## CEREMONIAL FLIGHT

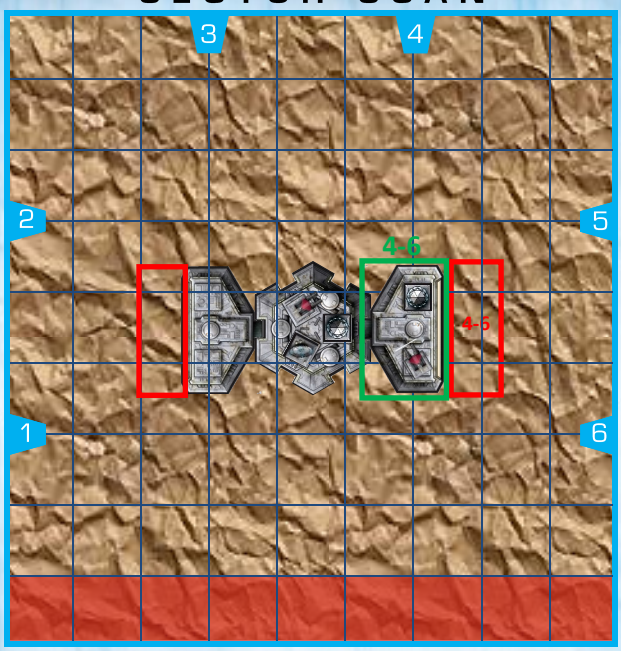

### Mission Briefing:

"Attention Squad! Looks like we'll have to cut our ceremonial practice flight short. Proximity scanners have picked up a large Rebel strike force exiting hyperspace just above the planet's surface and they're on their way down here to our outpost!

There's no time to get back to the shuttle. We'll have to use the old outpost's Sensor Array to send out a distress signal to alert friendly forces detailing the situation.

The first enemy wave will be here before the signal can be completed. We'll have to hold them back with the only fighters we have available: these retired **TIE Strikers**.

Once we have held them off long enough for our transmission to get through, we'll have to escape to mountain pass to the south."

|---|---|
| **PRIMARY** | 1) Sensor Array must survive until the end of turn 8<br>2) At least half of the players' ship must exit to the lower edge Escape Route before the end of turn 10. |
| **BONUS** | All players gain 2XP if the Sensor Array survives at the end of turn 10.<br>All players gain 1XP if all players survive and escape by turn 10. |

**Rebel Victory**

*"The Sensor Array has been destroyed before it could complete the transmission! We won't be getting reinforcements until we can find another way to alert the fleet! We're completely on our own now..."*

**Imperial Victory**

*"The Rebels have taken the outpost but not before our distress call was sent out to the fleet. Reinforcements are on the way! We just have to hold out long enough for them to reach us."*

## CEREMONIAL FLIGHT

### AI Ships

All Y-Wings will be Gold Squadron and will be equipped with Extra Munitions & Proton Torpedoes for this mission. They will not fire upon players unless they are unable to fire on the outpost's facilities.

All A-Wings will not fire upon the outpost's unless a player's ship cannot be targeted.

All Rebels ships will target the outpost facilities in the following order:
Turbo Laser Turrets
Shield Generators
Sensor Array

If the Sensor Array is destroyed before the mission is over, all Y-Wings will revert to Attack AI settings.

### Turbo Laser Turrets:

These are player controlled but players do not gain XP for damage caused by them. Points scored for the group pool are still added.

## THE SOUTH MOUNTAIN PASS

### Mission Briefing:

"Our outpost has been destroyed but we've managed to escape into the canyons with Rebel forces right behind us in hot pursuit. Sensors are picking up faint energy readings that could indicate another base nearby but the mountains are interfering with our scans.

There are still some active power relays up ahead. If we scan each of their energy levels, we can determine which direction their power is coming from.

We'll have to continue to rely on these **TIE Strikers** to make it through these canyons. Rebel Y-Wings are staying above the canyons so keep low or they'll get a lock on you."

Neutral Territory—12 Turns
Ion Cloud markers will be used as Mountains
Red Zone—Player Setup
Red Stars—Power Relays (use satellite tokens)

Green Zones—Possible Escape Vectors

| | |
|---|---|
| **PRIMARY** | 1) Scan at least one power relay for every two players. Relays 3 or 4 must be scanned to activate its corresponding Escape Vector.<br>2) At least one player's ship must exit through the Escape Vector activated by the nearest scanned relay (See **Power Relays** on next page). |
| **BONUS** | All players gain 1XP for each additional relay scanned<br>All players gain 2XP if all players have hull remaining 3 or more. |

**Rebel Victory**

*"This is unacceptable! They used to use these canyons as training courses for Imperial pilots. If you can't fly through them, then you shouldn't be flying at all!! "*

**Imperial Victory**

*"Well done gentlemen. This energy trail will lead us right to the base that's still powering them. No doubt we can find something there to help us fight off the Rebels and prevent them from inflicting any further damage to our facilities."*

## THE SOUTH MOUNTAIN PASS

### Mountains:

Each ion Cloud token is treated as a 'Mountain' with the following conditions.

**Activation Phase:** Any player's ship passing through or landing on an obstacle must roll 2 attack dice and suffer the damage rolled. If 2 Critical hits are rolled, the ship is immediately destroyed.

A players ship will not pass through or land on the mountain but instead place the ship so that the side of the base is just overlapping the mountain.

**Combat Phase:** Any obstructed attack cannot be performed.

### AI

All AI ships will attempt to avoid if mountains if possible. During the Activation Phase, they receive a weapons disabled token for that turn if they fly over or land on a mountain.

### Power Relays:

At least one power relay must be scanned for every two players.

1-2 players: 1 scanned
3-4 players: 2 scanned
5-6 players: 3 scanned

Power Relays 3 or 4 must be scanned in order to activate the Escape Vector located nearest to them.

To scan a relay perform a scan action at Range 1 of the relay.

Once all Imperial Ships are off of the map (either escaped or destroyed), the mission is over.

If an Imperial Ship flies through an Escape Vector without having the corresponding relay scanned, it is then destroyed.

## DESERT OUTPOST

### Mission Briefing:

"We managed to lose the Rebels in the canyons and find the old base with a small decommissioning crew present. We have made repairs to our strikers and there are some Tie aggressors in the hangers.

We've activated the base's communication systems and have alerted friendly forces to where we are. However, the Rebels have picked up our signal as well and their reinforcements will be here sooner than ours.

Get those turbo lasers online and prepare your ships!"

Players will be flying **TIE Strikers**.

| **BONUS** | All players gain 3XP if all Rebel forces have been destroyed or have fled.<br>All players gain 2XP if all turbo lasers have survived by the end of Turn 12,<br>All players gain 1XP if all Imperial ships have survived by the end of Turn 12. |

**Rebel Victory**

*"Our base has been disabled and the Rebels are using it to prepare an ambush attack when our fleet arrives. Many Imperial soldiers will die because of this failure."*

**Imperial Victory**

*"The day is ours gentlemen. Not only have we survived time and time again against the Rebel attacks, but we proved to them that even with our old relics, the Empire will always triumph!"*

## DESERT OUTPOST

### Weapons Depots:

The Tie Aggressors are controlled collectively by the players, no xp is scored by the players for the Aggressors causing damage but any points for the pool are scored as normal. There will be 1 TIE Aggressor for 2 players, 2 for 3-4 players and 3 for 5-6 players. 1 TIE Aggressor starts in each hanger and is PS1.

To equip each TIE Aggressor roll 1D6 and use the following turret and modifications:

1) Twin Laser Turret
2) Ion Turret
3) Dorsal Turret
4) Synced Turret
5) Autoblaster Turret
6) Player choice of 1-5

1) Shield Upgrade
2) Engine Upgrade
3) Stealth Device
4) Lightweight Frame
5) Twin Ion Engine
6) Player choice of 1-5

### Turbo Laser Turrets:

These are player controlled but players do not gain XP for damage caused by them. Points scored for the group pool are still added.

### AI:

All ships assigned with 'Strike' AI will target hangar turbo lasers until all have been destroyed. They will only fire at player ships if no turbo laser target is available.
