacon”.

The Crew card “K2-SO” and the Title “T65AC4” come from FFG Forums user “emperorscanaries”.

The System “Underslung Blaster Cannon”, the Cannon “Composite Beam” and the System “Target Scrambler” come from FFG forums user “gabe69valesquez”.

The Crew card “Turret Gunner” is based on an idea by FFG Forums user “Gouf”.

The Y-Wing Modification “Divert Power” comes from FFG Forums user “InterceptorMad”.

The Modification “Precision Blasters” and the Illicit upgrade “Discord Drones” come from FFG Forums user “Mangipan”.

The Crew cards “Hondo Ohnaka”, “Saw Gerrera”, “MK-09”, the Modifications “Chaff” and “Target Lead Indicator”, the turret “Slug Cannon Turret”, the astromechs “R2-BHD” and “R3-S1”, and the Illicit “Fake Transponder codes” are from FFG Forums user “Odana”.

The Title “Gyrostabilization Systems” comes from FFG Forums user “Rakaydos”.

The Astromech “R4-M4” comes from FFG Forums user “Razgriz25thinf”.

The System “Improved Targeting Software” and the Astromech “R6” come from the “Warriors of the New Republic” submission to the Custom Cards League in the FFG Forums. I couldn’t find the author.

The title “BTL-4 Long Probe” is from Axel Theodor Rolandsson Klingberg.

The Modification “Gimballed Thrusters” and the astromech “R3-M2” are from FFG forums user “AwesomeJedi”.

The titles “Scarlet Star”, “Republic Courier”, “Gyroscopic Cockpit”, the Systems upgrades “PK-8F Analysis Grid” and “Tibanna Synthesizer”, the crew “Eaden Vrill” and “Lieutenant Blount” and the astromech “Catch” come from FFG forums user Jadotch.

I have taken in custom upgrade ideas wherever I could find them. Sometimes I was unable to identify the author, so if anyone recognizes this stuff, please let me know so I can attribute it.
